Table 607. Type of Work Flexibility Provided to Employees: 2008

[In percent. The National Study of Employers does not ask employers to report on whether they have “written policies,” but rather whether their organization “allows employees to” ... or “provides the following benefits or programs ...” The wording is used for two reasons. First, employers may have written policies, but not “allow” employees to use them. Second, smaller employers are less likely to have written policies than larger ones. For methodology, see source]

Type of work flexibility provided (to employee)	Employer allows all or most employees	Employer size	
		50 to 99 employees	1,000 or more employees
FLEX TIME AND PLACE			
Periodically change starting and quitting times within some range of hours . . . . .	37	40	37
Change starting and quitting times on a daily basis . . . . .	10	11	7
Compress workweek by working longer hours on fewer days for at least part of the year . . . . .	8	10	5
Work some regular paid hours at home occasionally . . . . .	3	3	2
Work some regular paid hours at home on regular basis . . . . .	1	1	1
CHOICES IN MANAGING TIME			
Have control over when to take breaks . . . . .	55	54	51
Have choices about and control over which shifts to work . . . . .	16	16	16
Have control over paid and unpaid overtime hours . . . . .	13	14	15
REDUCED TIME			
Move from full time to part time and back again while remaining in same position or level . . . . .	13	12	12
Share jobs . . . . .	8	9	5
Work part year (work reduced time on annual basis) . . . . .	11	10	11
CAREGIVING LEAVE			
Return to work gradually after childbirth or adoption . . . . .	57	56	54
TIME OFF			
Family or personal time off without loss of pay . . . . .	45	46	47
Compensatory time off program . . . . .	18	21	9
Do volunteer work during regular work hours . . . . .	21	24	20
FLEX CAREERS			
Phase into retirement by working reduced hours overtime prior to full retirement . . . . .	25	25	20
Take sabbaticals (paid or unpaid for six months or more) . . . . .	21	24	14
Take paid or unpaid time off for education or job training skills . . . . .	40	41	33
Take extended career breaks for caregiving or other personal or family reasons . . . . .	47	48	44
Receive special consideration when returning to the organization after an extended career break. . . . .	28	29	21

Table 610. Multiple Jobholders: 2010

[Annual average of monthly figures (6,878 represents 6,878,000). Civilian noninstitutionalized population 16 years old and over. Multiple jobholders are employed persons who, either 1) had jobs as wage or salary workers with two employers or more; 2) were self-employed and also held a wage and salary job; or 3) were unpaid family workers and also held a wage and salary job. Based on the Current Population Survey; see text, Section 1 and Appendix III]

Characteristic	Total		Male		Female	
	Number (1,000)	Percent of employed	Number (1,000)	Percent of employed	Number (1,000)	Percent of employed
Total <sup>1</sup>	6,878	4.9	3,326	4.5	3,552	5.4
Age:						
16 to 19 years old	167	3.8	61	2.9	106	4.7
20 to 24 years old	695	5.5	289	4.5	406	6.5
25 to 54 years old	4,797	5.1	2,374	4.7	2,423	5.5
55 to 64 years old	1,021	4.7	490	4.4	531	5.1
65 years old and over	197	3.1	112	3.2	86	3.0
Race and Hispanic ethnicity:						
White <sup>2</sup>	5,857	5.1	2,861	4.7	2,996	5.7
Black <sup>2</sup>	653	4.3	298	4.3	354	4.3
Asian <sup>2</sup>	202	3.0	96	2.7	106	3.4
Hispanic <sup>3</sup>	638	3.2	360	3.1	278	3.4
Marital status:						
Married, spouse present	3,644	4.7	2,015	4.7	1,629	4.7
Widowed, divorced, or separated	1,233	5.5	416	4.5	817	6.2
Single, never married	2,000	5.2	895	4.3	1,105	6.2
Full- or part-time status:						
Primary job full-time, secondary job part-time	3,591	(X)	1,926	(X)	1,665	(X)
Both jobs part-time	1,805	(X)	589	(X)	1,216	(X)
Both jobs full-time	263	(X)	172	(X)	91	(X)
Hours vary on primary or secondary job	1,182	(X)	621	(X)	562	(X)

X Not applicable. <sup>1</sup> Includes a small number of persons who work part-time on their primary job and full-time on their secondary job(s), not shown separately. Includes other races, not shown separately. <sup>2</sup> For persons who selected this race group only. See footnote 4, Table 587. <sup>3</sup> Persons of Hispanic origin may be any race.

Table 615. Persons Not in the Labor Force: 2010

[In thousands (83,941 represents 83,941,000). For civilian noninstitutional population 16 years old and over. Annual average of monthly figures. Based on the Current Population Survey; see text, Section 1, and Appendix III]

Status and reason	Total	Age			Sex	
		16 to 24 years old	25 to 54 years old	55 years old and over	Male	Female
Total not in the labor force . . . . .	83,941	17,014	22,350	44,577	33,189	50,752
Do not want a job now <sup>1</sup> . . . . .	77,882	14,990	19,659	43,233	30,309	47,573
Want a job now . . . . .	6,059	2,024	2,691	1,344	2,880	3,179
In the previous year—						
Did not search for a job . . . . .	2,948	968	1,189	791	1,279	1,669
Did search for a job <sup>2</sup> . . . . .	3,111	1,056	1,502	553	1,601	1,510
Not available for work now . . . . .	623	274	284	65	264	359
Available for work now, not looking for work <sup>3</sup> . . . .	2,487	782	1,218	487	1,337	1,151
Reason for not currently looking for work:						
Discouraged over job prospects <sup>4</sup> . . . . .	1,173	291	595	287	731	442
Family responsibilities . . . . .	286	49	171	66	83	203
In school or training . . . . .	350	262	81	7	191	158
Ill health or disability . . . . .	50	4	21	25	21	29
Other <sup>5</sup> . . . . .	629	176	350	102	311	318

<sup>1</sup> Includes some persons who are not asked if they want a job. <sup>2</sup> Persons who had a job in the prior 12 months must have searched since the end of that job. <sup>3</sup> Persons who have searched for work in the previous year and are available to work now also are referred to as “marginally attached to the labor force.” <sup>4</sup> Includes such things as believes no work available, could not find work, lacks necessary schooling or training, employer thinks too young or old, and other types of discrimination. <sup>5</sup> Includes such things as child care and transportation problems.

**Table 616. Employed Civilians by Occupation, Sex, Race, and Hispanic Origin: 2010—Con.**

[139,064 represents 139,064,000. Civilian noninstitutional population 16 years old and over. Annual average of monthly figures. Based on Current Population Survey; see text, Section 1, and Appendix III. Occupational classifications are those used in the 2000 census]

Occupation	Total employed (1,000)	Percent of total			
		Female	Black <sup>1</sup>	Asian <sup>1</sup>	Hispanic <sup>2</sup>
<b>Natural resources, construction, and maintenance occupations . . .</b>	<b>13,073</b>	<b>4.6</b>	<b>6.7</b>	<b>2.0</b>	<b>25.0</b>
Farming, fishing, and forestry occupations <sup>3</sup> . . . . .	987	23.5	5.2	1.9	41.8
Construction and extraction occupations <sup>3</sup> . . . . .	7,175	2.6	6.1	1.4	29.1
First-line supervisors/managers of construction trades and extraction workers . . . . .	659	3.9	4.9	1.0	16.5
Brickmasons, blockmasons, and stonemasons . . . . .	162	0.1	6.7	0.8	35.5
Carpenters . . . . .	1,242	1.4	4.0	1.4	25.7
Carpet, floor, and tile installers and finishers . . . . .	209	0.5	3.8	3.3	39.5
Cement masons, concrete finishers, and terrazzo workers . . . . .	88	0.3	12.0	—	51.5
Construction laborers . . . . .	1,267	2.7	9.0	2.2	43.1
Operating engineers and other construction equipment operators . . .	363	1.5	4.7	1.1	13.7
Drywall installers, ceiling tile installers, and tapers . . . . .	171	2.5	2.5	0.3	58.6
Electricians . . . . .	691	1.5	7.0	1.6	14.0
Painters, construction and maintenance . . . . .	578	7.2	4.8	1.3	41.0
Pipelayers, plumbers, pipefitters, and steamfitters . . . . .	526	1.5	7.2	1.3	20.8
Roofers . . . . .	214	1.0	4.0	1.3	46.4
Sheet metal workers . . . . .	108	4.0	5.8	0.4	18.8
Construction and building inspectors . . . . .	104	8.7	8.3	2.3	9.0
Highway maintenance workers . . . . .	110	2.5	14.2	2.6	11.0
Installation, maintenance, and repair occupations <sup>3</sup> . . . . .	4,911	3.9	7.8	2.9	15.7
First-line supervisors/managers of mechanics, installers, and repairers . . . . .	381	6.3	7.5	1.9	9.9
Computer, automated teller, and office machine repairers . . . . .	305	11.0	10.0	8.0	10.1
Radio and telecommunications equipment installers and repairers . . .	166	9.1	9.3	6.2	10.4
Aircraft mechanics and service technicians . . . . .	136	2.3	7.1	7.1	15.3
Automotive body and related repairers . . . . .	168	1.2	6.3	0.8	22.6
Automotive service technicians and mechanics . . . . .	802	1.6	6.8	3.5	20.3
Bus and truck mechanics and diesel engine specialists . . . . .	339	0.7	7.6	1.6	13.2
Heavy vehicle and mobile equipment service technicians and mechanics . . . . .	235	1.2	4.6	1.1	14.1
Heating, air conditioning, and refrigeration mechanics and installers . . . . .	392	0.6	8.0	2.2	17.2
Industrial and refractory machinery mechanics . . . . .	447	3.5	8.1	2.2	14.4
Maintenance and repair workers, general . . . . .	347	3.8	11.1	2.7	18.0
Electrical power-line installers and repairers . . . . .	124	0.4	8.2	0.7	10.3
Telecommunications line installers and repairers . . . . .	163	7.5	9.4	1.6	17.5
<b>Production, transportation, and material moving occupations . . .</b>	<b>16,180</b>	<b>21.2</b>	<b>13.9</b>	<b>4.2</b>	<b>21.0</b>
Production occupations <sup>3</sup> . . . . .	7,998	27.6	11.4	5.5	21.9
First-line supervisors/managers of production and operating workers . . . . .	702	18.1	7.3	5.5	15.7
Electrical, electronics, and electromechanical assemblers . . . . .	151	54.9	15.1	22.6	17.1
Bakers . . . . .	206	57.0	9.8	5.8	30.6
Butchers and other meat, poultry, and fish processing workers . . . . .	331	21.2	14.0	10.4	36.2
Food batchmakers . . . . .	107	55.5	9.7	2.6	27.6
Cutting, punching, and press machine setters, operators, and tenders, metal and plastic . . . . .	78	21.1	11.1	2.6	15.2
Machinists . . . . .	408	3.9	4.3	5.5	15.1
Welding, soldering, and brazing workers . . . . .	479	5.4	7.0	3.6	22.7
Printing machine operators . . . . .	162	21.5	13.7	1.8	19.6
Laundry and dry-cleaning workers . . . . .	195	55.8	15.9	9.3	30.1
Sewing machine operators . . . . .	170	78.5	13.3	10.8	40.2
Tailors, dressmakers, and sewers . . . . .	76	70.0	4.9	20.9	19.6
Stationary engineers and boiler operators . . . . .	91	1.7	9.8	5.3	14.5
Water and liquid waste treatment plant and system operators . . . . .	77	5.9	6.8	3.4	10.1
Crushing, grinding, polishing, mixing, and blending workers . . . . .	90	15.7	16.0	2.2	23.2
Inspectors, testers, sorters, samplers, and weighers . . . . .	669	34.3	11.1	5.3	16.9
Medical, dental, and ophthalmic laboratory technicians . . . . .	92	49.0	5.5	7.8	12.5
Packaging and filling machine operators and tenders . . . . .	255	47.6	16.4	4.1	42.3
Painting workers . . . . .	139	7.9	9.3	0.5	26.4
Transportation and material-moving occupations <sup>3</sup> . . . . .	8,182	15.0	16.4	2.8	20.0
Supervisors, transportation and material-moving workers . . . . .	263	23.4	18.3	3.0	15.1
Aircraft pilots and flight engineers . . . . .	110	5.2	1.0	1.0	6.3
Bus drivers . . . . .	600	47.0	25.1	2.2	12.3
Driver/sales workers and truck drivers . . . . .	3,028	4.6	13.6	1.5	17.5
Taxi drivers and chauffeurs . . . . .	390	14.4	26.6	13.0	15.7
Parking lot attendants . . . . .	75	6.3	25.7	12.8	18.0
Service station attendants . . . . .	77	13.5	8.6	4.0	17.1
Industrial truck and tractor operators . . . . .	499	6.2	22.0	1.2	32.0
Cleaners of vehicles and equipment . . . . .	333	15.0	14.8	3.7	35.6
Laborers and freight, stock, and material movers, hand . . . . .	1,700	17.4	16.9	3.0	21.3
Packers and packagers, hand . . . . .	403	56.5	17.3	4.2	41.3
Refuse and recyclable material collectors . . . . .	88	7.9	23.9	0.2	21.2

— Represents or rounds to zero. <sup>1</sup> The Current Population Survey (CPS) allows respondents to choose more than one race. Data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years only allowed respondents to report one race group. See also comments on race in the text for Section 1. <sup>2</sup> Persons of Hispanic origin may be any race. <sup>3</sup> Includes other occupations, not shown separately.

Licensed practical and licensed vocational nurses	753.6	909.2	155.6	20.7	H	Postsecondary vocational award

<sup>1</sup> Quartile ranks based on the Occupational Employment Statistics annual wages. VH = very high (\$51,540 and over), H = high (\$32,390 to \$51,530), L = low (\$21,590 to \$32,380), and VL = very low (under \$21,590). The rankings were based on quartiles using one-fourth of total employment to define each quartile. Wages are for wage and salary workers.

Table 630. Nonfarm Establishments—Employees, Hours, and Earnings by Industry: 1990 to 2010

[Annual averages of monthly data. (109,487 represents 109,487,000). Based on data from establishment reports. Includes all full- and part-time employees who worked during, or received pay for, any part of the pay period reported. Excludes proprietors, the self-employed, farm workers, unpaid family workers, private household workers, and Armed Forces. Establishment data shown here conform to industry definitions in the 2007 North American Industry Classification System (NAICS) and are adjusted to March 2010 employment benchmarks. Based on the Current Employment Statistics Program; see source and Appendix III.]

Item and year	Total nonfarm	Private industry															Government

**Table 631. Employees in Nonfarm Establishments—States: 2010**

[In thousands (129,818 represents 129,818,000). Includes all full- and part-time employees who worked during, or received pay for, any part of the pay period reported. Excludes proprietors, the self-employed, farm workers, unpaid family workers, private household workers, and Armed Forces. National totals differ from the sum of the state figures because of differing benchmarks among states and differing industrial and geographic stratification. Compiled from data supplied by cooperating state agencies. Based on North American Industry Classification System, 2007; see text, section 15]

**Table 638. Type of Separations Affecting Establishment Payrolls: 2010**

[21,296 represents 21,964,000. Covers all private nonfarm establishments. Separations are the total number of terminations of employment occurring at any time during the reference month, and are reported by type of separation—quits, layoffs and discharges, and other separations. Annual rate estimates are computed by dividing annual levels by the Current Employment Statistics (CES) annual average employment level, see Table 632, and multiplying that quotient by 100]

Industry	Number (1,000)			Rate (percent) <sup>1</sup>		
	Annual quits level <sup>2</sup>	Annual layoffs and discharge levels <sup>3</sup>	Annual other separations <sup>4</sup>	Annual quits level <sup>2</sup>	Annual layoffs and discharge levels <sup>3</sup>	Annual other separations <sup>4</sup>

**Table 647. Average Annual Wage, by State: 2008 and 2009**

[In dollars, except percent change. Based on federal-state cooperative program, The Quarterly Census of Employment and Wages (QCEW), also referenced as ES-202. Includes workers covered by state unemployment insurance laws and for federal civilian workers covered by unemployment compensation for federal employees, approximately 97 percent of employees on nonfarm payrolls in 2009. Excludes most agricultural workers on small farms, all Armed Forces, elected officials in most states, railroad employees, most domestic workers, most student workers at school, value of meals and lodging, and tips and other gratuities. Minus sign (-) indicates decrease]

**Table. 650. Workers With Earnings by Occupation of Longest Held Job and Sex: 2009**

[As of March. 72,972 represents 72,972,000. For definition of median, see Guide to Tabular Presentation. Beginning with 2009 income data, the Census Bureau expanded the income intervals used to calculate medians to \$250,000 or more. Medians falling in the upper open-ended interval are plugged with "\$250,000." Before 2009, the upper open-ended interval was \$100,000 and a plug of "\$100,000" was used. Based on Annual Social and Economic Supplement (ASEC) of Current Population Survey; includes Civilian noninstitutional population, 15 years old and over, and military personnel who live in households with at least one other civilian adult. See text, Section 1, and Appendix III]

<sup>1</sup> Employees may have access to both defined benefit and defined contribution plans. Total excludes duplication. <sup>2</sup> A defined benefit plan is a retirement plan that uses a specific, predetermined formula to calculate the amount of an employee's guaranteed future benefit. A defined contribution plan is a type of retirement plan in which the employer makes specified contributions to individual employee accounts, but the amount of the retirement benefit is not specified. <sup>3</sup> Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. <sup>4</sup> See footnote 6, Table 656. <sup>5</sup> The National Compensation Survey—Benefits program presents wage data in percentiles rather than dollar amounts; for calculation detail, see "Technical Note" in source. <sup>6</sup> See Table 632 for composition of goods and service producing industries.  
Source: U.S. Bureau of Labor Statistics, *Employee Benefits in the United States, March 2010*, News Release, USDL 10-1044, July 2010. See also <<http://www.bls.gov/ncs/ebs/home.htm>>.

Table 656. Percent of Workers In Private Industry With Access to Selected Employee Benefits: 2010

[As of March. Based on National Compensation Survey (NCS). The NCS benefits survey obtained data from 9,018 private industry establishments of all sizes, representing over 98 million workers. Excludes agricultural establishments, private households, and the self-employed. An employee has access to a benefit plan if the plan is made available by the employer, regardless of whether the employee participates in the plan. See Appendix III]

Characteristic	Leave benefits					Quality of life benefits			Nonproduction bonuses		
	Paid holidays	Paid sick leave	Paid vacation	Paid jury duty leave	Family leave <sup>1</sup>		Employer assistance for child care <sup>2</sup>	Flexible workplace <sup>3</sup>	Subsidized commuting <sup>4</sup>	All non- production bonuses <sup>5</sup>	End of year bonus
					Paid	Unpaid

NA Not available. Z Less than 0.5 percent. <sup>1</sup> Some workers may have access to both types of plans. <sup>2</sup> A workplace program that provides for either the full or partial cost of caring for an employee's children in a nursery, day care center, or a baby sitter in facilities either on or off the employer's premises. <sup>3</sup> Permits employees to set their own schedules within a general set of parameters. Employees generally are required to work a minimum number of core hours each day. <sup>4</sup> Employers subsidize employees' cost of commuting to and from work via public transportation, company-sponsored van pool, discounted subway fares, for example. <sup>5</sup> All nonproduction bonuses include cash profit sharing bonuses, employee recognition bonuses, holiday bonuses, end of year bonuses, payment in lieu of benefits bonuses referral bonuses, and others bonuses. <sup>6</sup> Employees are classified as working either a full-time or part-time schedule based on the definition used by each establishment. <sup>7</sup> Union workers are those whose wages are determined through collective bargaining. <sup>8</sup> The National Compensation Survey—Benefits program presents wage data in percentiles rather than dollar amounts; see "Technical Note" in source. <sup>9</sup> See Table 632, for composition of goods and service producing industries. <sup>10</sup> Composition of divisions: New England = Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont; Middle Atlantic = New Jersey, New York, and Pennsylvania; East North Central = Illinois, Indiana, Michigan, Ohio, and Wisconsin; West North Central = Iowa, Kansas, Minnesota, Nebraska, North Dakota, and Missouri; South Atlantic = Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia; East South Central = Alabama, Kentucky, Mississippi, and Tennessee; West South Central = Arkansas, Louisiana, Oklahoma, and Texas; Mountain = Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming; and Pacific = Alaska, California, Hawaii, Oregon, and Washington.

<sup>1</sup> See footnote 2, Table 657. <sup>2</sup> See footnote 3, Table 657. <sup>3</sup> Beginning with 2009 data, the concept of medically consulted injury was adopted in place of disabling injury. A medically consulted injury is an injury serious enough that a medical professional was consulted. Medically consulted injuries are not comparable to previous disabling injury estimates. <sup>4</sup> Includes deaths where industry is not known. <sup>5</sup> Includes forestry, fishing, and hunting. <sup>6</sup> Includes oil and gas extraction. <sup>7</sup> For composition of industry, see Table 632. <sup>8</sup> Excludes public service administration.

## Income, Expenditures, Poverty, and Wealth

This section presents data on gross domestic product (GDP), gross national product (GNP), national and personal income, saving and investment, money income, poverty, and national and personal wealth. The data on income and expenditures measure two aspects of the U.S. economy. One aspect relates to the National Income and Product Accounts (NIPA), a summation reflecting the entire complex of the nation's economic income and output and the interaction of its major components; the other relates to the distribution of money income to families and individuals or consumer income.

The primary source for data on GDP, GNP, national and personal income, gross saving and investment, and fixed assets and consumer durables is the *Survey of Current Business*, published monthly by the Bureau of Economic Analysis (BEA). A comprehensive revision to the NIPA was released beginning in July 2009. Discussions of the revision appeared in the March, August, September, October, and November 2009 issues of the *Survey of Current Business*. Summary historical estimates appeared in the August 2009 issue of the *Survey of Current Business*. Detailed historical data can be found on BEA's Web site at <<http://www.bea.gov/>>.

Sources of income distribution data are the decennial censuses of population, the Current Population Survey (CPS), and the American Community Survey, all products of the U.S. Census Bureau (see text, Section 1 and Section 4). Annual data on income of families, individuals, and households are presented in *Current Population Reports, Consumer Income*, P60 Series, in print. Many data series are also found on the Census Web site at <<http://www.census.gov/hhes/www/income/income.html>>. Data on the household sector's saving and assets are published by the Board of Governors of the Federal Reserve System in the quarterly statistical release *Flow of Funds Accounts*. The Federal Reserve Board also

periodically conducts the *Survey of Consumer Finances*, which presents financial information on family assets and net worth. The most recent survey is available at <<http://www.federalreserve.gov/pubs/oss/oss2/scfindex.html>>. Detailed information on personal wealth is published periodically by the Internal Revenue Service (IRS) in *SOI Bulletin*.

### National income and product—

GDP is the total output of goods and services produced by labor and property located in the United States, valued at market prices. GDP can be viewed in terms of the expenditure categories that comprise its major components: personal consumption expenditures, gross private domestic investment, net exports of goods and services, and government consumption expenditures and gross investment. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is the rental value of owner-occupied housing. GDP, in this broad context, measures the output attributable to the factors of production located in the United States. GDP by state is the gross market value of the goods and services attributable to labor and property located in a state. It is the state counterpart of the nation's GDP.

The featured measure of real GDP is an index based on chain-type annual weights. Changes in this measure of real output and prices are calculated as the average of changes based on weights for the current and preceding years. (Components of real output are weighted by price, and components of prices are weighted by output.) These annual changes are "chained" (multiplied) together to form a time series that allows for the effects of changes in relative prices and changes in the composition of output over time. Quarterly and monthly changes are based on quarterly and monthly weights, respectively.

The output indexes are expressed as 2005 = 100, and for recent years, in 2005 dollars; the price indexes are also based to 2005 = 100. For more information on chained-dollar indexes, see the article on this subject in the November 2003 issue of the *Survey of Current Business*.

Chained (2005) dollar estimates of most components of GDP are not published for periods prior to 1990, because during periods far from the base period, the levels of the components may provide misleading information about their contributions to an aggregate. Values are published in index form (2005 = 100) for 1929 to the present to allow users to calculate the percent changes for all components, which are accurate for all periods. In addition, BEA publishes estimates of contributions of major components to the percent change in GDP for all periods.

*Gross national product* measures the output attributable to all labor and property supplied by United States residents. GNP differs from “national income” mainly in that GNP includes allowances for depreciation—that is, consumption of fixed capital.

*National income* includes all net incomes net of consumption of fixed capital (CFC), earned in production. National income is the sum of compensation of employees, proprietors’ income with inventory valuation adjustment (IVA) and capital consumption adjustment (CCAdj), rental income of persons with CCAdj, corporate profits with IVA and CCAdj, net interest and miscellaneous payments, taxes on production and imports, business current transfer payments (net), and current surplus of government enterprises, less subsidies.

*Capital consumption adjustment* for corporations and for nonfarm sole proprietorships and partnerships is the difference between capital consumption based on income tax returns and capital consumption measured using empirical evidence on prices of used equipment and structures in resale markets, which have shown that depreciation for most types of assets approximates a geometric pattern. The tax return data are valued at

historical costs and reflect changes over time in service lives and depreciation patterns as permitted by tax regulations. Inventory valuation adjustment represents the difference between the book value of inventories used up in production and the cost of replacing them.

*Personal income* is the current income received by persons from all sources minus their personal contributions for government social insurance. Classified as “persons” are individuals (including owners of unincorporated firms), nonprofit institutions that primarily serve individuals, private trust funds, and private noninsured welfare funds. Personal income includes personal current transfer receipts (payments not resulting from current production) from government and business such as social security benefits, public assistance, etc., but excludes transfers among persons. Also included are certain nonmonetary types of income chiefly, estimated net rental value to owner-occupants of their homes and the value of services furnished without payment by financial intermediaries. Capital gains (and losses) are excluded.

*Disposable personal income* is personal income less personal current taxes. It is the income available to persons for spending or saving. Personal current taxes are tax payments (net of refunds) by persons (except personal contributions for government social insurance) that are not chargeable to business expense. Personal taxes include income taxes, personal property taxes, motor vehicle licenses, and other miscellaneous taxes.

### **Gross domestic product by**

**industry**—The BEA also prepares estimates of value added by industry. *Value added* is a measure of the contribution of each private industry and of government to the nation’s GDP. It is defined as an industry’s gross output (which consists of sales or receipts and other operating income, commodity taxes, and inventory change) minus its intermediate inputs (which consists of energy, raw materials, semi-finished goods, and services that are purchased from domestic industries or from foreign sources). These estimates of value added are produced for

61 private industries and for 4 government classifications—federal general government and government enterprises and state and local general government and government enterprises.

The estimates by industry are available in current dollars and are derived from the estimates of gross domestic income, which consists of three components—the compensation of employees, gross operating surplus, and taxes on production and imports, less subsidies. Real, or inflation-adjusted, estimates are also prepared.

**Regional Economic Accounts—**

These accounts consist of estimates of state and local area personal income and of gross domestic product by state and are consistent with estimates of personal income and gross domestic product in the Bureau’s national economic accounts. BEA’s estimates of state and local area personal income provide a framework for analyzing individual state and local economies, and they show how the economies compare with each other. The *personal income* of a state and/or local area is the income received by, or on behalf of, the residents of that state or area. Estimates of labor and proprietors’ earnings by place of work indicate the economic activity of business and government within that area, and estimates of personal income by place of residence indicate the income within the area that is available for spending. BEA prepares estimates for states, counties, metropolitan areas, and BEA economic areas.

*Gross domestic product* by state estimates measure the value added to the nation’s production by the labor and property in each state. GDP by state is often considered the state counterpart of the nation’s GDP. The GDP by state estimates provide the basis for analyzing the regional impacts of national economic trends. GDP by state is measured as the sum of the distributions by industry and state of the components of gross domestic income; that is, the sum of the costs incurred and incomes earned in the production of GDP by state. The GDP estimates are presented in current dollars and in real (chained dollars) for 63 industries.

**Consumer Expenditure Survey—**

The Consumer Expenditure Survey program began in 1980. The principal objective of the survey is to collect current consumer expenditure data, which provide a continuous flow of data on the buying habits of American consumers. The data are necessary for future revisions of the Consumer Price Index.

The survey conducted by the Census Bureau for the Bureau of Labor Statistics consists of two components:

(1) an interview panel survey in which the expenditures of consumer units are obtained in five interviews conducted every 3 months, and (2) a diary or recordkeeping survey completed by participating households for two consecutive 1-week periods.

Each component of the survey queries an independent sample of consumer units representative of the U.S. total population. Each quarter of the year, approximately 3,200 consumer units are sampled for the diary survey. Each consumer unit keeps a diary for two 1-week periods yielding approximately 6,400 diaries a year. The interview sample is selected on a rotating panel basis, targeted at 15,000 consumer units. Data are collected in 91 areas of the country that are representative of the U.S. total population. The survey includes students in student housing. Data from the two surveys are combined; integration is necessary to permit analysis of total family expenditures because neither the diary nor quarterly interview survey was designed to collect a complete account of consumer spending.

**Distribution of money income to families and individuals—**

Money income statistics are based on data collected in various field surveys of income conducted since 1936. Since 1947, the Census Bureau has collected the data on an annual basis and published them in *Current Population Reports*, P60 Series. In each of the surveys, field representatives interview samples of the population with respect to income received during the previous year. *Money income* as defined by the Census Bureau differs from the BEA concept of “personal income.” Data on consumer income

collected in the CPS by the Census Bureau cover money income received (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, social security, union dues, medicare deductions, etc. Therefore, money income does not reflect the fact that some families receive part of their income in the form of noncash benefits (see Section 11) such as food stamps, health benefits, and subsidized housing; that some farm families receive noncash benefits in the form of rent-free housing and goods produced and consumed on the farm; or that noncash benefits are also received by some nonfarm residents, which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. None of the aggregate income concepts (GDP, national income, or personal income) is exactly comparable with money income, although personal income is the closest. For a definition of families and households, see text, Section 1.

**Poverty**—Families and unrelated individuals are classified as being above or below poverty following the Office of Management and Budget's Statistical Policy Directive 14. The Census Bureau uses a set of thresholds that vary by family size and composition.

The poverty calculation is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits such as food

stamps, medicaid, and public housing.

The original thresholds were based on the U.S. Department of Agriculture's 1961 Economy Food Plan and reflected the different consumption requirements of families. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index. The following technical changes to the thresholds were made in 1981: (1) distinctions based on sex of householder were eliminated, (2) separate thresholds for farm families were dropped, and (3) the matrix was expanded to families of nine or more persons from the old cutoff of seven or more persons. These changes were incorporated in the calculation of poverty data beginning with 1981. Besides the Census Bureau Web site at <<http://www.census.gov/hhes/www/poverty/poverty.html>>, information on poverty guidelines and research may be found at the U.S. Department of Human Services Web site at <<http://aspe.hhs.gov/poverty/index.shtml>>.

In the recent past, the Census Bureau has published a number of technical papers and reports that presented experimental poverty estimates based on income definitions that counted the value of selected government noncash benefits. The Census Bureau has also published reports on after-tax income.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Census Bureau data, see Appendix III.

Table 667. Gross Domestic Product in Current and Chained (2005) Dollars: 1970 to 2010

[In billions of dollars (1,038 represents \$1,038,000,000,000). For explanation of gross domestic product and chained dollars, see text, this section. Minus sign (-) indicates decline in inventories or net imports]

**Table 676. Government Consumption Expenditures and Gross Investment by Level of Government and Type: 2000 to 2010**

[In billions of dollars (1,731.0 represents \$1,731,000,000,000). Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software). Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures. For explanation of national income and chained dollars, see text, Section 13]

Table 680. Personal Income in Current and Constant (2005) Dollars by State: 2000 to 2010

[In billions of dollars (8,554.9 represents \$8,554,900,000,000). Represents a measure of income received from all sources during the calendar year by residents of each state. Data exclude federal employees overseas and U.S. residents employed by private U.S. firms on temporary foreign assignment. Totals may differ from those in Tables 673, 678, and 679]

<sup>1</sup> Constant dollar estimates are computed by the U.S. Census Bureau using the national implicit price deflator for personal consumption expenditures from the Bureau of Economic Analysis. Any regional differences in the rate of inflation are not reflected in these constant dollar estimates.

2008.....	13,425	17.8	14.8	14.5	16.4	16.2	9.0	11.3	37,769
2009 <sup>3</sup> .....	13,298	16.5	15.2	14.3	15.4	17.6	9.1	11.7	38,039

<sup>1</sup> Includes other races not shown separately. <sup>2</sup> Data reflect implementation of Census 2000-based population controls and a 28,000 household sample expansion to 78,000 households. <sup>3</sup> Median income is calculated using \$2,500 income intervals. Beginning with 2009 income data, the Census Bureau expanded the upper income intervals used to calculate medians to \$250,000 or more. Medians falling in the upper open-ended interval are plugged with “\$250,000.” Before 2009, the upper open-ended interval was \$100,000 and a plug of “\$100,000” was used. <sup>4</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1. <sup>5</sup> Data represent White alone, which refers to people who reported White and did not report any other race category. <sup>6</sup> Data represent Black alone, which refers to people who reported Black and did not report any other race category. <sup>7</sup> Data represent Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>8</sup> People of Hispanic origin may be any race.

**Table 694. Share of Aggregate Income Received by Each Fifth and Top 5 Percent of Households: 1970 to 2009**

[Households as of March of the following year, (64,778 represents 64,778,000). Income in constant 2009 CPI-U-RS-adjusted dollars. The shares method ranks households from highest to lowest on the basis of income and then divides them into groups of equal population size, typically quintiles. The aggregate income of each group is then divided by the overall aggregate income to derive shares. Based on the Current Population Survey, Annual Social and Economic Supplement (ASEC); see text, this section and Section 1, and Appendix III. For data collection changes over time, see <<http://www.census.gov/hhes/www/income/data/historical/history.html>>]

Year	Number of households (1,000)	Income at selected positions in constant (2009) dollars					Percent distribution of aggregate income

<sup>1</sup> Includes other races not shown separately. <sup>2</sup> Data reflect implementation of Census 2000-based population controls and a 28,000 household sample expansion to 78,000 households. <sup>3</sup> Median income is calculated using \$2,500 income intervals. Beginning with 2009 income data, the Census Bureau expanded the upper income intervals used to calculate medians to \$250,000 or more. Medians falling in the upper open-ended interval are plugged with “\$250,000.” Before 2009, the upper open-ended interval was \$100,000 and a plug of “\$100,000” was used. <sup>4</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1. <sup>5</sup> Data represent White alone, which refers to people who reported White and did not report any other race category. <sup>6</sup> Data represent Black alone, which refers to people who reported Black and did not report any other race category. <sup>7</sup> Data represent Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>8</sup> People of Hispanic origin may be any race.

<sup>1</sup> Data reflect full implementation of the 1990 census-based sample design and metropolitan definitions, 7,000 household sample reduction, and revised race edits. <sup>2</sup> Implementation of Census 2000-based population controls. <sup>3</sup> Implementation of a 28,000 household sample expansion. <sup>4</sup> Data have been revised to reflect a correction to the weights in the 2005 ASEC. <sup>5</sup> Median income is calculated using \$2,500 income intervals. Beginning with 2009 income data, the Census Bureau expanded the upper income intervals used to calculate medians to \$250,000 or more. Before 2009, the upper open-ended interval was \$100,000. **Table 701. Median Income of People in Constant (2009) Dollars by Sex, Race, and Hispanic Origin: 1990 to 2009**

[In dollars. People as of March of following year. People 15 years old and over. Constant dollars based on CPI-U-RS deflator. Based on the Current Population Survey, Annual Social and Economic Supplement (ASEC); see text, this section and Section 1 and Appendix III. For data collection changes over time, see <<http://www.census.gov/hhes/www/income/data/historical/history.html>>]

Race and Hispanic Origin	Male					Female				
	1990	2000 <sup>1</sup>	2005 <sup>2</sup>	2008	2009 <sup>3</sup>	1990	2000 <sup>1</sup>	2005 <sup>2</sup>	2008	2009 <sup>3</sup>
All races <sup>4</sup> . . . . .	32,284	35,303	34,362	33,035	32,184	16,020	20,007	20,410	20,788	20,957
White <sup>5</sup> . . . . .	33,680	37,114	35,355	34,987	33,748	16,413	20,027	20,512	20,870	21,118
Black <sup>6</sup> . . . . .	20,472	26,584	24,889	25,158	23,738	13,249	19,781	19,371	20,120	19,470
Asian <sup>7</sup> . . . . .	(NA)	(NA)	37,592	36,468	37,330	(NA)	(NA)	23,777	23,021	24,343
Hispanic <sup>8</sup> . . . . .	21,430	24,286	24,269	23,912	22,256	11,983	15,256	16,520	16,355	16,210
White non-Hispanic . . . .	34,933	39,245	38,834	37,267	36,785	16,833	20,757	21,371	21,666	21,939

NA Not available. <sup>1</sup> Implementation of Census 2000-based population controls and sample expanded by 28,000 households. <sup>2</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2005 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1. <sup>3</sup> Median income is calculated using \$2,500 income intervals. Beginning with 2009 income data, the Census Bureau expanded the upper income intervals used to calculate medians to \$250,000 or more. Before 2009, the upper open-ended interval was \$100,000. <sup>4</sup> Includes other races not shown separately. <sup>5</sup> Beginning with 2005, data represent White alone, which refers to people who reported White and did not report any other race category. <sup>6</sup> Beginning with 2005, data represent Black alone, which refers to people who reported Black and did not report any other race category. <sup>7</sup> Beginning with 2005, data represent Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>8</sup> People of Hispanic origin may be any race. Source: U.S. Census Bureau, *Income, Poverty and Health Insurance Coverage in the United States: 2009*, Current Population Reports, P60-238, and Historical Tables—Table P-2, September 2010. Table 702. Money Income of People—Selected Characteristics by Income Level: 2009

[People as of March 2010 (117,728 represents 117,728,000). Covers people 15 years old and over. Median income in constant dollars based on CPI-U-RS deflator. For definition of median, see Guide to Tabular Presentation. Median income is calculated using \$2,500 income intervals. Beginning with 2009 income data, the Census Bureau expanded the upper income intervals used to calculate medians to \$250,000 or more. Medians falling in the upper open-ended interval are plugged with "\$250,000." Before 2009, the upper open-ended interval was \$100,000 and a plug of "\$100,000" was used. For composition of regions, see map, inside front cover. Based on the Current Population Survey, Annual Social and Economic Supplement (ASEC), see Appendix III]

Characteristic	All persons (1,000)	Total (1,000)	People with income								Median income (current dollars)
			Under \$5,000 <sup>1</sup>	Number (1,000)						\$75,000 and over	
				\$5,000 to \$9,999	\$10,000 to \$14,999	\$15,000 to \$24,999	\$25,000 to \$34,999	\$35,000 to \$49,999	\$50,000 to \$74,999

NA Not available. <sup>1</sup> Includes other races, not shown separately. <sup>2</sup> Beginning with 2003, data represents White alone, which refers to people who reported White and did not report any other race category. <sup>3</sup> Beginning with 2003, data represents Black alone, which refers to people who reported Black and did not report any other race category. <sup>4</sup> Beginning with 2003, data represents Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>5</sup> People of Hispanic origin may be any race. <sup>6</sup> Data reflect full implementation of the 1990 census-based sample design and metropolitan definitions, 7,000 household sample reduction, and revised race edits. <sup>7</sup> Implementation of Census 2000-based population controls. <sup>8</sup> Implementation of a 28,000 household sample expansion. <sup>9</sup> See footnote 4, Table 696. See also comments on race in the text for Section 1. <sup>10</sup> Data have been revised to reflect a correction to the weights in the 2005 ASEC. <sup>11</sup> Median income is calculated using \$2,500 income intervals. Beginning with 2009 income data, the Census Bureau expanded the upper income intervals used to calculate medians to \$250,000 or more. Before 2009, the upper open-ended interval was \$100,000.

**Table 709. Individuals and Families Below Poverty Level—Number and Rate by State: 2000 and 2009**

[In thousands (33,311 represents 33,311,000), except as indicated. Represents number and percent below poverty in the past 12 months. Prior to 2006, the American Community Survey universe was limited to the household population and excluded the population living in institutions, college dormitories, and other group quarters. Poverty status was determined for all people except institutionalized people, people in military group quarters, people in college dormitories, and unrelated individuals under 15 years old. These groups were excluded from the numerator and denominator when calculating poverty rates. Based on a sample and subject to sampling variability; see Appendix III]

State	Number below poverty (1,000)				Percent below poverty

NA Not available. <sup>1</sup> Includes those in poverty, plus those who have income above poverty but less than 1.25 times their poverty threshold. <sup>2</sup> Includes other races, not shown separately. <sup>3</sup> Beginning 2002, data represent White alone, which refers to people who reported White and did not report any other race category. <sup>4</sup> Beginning 2002, data represent Black alone, which refers to people who reported Black and did not report any other race category. <sup>5</sup> Beginning 2002, data represent Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>6</sup> People of Hispanic origin may be any race. <sup>7</sup> Implementation of 1990 census population controls. <sup>8</sup> The March 1994 income supplement was revised to allow for the coding of different income amounts on selected questionnaire items. Limits either increased or decreased in the following categories: earnings increased to \$999,999; social security increased to \$49,999; supplemental security income and public assistance increased to \$24,999; veterans' benefits increased to \$99,999; child support and alimony decreased to \$49,999. <sup>9</sup> Implementation of Census-2000-based population controls. <sup>10</sup> Implementation of sample expansion by 28,000 households. <sup>11</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1. <sup>12</sup> Data have been revised to reflect a correction to the weights in the 2005 ASEC.

NA Not available. <sup>1</sup> See footnote 1, Table 711. <sup>2</sup> Includes other races, not shown separately. <sup>3</sup> Beginning 2002, data represent White alone, which refers to people who reported White and did not report any other race category. <sup>4</sup> Beginning 2002, data represent Black alone, which refers to people who reported Black and did not report any other race category. <sup>5</sup> Beginning 2002, data represent Asian alone, which refers to people who reported Asian and did not report any other race category. <sup>6</sup> People of Hispanic origin may be any race. <sup>7</sup> Implementation of a 28,000 household sample expansion. <sup>8</sup> Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population. <sup>9</sup> Data have been revised to reflect a correction to the weights in the 2005 Annual Social and Economic Supplement (ASEC).

Table 719. Top Wealth Holders With Net Worth of \$1.5 Million or More—Number and Net Worth by State: 2004

[2,196 represents 2,196,000. Estimates based on a sample of federal estate tax returns (Form 706). Estimates of wealth by state can be subject to significant year-to-year fluctuations and this is especially true for individuals at the extreme tail of the net worth distribution and for states with relatively small decedent populations. Based on the estate multiplier technique; for more information on this methodology, see source]

State	Number of top wealth holders (1,000)	Net worth (mil. dol.)	State	Number of top wealth holders (1,000)	Net worth (mil. dol.)

## Section 14

# Prices

---

The Prices section contains producer and consumer prices indexes and actual prices for selected commodities. The primary sources of the data are monthly publications of the U.S. Department of Labor, Bureau of Labor Statistics (BLS), which include *Monthly Labor Review*, *Consumer Price Index, Detailed Report*, *Producer Price Indexes*, and *U.S. Import and Export Price Indexes*. The Bureau of Economic Analysis is the source for gross domestic product measures. Cost of living data for many urban and metropolitan areas are provided by The Council for Community and Economic Research, a private organization in Arlington, VA. Table 728 on housing price indexes appears in this edition from the Office of Federal Housing Enterprise Oversight, *Housing Price Index*. Other commodity, housing, and energy prices may be found in the Energy and Utilities; Forestry, Fishing and Mining; and Construction and Housing sections.

Most price data is measured by an index. An index is a tool that simplifies the measurement of movements in a numerical series. An index allows you to properly compare two or more values in different time periods or places by comparing both to a base year. An index of 110, for example, means there has been a 10-percent increase in price since the reference period; similarly, an index of 90 means a 10-percent decrease. Movements of the index from one date to another can be expressed as changes in index points (simply, the difference between index levels), but it is more useful to express the movements as percent changes. This is because index points are affected by the level of the index in relation to its reference period, while percent changes are not.

**Consumer price indexes (CPI)**—The CPI is a measure of the average change in prices over time in a “market basket” of goods and services purchased either by urban wage earners and clerical workers or by all urban consumers. The all urban consumer group represents 87 percent of the total U.S. population and is based

on the expenditures residents of urban or metropolitan areas, including professionals, the self-employed, the poor, the unemployed, and retired people, as well as urban wage earners and clerical workers. Not included in the CPI are the spending patterns of people living in rural nonmetropolitan areas, farm families, people in the Armed Forces, and those in institutions, such as prisons and mental hospitals. Consumer inflation for all urban consumers is measured by two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Chained Consumer Price Index for All Urban Consumers (C-CPI-U). The broadest and most comprehensive CPI is called the All Items Consumer Price Index for All Urban Consumers (CPI-U) for the U.S. City Average. All CPI's in this section have a base of 1982–84 = 100.

The CPI is a product of a series of inter-related samples. Data from the 1990 Census of Population determines the urban areas from which data on prices are collected and the housing units within each area that are eligible for use in the shelter component of the CPI. The Census of Population also provides data on the number of consumers represented by each area selected as a CPI price collection area. A sample (of about 14,500 families each year) serves as the basis for a Point-of-Purchase Survey that identified the places where households purchased various types of goods and services. The CPI market basket is developed from detailed expenditure information provided by families and individuals on what they actually bought. In calculating the index, each item is assigned a weight to account for its relative importance in consumers' budgets. Price changes for the various items in each location are then averaged and local data are combined to obtain a U.S. city average. For the current CPI, this information was collected from the Consumer Expenditure Surveys for 2007 and 2008. In each of those years, about 7,000 families from around the country provided information each quarter on their spending habits

in the interview survey. To collect information on frequently purchased items, such as food and personal care products, another 7,000 families in each of these years kept diaries listing everything they bought during a 2-week period. Over the 2 year period, then, expenditure information came from approximately 28,000 weekly diaries and 60,000 quarterly interviews used to determine the importance, or weight, of the more than 200 item categories in the CPI index structure.

The CPI represents all goods and services purchased for consumption by the reference population. BLS has classified all expenditure items into more than 200 categories, arranged into eight major groups which are food and beverages, housing, apparel, transportation, medical care, recreation, education and communication, and other goods. The CPI does not include investment items, such as stocks, bonds, real estate, and life insurance. (These items relate to savings and not to day-to-day consumption expenses.)

**Producer price index (PPI)**— Dating from 1890, the PPI is the oldest continuous statistical series published by BLS. The PPI is a family of indexes that measures the average change over time in the selling prices received by domestic producers of goods and services. Imports are excluded. The target set of goods and services included in the PPI is the entire marketed output of U.S. producers. The set includes both goods and services purchased by other producers as inputs to their operations or as capital investment, as well as goods and services purchased by consumers either directly from the service producer or indirectly from a retailer. Over 10,000 PPIs for individual products and groups of products are released each month.

Prices used in constructing the index are collected from sellers and generally apply to the first significant large-volume commercial transaction for each commodity. The weights used in the index represent the total net selling value of commodities produced or processed in this country. Most producer price indexes have a reference base year of 1982 = 100. The reference year of the PPI shipment weights has been taken primarily from the 2002

Census of Manufactures. For further detail regarding the PPI, see the *BLS Handbook of Methods*, Bulletin 2490 (June 2008), Chapter 14. The PPI Web page is <<http://www.bls.gov/ppi/>>.

**BEA price indexes**—BEA chain-weighted price indexes are weighted averages of the detailed price indexes used in the deflation of the goods and services that make up the gross domestic product (GDP) and its major components. Growth rates are constructed for years and quarters using quantity weights for the current and preceding year or quarter; these growth rates are used to move the index for the preceding period forward a year or quarter at a time. All chain-weighted price indexes are expressed in terms of the reference year value 2005 = 100.

Personal consumption expenditures (PCE) price and quantity indexes are based on market transactions for which there are corresponding price measures. The price index provides a measure of the prices paid by persons for domestic purchases of goods and services. PCEs are defined as market value of spending by individuals and not-for-profit institutions on all goods and services. Personal consumption expenditures also include the value of certain imputed goods and services—such as the rental value of owner-occupied homes and compensation paid in kind—such as employer-paid health and life insurance premiums. More information on this index may be found at <[http://www.bea.gov/bea/mp\\_National.htm](http://www.bea.gov/bea/mp_National.htm)>.

**Measures of inflation**—Inflation is a period of rising price levels for goods and factors of production. Inflation results in a decline in the purchasing power of the dollar. It is suggested that changes in price levels be compared from the same month of the prior year and not as a change from the prior month. The BLS offers several indexes that measure different aspects of inflation, three of which are included in this section. The CPI measures inflation as experienced by consumers in their day-to-day living expenses. The PPI measures prices at the producer level only. The International Price Program measures change in the prices of imports and exports of nonmilitary goods between the United States and other countries.

Whereas the CPI and PPI measure a benchmark approach to price levels, the BEA's Personal Consumption Expenditures uses a chain-weight approach which links weighted averages from adjoining years.

Other measures of inflation include the futures price and spot market price indexes from the Commodity Research Bureau and the employment cost, hourly compensation, and unit labor cost indexes from the BLS. Found in Section 12, Labor Force, Employment, and Earnings, these BLS indexes are used as a measure of the change in cost of the labor factor of production and changes in long-term interest rates that are often used to measure changes in the cost of the capital factor of production.

**International price indexes**—The BLS International Price Program produces export and import price indexes for non-military goods traded between the United States and the rest of the world.

The export price index provides a measure of price change for all products sold

by U.S. residents to foreign buyers. The import price index provides a measure of price change for goods purchased from other countries by U.S. residents. The reference period for the indexes is 2005 = 100, unless otherwise indicated. The product universe for both the import and export indexes includes raw materials, agricultural products, semifinished manufactures, and finished manufactures, including both capital and consumer goods. Price data for these items are collected primarily by mail questionnaire. In nearly all cases, the data are collected directly from the exporter or importer.

To the extent possible, the data gathered refer to prices at the U.S. border for exports and at either the foreign border or the U.S. border for imports. For nearly all products, the prices refer to transactions completed during the first week of the month. Survey respondents are asked to indicate all discounts, allowances, and rebates applicable to the reported prices, so that the price used in the calculation of the indexes is the actual price for which the product was bought or sold.

**Table 724. Purchasing Power of the Dollar: 1950 to 2010**

[Indexes: PPI, 1982 = \$1.00; CPI, 1982-84 = \$1.00. Producer prices prior to 1961, and consumer prices prior to 1964, exclude Alaska and Hawaii. Producer prices based on finished goods index. Obtained by dividing the average price index for the 1982 = 100, PPI; 1982-84 = 100, CPI base periods (100.0) by the price index for a given period and expressing the result in dollars and cents. Annual figures are based on average of monthly data]

**Table 726. Annual Percent Changes From Prior Year in Consumer Price Indexes (CPI-U)—Selected Areas: 2010**

[Percent changes computed from annual averages of monthly figures published by source. Local area CPI indexes are by-products of the national CPI program. Each local index has a smaller sample size than the national index and is therefore subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Area definitions are those established by the Office of Management and Budget in 1983. For further detail, see the U.S. Bureau of Labor Statistics Handbook of Methods, Bulletin 2285, Chapter 19, the Consumer Price Index, and Report 751, the CPI: 1987 Revision. Minus sign (–) indicates decrease. See also text, this section and Appendix III]

**Table 728. Cost of Living Index—Selected Urban Areas, Annual Average: 2010**

[Data are for a selected urban area within the larger metropolitan area shown. Measures relative price levels for consumer goods and services in participating areas for a mid-management standard of living. The nationwide average equals 100 and each index is read as a percent of the national average. The index does not measure inflation, but compares prices at a single point in time. Excludes taxes. Metropolitan areas as defined by the Office of Management and Budget. For definitions, urban areas, and components of MSAs, see source. Beginning February 2008, data are based on an annual average survey compiled from data submitted in the first 3 quarters of the year. To calculate the annual average index, actual and estimated prices are collected to calculate an annual average price for each item used to represent the various spending categories. The share of consumer spending devoted to the category determines that category's importance, or weight, in the Index. Weights are based on the Bureau of Labor Statistics' 2009 Consumer Expenditure Survey]

Urban area	Composite index (100%)	Grocery items (13%)	Housing (29%)	Utilities (10%)	Transportation (12%)	Health care (4%)	Misc. goods and services (32%)

Table 729. Single-Family Housing Price Indexes by State: 2000 to 2010

[Index 1991, 1st quarter = 100. Data are seasonally adjusted. The index reflects average price changes in repeat sales or refinancings on the same properties. Since the data are for the fourth quarter, the index represents the annual percentage change in home values in the fourth quarter of the year shown relative to the fourth quarter of the previous year. The information is obtained by reviewing repeat mortgage transactions on single-family properties whose mortgages have been purchased or securitized by either Fannie Mae or Freddie Mac; for more information on methodology, see Appendix III. Minus sign (–) indicates decrease]

Household glassware .....	132.5	153.2	166.0	174.7	177.0	190.7	198.1	200.2
Household flatware .....	122.1	138.3	142.6	147.7	186.8	194.7	193.0	(NA)
Lawn and garden equipment, except tractors .....	123.0	130.4	132.0	134.5	137.0	140.4	142.3	141.9
Passenger cars .....	118.3	134.1	132.8	131.8	126.2	128.9	130.9	129.0
Toys, games, and children's vehicles .....	118.1	124.3	121.9	127.0	131.0	134.3	143.1	140.7
Sporting and athletic goods .....	112.6	122.0	126.1	124.6	129.9	129.8	132.2	133.6
Tobacco products .....	221.4	231.3	397.2	457.8	489.1	508.8	539.3	570.5
Mobile homes .....	117.5	145.6	161.3	200.8	211.0	218.7	222.3	228.5
Jewelry, platinum, and karat gold .....	122.8	127.8	127.2	138.6	153.2	164.7	169.7	187.5
Costume jewelry and novelties .....	125.3	135.1	141.6	153.5	156.7	159.6	158.7	158.9
<b>Capital Equipment</b> .....	<b>122.9</b>	<b>136.7</b>	<b>138.8</b>	<b>144.6</b>	<b>149.5</b>	<b>153.8</b>	<b>156.7</b>	<b>157.3</b>
Agricultural machinery and equipment .....	121.7	142.9	153.7	174.7	184.3	192.9	199.9	203.4
Construction machinery and equipment .....	121.6	136.7	148.6	168.3	179.6	185.3	191.0	191.4
Metal cutting machine tools .....	129.8	148.0	161.9	155.1	165.8	170.3	173.8	174.6
Metal forming machine tools .....	128.7	145.7	161.8	178.9	184.4	192.5	198.5	200.3
Pumps, compressors, and equipment .....	119.2	139.4	154.1	178.5	195.0	205.4	212.6	214.9
Electronic computers (Dec. 2004 = 100) .....	(NA)	850.1	261.6	85.5	51.6	40.8	34.0	30.3
Textile machinery .....	128.8	146.7	156.2	160.5	162.5	164.9	166.3	166.0
Paper industries machinery (June 1982 = 100) .....	134.8	151.0	164.7	178.1	183.4	188.5	193.7	197.2
Printing trades machinery .....	124.9	133.6	142.1	144.3	150.5	152.7	157.1	155.4
Transformers and power regulators .....	120.9	128.9	135.8	150.3	194.9	216.2	210.6	223.0
Communication/related equip.(Dec. 1985 = 100) .....	106.1	112.1	110.6	102.5	103.2	104.8	105.7	105.8
X-ray and electromedical equipment .....	109.8	111.8	101.5	95.7	92.8	91.6	90.1	89.5
Mining machinery and equipment .....	121.0	135.6	146.1	175.9	190.9	205.8	217.3	221.5
Office and store machines and equipment .....	109.5	111.5	112.7	115.1	114.6	122.1	123.5	121.0
Commercial furniture .....	133.4	148.2	158.4	172.7	181.5	190.1	196.1	196.3
Light motor trucks .....	130.0	159.0	157.6	148.4	145.3	146.0	151.8	153.3
Heavy motor trucks .....	120.3	144.1	148.0	162.4	177.2	182.2	190.3	195.7
Truck trailers .....	110.8	131.7	139.4	157.1	169.4	177.0	177.7	181.5
Civilian aircraft (Dec. 1985 = 100) .....	115.3	141.8	159.6	202.2	219.6	230.2	235.4	238.0
Ships (Dec. 1985 = 100) .....	110.1	132.8	146.9	176.6	192.1	199.4	210.0	215.2
Railroad equipment .....	118.6	134.8	135.7	160.4	176.4	180.2	181.9	184.4
<b>Intermediate materials, supplies, and components</b> .....	<b>114.5</b>	<b>124.9</b>	<b>129.2</b>	<b>154.0</b>	<b>170.7</b>	<b>188.3</b>	<b>172.5</b>	<b>183.6</b>
<b>Intermediate foods and feeds</b> .....	<b>113.3</b>	<b>114.8</b>	<b>111.7</b>	<b>133.8</b>	<b>154.4</b>	<b>181.6</b>	<b>166.0</b>	<b>171.8</b>
Flour .....	103.6	123.0	103.8	133.6	178.4	239.8	182.9	183.7
Refined sugar .....	122.7	119.3	110.6	124.9	132.6	137.2	157.8	185.4
Soft drink beverage bases (December 1985 = 100) .....	126.2	148.3	167.1	180.4	196.0	210.3	223.5	223.1
Prepared animal feeds .....	107.4	109.1	102.9	115.6	142.7	182.7	175.2	171.6

See footnotes at end of table.

**Table 737. Producer Price Indexes by Stage of Processing and Commodity:**  
**1990 to 2010—Con.**

[1982=100, except as indicated. See Appendix III]

Stage of processing	1990	1995	2000	2005	2007	2008	2009	2010 <sup>1</sup>
<b>Intermediate materials less foods and feeds . . . . .</b>	<b>114.5</b>	<b>125.5</b>	<b>130.1</b>	<b>155.1</b>	<b>171.5</b>	<b>188.7</b>	<b>173.0</b>	<b>184.5</b>
Synthetic fibers . . . . .	106.7	109.4	107.2	112.3	114.2	116.5	113.3	111.5
Processed yarns and threads . . . . .	112.6	112.8	107.9	111.7	116.9	123.7	119.9	128.0
Leather . . . . .	177.5	191.4	182.2	219.6	230.6	234.3	221.1	232.3
Liquefied petroleum gas . . . . .	77.4	65.1	127.1	244.7	316.1	375.9	224.7	309.8
Commercial electric power . . . . .	115.3	131.7	131.5	149.8	165.4	173.3	178.6	183.3
Industrial electric power. . . . .	119.6	130.8	131.5	156.2	180.4	189.1	190.6	193.3
Commercial natural gas (Dec. 1990 = 100). . . . .	(NA)	96.5	134.7	232.5	235.6	272.1	211.9	208.6
Industrial natural gas (Dec. 1990 = 100) . . . . .	(NA)	90.9	139.0	249.4	242.3	283.1	210.2	202.2
Natural gas to electric utilities (Dec. 1990 = 100) . . . . .	(NA)	87.7	120.7	204.0	186.0	203.4	164.0	174.9
Jet fuels . . . . .	76.0	55.0	88.5	169.6	211.2	300.1	169.3	225.3
No. 2 Diesel fuel. . . . .	74.1	57.0	93.3	189.1	235.5	324.9	180.6	233.2
Residual fuel . . . . .	57.7	52.6	84.7	148.9	173.4	229.7	156.6	213.3
Industrial chemicals. . . . .	113.2	128.4	129.1	188.5	226.4	274.6	234.1	268.7
Prepared paint. . . . .	124.8	142.1	160.8	187.9	208.8	223.0	236.4	236.8
Fats and oils, inedible . . . . .	88.1	126.9	70.1	146.9	189.4	288.3	210.3	243.7
Mixed fertilizers . . . . .	103.3	111.1	112.4	138.9	161.2	249.2	192.8	177.3
Plastic resins and materials. . . . .	124.1	143.5	141.6	193.0	195.9	215.0	190.8	211.8
Synthetic rubber . . . . .	111.9	126.3	119.1	151.3	169.3	206.6	185.9	215.8
Plastic construction products. . . . .	117.2	133.8	135.8	158.8	179.2	185.6	186.2	190.8
Unsupported plastic film, sheet, and shapes. . . . .	119.0	135.6	133.2	164.8	176.0	194.2	191.7	200.5
Plastic parts and components for manufacturing . . . . .	112.9	115.9	117.3	119.8	130.0	132.8	135.8	135.7
Softwood lumber . . . . .	123.8	178.5	178.6	203.6	170.5	156.3	141.4	160.9
Hardwood lumber . . . . .	131.0	167.0	185.9	196.6	192.4	184.5	171.2	187.3
Plywood. . . . .	114.2	165.3	157.6	186.8	176.1	174.7	163.7	176.5
Paper. . . . .	128.8	159.0	149.8	159.6	169.3	184.3	179.6	182.2
Paperboard . . . . .	135.7	183.1	176.7	175.5	201.7	217.9	207.2	225.3
Paper boxes and containers . . . . .	129.9	163.8	172.6	183.7	197.8	208.3	211.9	219.6
Building paper and board . . . . .	112.2	144.9	138.8	184.9	155.2	163.9	156.5	168.2
Commercial printing (June 1982 = 100) . . . . .	128.0	144.5	155.2	161.6	166.0	169.2	167.8	168.2
Foundry and forge shop products . . . . .	117.2	129.3	136.5	156.2	170.7	189.6	185.2	191.4
Primary nonferrous metals . . . . .	133.4	146.8	113.6	158.2	268.6	269.1	177.6	209.2
Nonferrous wire and cable. . . . .	142.6	151.5	143.7	169.4	238.7	249.2	222.4	257.7
Metal containers . . . . .	114.0	117.2	106.8	123.9	133.4	144.0	155.4	159.7
Hardware. . . . .	125.9	141.1	151.2	168.0	179.7	189.9	194.0	194.0
Plumbing fixtures and brass fittings. . . . .	144.3	166.0	180.4	197.6	220.6	226.7	228.9	231.4
Heating equipment . . . . .	131.6	147.5	155.6	179.9	195.5	208.8	219.1	221.4
Fabricated ferrous wire products (June 1982 = 100). . . . .	114.6	125.7	130.0	157.1	166.7	200.7	200.0	203.5
Mechanical power transmission equipment. . . . .	125.3	146.9	163.9	189.5	205.2	219.7	231.0	232.0
Air conditioning and refrigeration equipment. . . . .	122.1	130.2	135.3	146.2	157.3	162.7	164.7	163.8
Ball and roller bearings . . . . .	130.6	152.0	168.8	187.1	199.8	211.9	222.8	227.0
Wiring devices . . . . .	132.2	147.2	152.9	176.6	194.5	206.4	206.8	211.3
Motors, generators, motor generator sets . . . . .	132.9	143.9	146.2	157.8	172.9	181.7	187.0	190.6
Switchgear and switchboard equipment . . . . .	124.4	140.3	153.0	170.2	188.5	195.5	201.0	205.5
Electronic components and accessories . . . . .	118.4	113.6	97.1	87.0	82.3	77.0	75.4	73.4
Internal combustion engines . . . . .	120.2	135.6	143.8	147.7	154.7	157.2	162.3	161.9
Flat glass . . . . .	107.5	113.2	109.7	111.0	114.2	115.9	115.0	111.3
Cement . . . . .	103.7	128.1	150.1	176.4	209.7	209.7	206.8	193.9
Concrete products. . . . .	113.5	129.4	147.8	177.2	203.5	210.6	214.0	210.8
Asphalt felts and coatings . . . . .	97.1	100.0	104.1	130.8	145.7	187.2	220.6	222.7
Gypsum products . . . . .	105.2	154.5	201.4	229.6	233.0	213.2	213.8	206.8
Glass containers . . . . .	120.4	130.5	127.4	146.4	162.0	171.8	178.7	181.2
Motor vehicle parts . . . . .	111.2	116.0	113.6	113.1	117.9	119.7	120.7	121.7
Aircraft engines and engine parts (Dec. 1985 = 100) . . . . .	113.5	132.8	141.0	165.9	178.9	185.9	193.1	197.5
Photographic supplies. . . . .	127.6	126.8	125.2	120.1	122.9	125.5	127.8	124.4
Medical/surgical/personal aid devices. . . . .	127.3	141.3	146.0	159.2	163.1	165.7	167.5	168.7
<b>Crude materials for further processing. . . . .</b>	<b>108.9</b>	<b>102.7</b>	<b>120.6</b>	<b>182.2</b>	<b>207.1</b>	<b>251.8</b>	<b>175.2</b>	<b>212.0</b>
Crude foodstuffs and feedstuffs. . . . .	113.1	105.8	100.2	122.7	146.7	163.4	134.5	152.3
Wheat . . . . .	87.6	118.6	80.3	102.7	172.1	235.1	149.3	157.4
Corn. . . . .	100.9	109.0	76.4	75.9	141.5	199.1	146.9	160.8
Slaughter cattle . . . . .	122.5	99.5	104.1	131.5	136.1	136.1	122.0	139.8
Slaughter hogs . . . . .	94.1	70.2	72.7	82.7	76.1	78.1	68.9	92.6
Slaughter broilers/fryers . . . . .	119.5	129.1	127.6	181.0	199.9	210.7	202.6	221.3
Slaughter turkeys. . . . .	116.9	120.3	120.7	131.1	153.3	165.9	146.7	173.0
Fluid milk . . . . .	100.8	93.6	92.0	113.5	143.3	137.2	95.9	121.5
Soybeans. . . . .	100.8	102.2	83.4	102.6	137.9	203.9	175.9	177.1
Crude nonfood materials . . . . .	101.5	96.8	130.4	223.4	246.3	313.9	197.5	249.0
Raw cotton. . . . .	118.2	156.2	95.2	78.9	83.1	98.0	82.6	118.3
Coal. . . . .	97.5	95.0	87.9	116.8	130.7	161.7	182.5	189.4
Natural gas . . . . .	80.4	66.6	155.5	335.4	273.8	344.0	160.0	185.1
Crude petroleum . . . . .	71.0	51.1	85.2	150.1	192.6	275.7	161.7	218.5
Logs and timber. . . . .	142.8	220.4	196.4	197.4	217.1	216.7	187.8	213.8
Wastepaper . . . . .	138.9	371.1	282.5	230.9	368.7	372.5	237.0	420.2
Iron ore . . . . .	83.3	91.8	94.8	116.9	128.8	142.5	145.0	147.0
Iron and steel scrap. . . . .	166.0	202.7	142.1	289.8	406.8	566.8	338.1	541.5
Nonferrous metal ores (Dec. 1983 = 100) . . . . .	98.3	101.6	68.0	150.0	243.5	251.0	215.4	296.8
Copper base scrap . . . . .	181.3	193.5	123.7	258.6	485.2	494.3	375.4	553.2
Aluminum base scrap . . . . .	172.6	209.4	177.0	210.1	274.7	272.8	166.8	240.5
Construction sand, gravel, and crushed stone . . . . .	125.4	142.3	163.1	195.8	232.4	247.7	259.1	262.2
Industrial sand. . . . .	117.6	132.5	146.0	174.4	190.9	217.7	238.1	239.4

**Table 738. Producer Price Indexes for the Net Output of Selected Industries: 2005 to 2010**

[Indexes are based on selling prices reported by establishments of all sizes by probability sampling. Manufacturing industries selected by shipment value. N.e.c.= not elsewhere classified. See text, Section 22. See Appendix III]

Industry	NAICS code <sup>1</sup>	Index base <sup>2</sup>	2005	2007	2008	2009	2010 <sup>3</sup>
<b>Logging industries</b> . . . . .	<b>113310</b>	<b>12/81</b>	<b>179.2</b>	<b>175.1</b>	<b>171.6</b>	<b>160.4</b>	<b>177.5</b>
<b>Total mining industries</b> . . . . .	<b>21</b>	<b>12/84</b>	<b>201.0</b>	<b>220.1</b>	<b>274.7</b>	<b>178.2</b>	<b>214.7</b>
Crude petroleum & natural gas extraction . . . . .	211111	06/02	253.5	261.5	349.2	187.6	238.3
Natural gas liquid extraction . . . . .	211112	06/02	285.4	286.7	347.6	188.5	251.3
Bituminous coal & lignite surface mining . . . . .	212111	12/01	111.9	120.9	140.4	149.1	156.7
Anthracite mining . . . . .	212113	12/79	205.4	240.9	267.0	275.4	269.2
Iron ore mining . . . . .	212210	12/84	115.7	127.5	141.0	143.5	145.5
Gold ore mining . . . . .	212221	06/85	131.7	203.0	208.9	236.3	300.4
Copper ore & nickel ore mining . . . . .	212234	06/88	200.8	397.8	401.7	297.1	414.3
Crushed and broken granite mining and quarrying . . . . .	212313	12/83	217.3	279.3	305.1	329.1	329.5
Construction sand and gravel mining . . . . .	212321	06/82	209.9	247.0	262.6	271.1	271.1
Clay and ceramic and refractory minerals mining . . . . .	212325	06/84	148.3	163.4	174.2	184.5	188.7
Drilling oil and gas wells . . . . .	213111	12/85	258.8	360.6	366.9	328.2	324.4
Nonmetallic minerals support activity (except fuels) . . . . .	213115	06/85	127.5	140.2	146.0	148.7	148.7
<b>Total manufacturing industries</b> . . . . .	<b>31-33</b>	<b>12/84</b>	<b>150.8</b>	<b>162.9</b>	<b>175.8</b>	<b>167.1</b>	<b>175.4</b>
Dog & cat food mfg . . . . .	311111	12/85	145.8	155.2	175.3	186.2	186.5
Flour milling . . . . .	311211	06/83	117.5	153.9	202.8	160.9	162.2
Rice milling . . . . .	311212	06/84	102.1	129.2	209.6	170.8	152.5
Chocolate & confectionery mfg. from cacao beans . . . . .	311320	06/83	157.5	166.0	181.1	194.0	198.4

Ice cream and frozen dessert mfg . . . . .	311520	06/83	168.2	177.7	184.5	186.1	187.3
Animal (except poultry) slaughtering . . . . .	311611	12/80	141.0	142.7	149.6	135.1	157.3
Meat processed from carcasses . . . . .	311612	12/82	136.6	139.5	144.7	144.2	153.3
Poultry processing . . . . .	311615	12/81	135.3	139.5	145.0	148.3	150.0
Coffee and tea manufacturing . . . . .	311920	06/81	161.0	173.8	189.4	191.8	199.1
Spice and extracts manufacturing . . . . .	311942	12/03	99.1	102.3	108.5	115.0	115.2
Soft drinks manufacturing . . . . .	312111	06/81	168.6	177.4	186.4	194.3	197.1
Bottled water manufacturing . . . . .	312112	12/03	101.5	99.4	98.9	97.0	91.2
Breweries . . . . .	312120	06/82	158.4	156.0	163.0	(NA)	177.2
Wineries . . . . .	312130	12/83	144.8	155.7	159.3	162.3	161.8
Distilleries . . . . .	312140	06/83	165.5	175.3	187.2	188.5	185.9
Tobacco stemming & redrying . . . . .	312210	06/84	119.9	112.6	113.4	115.2	115.9
Cigarettes . . . . .	312221	12/82	437.0	470.2	489.5	520.8	553.9
Men's/boys' cut & sew trouser/slack/jean mfg . . . . .	315224	12/81	123.2	122.3	122.9	123.9	123.9
Women's/girls' cut & sew dress mfg . . . . .	315233	12/80	123.7	120.8	123.0	124.6	123.7
Sawmills . . . . .	321113	12/80	162.0	152.0	143.5	124.9	140.0
Wood preservation . . . . .	321114	06/85	175.7	163.8	165.6	162.0	171.8
Hardwood veneer & plywood manufacturing . . . . .	321211	06/85	146.2	151.1	153.0	151.5	152.3
Softwood veneer or plywood, mfg . . . . .	321212	12/80	172.7	154.9	150.8	135.6	152.9
Wood window & door mfg . . . . .	321911	12/03	103.1	107.3	107.7	109.2	110.5
Manufactured homes (mobile homes) mfg . . . . .	321991	06/81	204.4	214.7	222.6	226.3	232.4
Paper (except newsprint) mills . . . . .	322121	12/03	108.4	116.2	125.2	126.1	127.4
Newsprint mills . . . . .	322122	12/03	115.7	106.8	119.4	103.9	103.5
Paperboard mills . . . . .	322130	12/82	196.2	224.4	242.6	231.1	253.0
Book printing . . . . .	323117	12/83	154.9	158.6	159.0	159.6	160.7
Petroleum refineries . . . . .	324110	06/85	205.3	266.9	338.3	217.0	289.7
Petroleum lubricating oils and greases . . . . .	324191	12/80	231.2	304.8	356.6	355.8	363.3
Industrial gas manufacturing . . . . .	325120	12/03	118.3	123.3	140.9	129.1	127.2
Plastics material and resins manufacturing . . . . .	325211	12/80	228.5	232.4	255.1	227.9	252.7
Synthetic rubber manufacturing . . . . .	325212	06/81	150.6	170.2	214.3	203.3	236.5
Nitrogenous fertilizer manufacturing . . . . .	325311	12/79	236.9	278.5	427.0	275.4	286.4
Phosphatic fertilizer manufacturing . . . . .	325312	12/79	173.3	257.4	580.3	265.7	307.3
Pharmaceutical preparation mfg . . . . .	325412	06/81	378.7	413.8	440.7	469.2	495.7
Plastics pipe and pipe fitting manufacturing . . . . .	326122	06/93	171.9	197.2	215.0	203.0	216.7
Cement manufacturing . . . . .	327310	06/82	175.2	208.4	207.8	204.3	193.2
Lime . . . . .	327410	12/85	144.6	166.0	175.5	207.7	210.2
Steel investment foundries . . . . .	331512	06/81	204.8	235.4	235.4	235.4	235.0
Steel foundries (except investment) . . . . .	331513	06/81	160.1	183.7	193.4	191.4	198.3
Aluminum die-casting foundries . . . . .	331521	06/91	116.4	126.4	133.0	119.4	127.3
Iron & steel forging . . . . .	332111	12/83	128.1	140.4	150.9	148.6	150.8
Hand and edge tools, except machine tools and handsaws . . . . .	332212	06/83	177.0	188.9	197.0	203.1	204.0
Saw blade & handsaw mfg . . . . .	332213	06/83	146.0	152.8	158.1	165.1	162.1
Metal window and door manufacturing . . . . .	332321	06/83	175.2	188.1	196.5	200.5	199.3
Sheetmetal work mfg . . . . .	332322	12/82	165.6	176.8	187.6	182.5	183.7
Heating equipment (except warm air furnaces) mfg . . . . .	333414	06/80	215.4	231.2	245.7	255.3	256.7
Laboratory apparatus and furniture . . . . .	339111	12/91	148.1	158.8	165.3	(NA)	169.9
Surgical and medical instrument mfg . . . . .	339112	06/82	135.2	134.5	136.3	137.4	138.8
<b>Services industries:</b>							
Beer, wine, and liquor stores . . . . .	445310	06/00	111.0	113.2	120.6	119.8	125.4
Gasoline stations with convenience stores . . . . .	447110	12/03	104.3	123.0	135.1	129.7	138.9
Scheduled passenger air transportation . . . . .	481111	12/89	217.1	234.5	257.1	236.1	254.6
Scheduled freight air transportation . . . . .	481112	12/03	104.9	109.0	127.8	119.1	129.7
General freight trucking, long-distance . . . . .	484121	12/03	108.6	113.5	119.5	111.0	113.3
Pipeline transportation of crude oil . . . . .	486110	06/86	125.5	138.9	152.0	156.3	201.8
Pipeline transportation of refined petroleum products . . . . .	486910	06/86	120.3	131.7	139.2	147.3	153.1
Marine cargo handling . . . . .	488320	12/91	115.1	122.8	124.7	127.6	131.8
United States Postal Service . . . . .	491110	06/89	155.0	171.9	178.9	185.0	187.7
Nursing care facilities . . . . .	623110	12/94	161.4	174.0	180.9	186.9	190.5

NA Not available. <sup>1</sup> North American Industry Classification System, 2002. <sup>2</sup> Index base year equals 100. <sup>3</sup> Preliminary data.

**Table 739. Chain-Type Price Indexes for Personal Consumption Expenditures by Type of Expenditure: 1990 to 2009**

[2005 = 100. For explanation of "chain-type", see text Section 13. See also Table 677]

Type of Expenditure	1990	1995	2000	2006	2007	2008	2009
<b>Personal consumption expenditures</b> .....	<b>72.1</b>	<b>82.0</b>	<b>89.8</b>	<b>102.7</b>	<b>105.6</b>	<b>109.1</b>	<b>109.3</b>
Household consumption expenditures <sup>1</sup> .....	71.7	82.2	89.7	102.8	105.6	109.2	109.5
Food and beverages purchased for off-premises consumption .....	73.9	80.9	89.5	101.7	105.7	112.1	113.5
Food and nonalcoholic beverages purchased for off-premises consumption ..	74.1	80.6	89.2	101.8	106.0	113.0	114.1
Alcoholic beverages purchased for off-premises consumption .....	72.1	83.0	91.2	101.3	103.9	107.2	110.4
Food produced and consumed on farms .....	93.6	81.6	78.4	96.4	104.4	103.0	89.6
Clothing, footwear, and related services .....	113.9	112.6	107.4	99.8	99.0	98.5	99.4
Clothing .....	115.8	113.7	108.7	99.6	98.8	97.9	98.7
Garments .....	120.1	116.6	110.6	99.4	98.4	97.1	97.6
Women's and girls' clothing .....	125.4	119.4	109.7	99.9	99.5	97.0	97.6
Men's and boys' clothing .....	113.2	113.3	111.7	98.3	96.7	97.3	97.7
Children's and infants' clothing .....	113.9	111.4	111.7	99.9	97.7	97.5	98.1
Footwear <sup>2</sup> .....	104.2	106.9	100.8	100.8	99.9	101.4	103.6
Housing, utilities, and fuels .....	64.1	73.4	84.4	104.4	108.1	112.5	113.3
Housing .....	64.4	74.3	86.1	103.6	107.3	110.3	112.3
Rental of tenant-occupied nonfarm housing <sup>3</sup> .....	64.2	73.5	85.1	103.6	108.0	111.8	114.3
Imputed rental of owner-occupied nonfarm housing <sup>4</sup> .....	64.6	74.4	86.3	103.5	107.0	109.7	111.5
Household utilities and fuels .....	61.9	69.0	76.9	108.4	112.5	123.5	117.7
Water supply and sanitation .....	53.8	71.0	81.4	104.9	110.3	116.8	124.0
Electricity, gas, and other fuels .....	64.2	68.5	75.5	109.5	113.2	125.7	115.7
Electricity .....	78.0	86.0	85.2	112.1	116.7	124.1	127.9
Natural gas .....	45.1	47.7	61.9	102.5	102.4	116.2	90.8
Fuel oil and other fuels .....	45.9	40.5	60.7	114.1	123.3	167.2	114.7
Furnishings, household equipment, and routine household maintenance .....	95.4	100.7	103.0	100.4	100.1	100.7	101.3
Furniture, furnishings, and floor coverings <sup>5</sup> .....	101.2	107.9	107.8	99.3	97.5	95.9	95.3
Household textiles .....	133.2	132.4	120.3	95.4	90.5	87.1	83.5
Household appliances <sup>6</sup> .....	105.7	105.7	102.7	102.7	106.2	107.7	108.9
Glassware, tableware, and household utensils <sup>7</sup> .....	111.8	115.3	111.9	96.3	94.6	95.7	95.8
Health .....	58.5	75.8	85.0	103.2	106.6	109.3	112.3
Medical products, appliances, and equipment .....	62.4	74.9	85.3	103.8	105.3	107.5	110.7
Pharmaceutical and other medical products <sup>8</sup> .....	60.1	72.7	83.9	104.0	105.5	107.9	111.4
Pharmaceutical products .....	59.9	72.5	83.7	104.1	105.5	108.0	111.5
Other medical products .....	79.1	93.2	98.6	101.5	102.4	102.7	104.1
Therapeutic appliances and equipment .....	74.9	87.5	94.5	102.3	104.0	105.0	106.1
Outpatient services .....	62.8	79.6	89.1	101.9	105.6	108.0	110.5
Physician services .....	65.6	85.0	92.2	101.0	105.1	106.2	108.8
Dental services .....	48.4	63.9	79.8	105.2	110.7	116.3	119.8
Paramedical services .....	65.9	78.7	88.4	101.9	104.4	107.5	109.4
Hospital and nursing home services .....	54.0	72.8	81.3	104.2	108.0	111.4	114.8
Hospitals .....	54.6	74.9	81.3	104.4	108.0	111.2	114.6
Nursing homes .....	52.1	64.2	81.2	103.0	107.8	112.1	115.8
Transportation .....	72.2	80.9	88.6	105.0	108.7	116.0	105.3
Motor vehicles .....	82.7	100.7	103.2	99.6	98.6	96.5	96.0
New motor vehicles .....	87.5	101.9	103.9	99.4	98.3	96.8	97.8
Net purchases of used motor vehicles .....	73.0	98.4	102.0	100.1	99.2	96.1	93.0
Motor vehicle operation .....	62.6	66.3	77.0	108.4	115.6	128.6	110.8
Motor vehicle parts and accessories .....	94.2	93.9	92.4	104.1	107.6	113.2	117.6
Motor vehicle fuels, lubricants, and fluids .....	51.8	51.5	66.2	112.8	123.9	144.5	105.9
Public transportation .....	87.2	92.0	100.4	106.1	107.5	116.0	112.4
Ground transportation .....	64.4	72.6	81.9	104.7	106.3	111.4	116.1
Air transportation .....	100.9	102.6	110.3	107.3	108.7	119.8	111.6
Water transportation .....	113.1	131.5	126.0	99.6	99.4	97.7	88.7
Recreation .....	110.1	115.2	106.5	99.1	97.8	97.8	96.5
Video and audio equipment, computers, and related services .....	253.5	214.3	137.6	93.9	87.6	82.7	77.1
Video and audio equipment .....	208.5	183.1	140.5	91.1	81.1	73.9	65.5
Sports and recreational goods and related services .....	112.2	118.4	109.1	99.3	97.7	97.9	97.3
Sports and recreational vehicles .....	84.5	93.6	97.9	102.4	101.8	102.9	103.9
Other sporting and recreational goods .....	123.2	128.2	113.3	98.1	96.1	96.1	95.0
Magazines, newspapers, books, and stationery .....	71.5	87.4	95.5	100.8	102.0	104.0	107.4
Education .....	40.1	56.1	71.4	106.3	112.5	119.1	125.7
Higher education .....	36.8	55.7	69.9	106.7	113.4	120.5	127.7
Net foreign travel and expenditures abroad by U.S. residents .....							
Foreign travel by U.S. residents .....	63.2	75.1	78.9	104.2	111.4	120.4	110.5
Less: Expenditures in the United States by nonresidents .....	67.4	76.5	87.7	104.7	109.0	114.2	111.3

<sup>1</sup> Consists of household purchases of goods and services from business, government, nonprofit institutions, and the rest of the world. <sup>2</sup> Consists of shoes and other footwear, and of repair and hire of footwear. <sup>3</sup> Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture. <sup>4</sup> Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity. <sup>5</sup> Includes clocks, lamps, lighting fixtures, and other household decorative items; also includes repair of furniture, furnishings, and floor coverings. <sup>6</sup> Consists of major household appliances, small electric household appliances, and repair of household appliances. <sup>7</sup> Consists of dishes, flatware, and non-electric cookware and tableware. <sup>8</sup> Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.

**Table 741. Import and Export Price Indexes by End-Use Category: 1990 to 2010**

[As of June. Import indexes are weighted by the 2000 Tariff Schedule of the United States Annotated, a scheme for describing and reporting product composition and value of U.S. imports. Import prices are based on U.S. dollar prices paid by importer. Export indexes are weighted by 2000 export values according to the Schedule B classification system of the U.S. Census Bureau. Prices used in these indexes were collected from a sample of U.S. manufacturers of exports and are factory transaction prices, except as noted. Minus sign (–) indicates decrease]

Year	Index (2000 = 100)						Percent change <sup>1</sup>

## Section 15

# Business Enterprise

---

This section relates to the place and behavior of the business firm and to business initiative in the American economy. It includes data on the number, type, and size of businesses; financial data of domestic and multinational U.S. corporations; business investments, expenditures, and profits; and sales and inventories.

The principal sources of these data are the *Survey of Current Business*, published by the Bureau of Economic Analysis (BEA); the Web site of the Board of Governors of the Federal Reserve System at <http://www.federalreserve.gov/econresdata/default.htm>; the annual *Statistics of Income (SOI)* reports of the Internal Revenue Service (IRS); and the U.S. Census Bureau's *Economic Census*, *County Business Patterns*, *Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations (QFR)*, *Survey of Business Owners*, and *Annual Capital Expenditures Survey*.

**Business firms**—A firm is generally defined as a business organization under a single management and may include one or more establishments. The terms firm, business, company, and enterprise are used interchangeably throughout this section. A firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole.

The IRS concept of a business firm relates primarily to the legal entity used for tax reporting purposes. A sole proprietorship is an unincorporated business owned by one person and may include large enterprises with many employees and hired managers and part-time operators. A partnership is an unincorporated business owned by two or more persons, each of whom has a financial interest in the business. A corporation is a business that is legally incorporated under state laws. While many corporations file consolidated tax returns, most corporate tax returns represent individual corporations, some

of which are affiliated through common ownership or control with other corporations filing separate returns.

**Economic census**—The economic census is the major source of facts about the structure and functioning of the nation's economy. It provides essential information for government, business, industry, and the general public. It furnishes an important part of the framework for such composite measures as the gross domestic product estimates, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions. The Census Bureau takes the economic census every 5 years, covering years ending in "2" and "7."

The economic census is collected on an establishment basis. A company operating at more than one location is required to file a separate report for each store, factory, shop, or other location. Each establishment is assigned a separate industry classification based on its primary activity and not that of its parent company. Establishments responding to the establishment survey are classified into industries on the basis of their principal product or activity (determined by annual sales volume). The statistics issued by industry in the 2007 Economic Census are classified primarily on the 2007 North American Industry Classification System (NAICS), and, to a lesser extent, on the 2002 NAICS used in the previous census (see below).

More detailed information about the scope, coverage, methodology, classification system, data items, and publications for each of the economic censuses and related surveys is published in the 2007 *Economic Census User Guide* at [http://www.census.gov/econ/census07/www/user\\_guide.html](http://www.census.gov/econ/census07/www/user_guide.html).

Data from the 2007 Economic Census are released through the Census Bureau's American FactFinder® service on the

Census Bureau Web site. For more information, see <<http://www.census.gov/econ/census07/>>.

#### **Survey of Business Owners—**

The Survey of Business Owners (SBO) provides statistics that describe the composition of U.S. businesses by gender, ethnicity, race and veteran status. Data from SBO are published in a series of releases: *American Indian- and Alaska Native-Owned Firms*, *Asian-Owned Firms*, *Black-Owned Firms*, *Hispanic-Owned Firms*, *Native Hawaiian- and Other Pacific Islander-Owned Firms*, *Women-Owned Firms*, *Veteran-Owned Firms*, *Characteristics of Business Owners* and *Company Summary*. Data are presented by industry classifications, geographic area, and size of firm (employment and receipts). Each owner had the option of selecting more than one race and therefore is included in each race selected. For more information, see <<http://www.census.gov/econ/sbo/>>.

#### **North American Industry Classification System (NAICS)—**

NAICS is the standard used by federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. NAICS was developed under the auspices of the Office of Management and Budget (OMB), and adopted in 1997 to replace the Standard Industrial Classification (SIC) system. The official 2007 U.S. NAICS Manual includes definitions for each industry, background information, tables showing changes between 2002 and 2007, and a comprehensive index. For more information, see <<http://www.census.gov/eos/www/naics/>>.

Changes between 2002 NAICS and 2007 NAICS are relatively minor, but do affect totals for sectors 52 (finance and insurance), 53 (real estate, rental, and leasing), 54 (professional, scientific, and technical services), and 56 (admin., support, waste mgt., and remediation services). Nearly all industries are comparable from 2002 to 2007 NAICS classifications. Several

industries in the Information sector have been consolidated.

#### **Quarterly Financial Report—**

The Quarterly Financial Report (QFR) program publishes quarterly aggregate statistics on the financial conditions of U.S. corporations. The QFR requests companies to report estimates from their statements of income and retained earnings, and balance sheets. The statistical data are classified and aggregated by type of industry and asset size. The QFR sample includes manufacturing companies with assets of \$250 thousand and above, and mining, wholesale, retail, and selected service companies with assets of \$50 million and above. The data are available quarterly in the *Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations* at <<http://www.census.gov/econ/qfr/index.html>>.

#### **Multinational companies—**

BEA collects financial and operating data on U.S. multinational companies. These data provide a picture of the overall activities of foreign affiliates and U.S. parent companies, using a variety of indicators of their financial structure and operations. The data on foreign affiliates cover the entire operations of the affiliate, irrespective of the percentage of U.S. ownership. These data cover items such as sales, value added, employment and compensation of employees, capital expenditures, exports and imports, and research and development expenditures. Separate tabulations are available for all affiliates and for affiliates that are majority-owned by their U.S. parent(s). More information is available at <<http://www.bea.gov/international/index.htm#omc>>.

**Statistical reliability**—For a discussion of statistical collection, estimation, and sampling procedures and measures of reliability applicable to data from the Census Bureau and the Internal Revenue Service, see Appendix III.

**Table 744. Number of Tax Returns, Receipts, and Net Income by Type of Business: 1990 to 2008**

[14,783 represents 14,783,000. Covers active enterprises only. Figures are estimates based on sample of unaudited tax returns; see Appendix III]

<sup>1</sup> Excludes investment income except for partnerships and corporations in finance, insurance, and real estate before 1998. Beginning 1998, finance and insurance, real estate, and management of companies included investment income for partnerships and corporations. Excludes investment income for S corporations; for definition, see footnote 1, Table 753. <sup>2</sup> Net income (less loss) is defined differently by form of organization, basically as follows: (a) Proprietorships: Total taxable receipts less total business deductions, including cost of sales and operations, depletion, and certain capital expensing, excluding charitable contributions and owners' salaries; (b) Partnerships: Total taxable receipts (including investment income except capital gains) less deductions, including cost of sales and operations and certain payments to partners, excluding charitable contributions, oil and gas depletion, and certain capital expensing; (c) Corporations: Total taxable receipts (including investment income, capital gains, and income from foreign subsidiaries deemed received for tax purposes, except for S corporations) less business deductions, including cost of sales and operations, depletion, certain capital expensing, and officers' compensation excluding S corporation charitable contributions and investment expenses; net income is before income tax.

**Table 760. Employer Firms, Employment, and Annual Payroll by Employment Size of Firm and Industry: 2008**

[5,930 represents 5,930,000. A firm is an aggregation of all establishments owned by a parent company (within a geographic location and/or industry) with some annual payroll. A firm may be a single location or it can include multiple locations. Employment is measured in March and payroll is annual leading to some firms with zero employment. Numbers in parentheses represent North American Industry Classification System codes, 2002; see text, this section]

**Table 763. Number of Active Establishments by Firm Age and Size of Employer: 2009**

[In thousands (2,794 represents 2,794,000). A firm may have one establishment (a single unit establishment) or many establishments (a multi-unit firm). Firms are defined at the enterprise level such that all establishments under the operational control of the enterprise are considered part of the firm. These data include nearly all nonfarm private establishments with paid employees as well as some public sector activities. The Business Dynamics Statistics data measure the net change in employment at the establishment level. Data are not to be compared with Table 760, which is shown by industry based on North American Industry Classification System codes. Data are also not comparable to U.S. Small Business Administration data (Tables 761 and 762) due to differing survey methodologies. For more information about concepts and methodology, see <[http://www.ces.census.gov/index.php/bds/bds\\_overview](http://www.ces.census.gov/index.php/bds/bds_overview)>]

Firm age <sup>1</sup>	Firm size							Share of employment	Share of job creation	Share of job destruction
	1 to 4	5 to 9	10 to 19	20 to 99	100 to 499	Less than 500	500 or more			
Total.....	2,794	1,074	657	680	349	5,554	1,141	1.00	1.00	1.00
Startups.....	348	34	14	9	2	407	(Z)	0.06	0.16	—
1 to 5 years.....	924	295	154	112	23	1,507	10	0.23	0.16	0.20
6 to 10 years.....	493	201	118	103	27	943	21	0.14	0.09	0.12
11 to 20 years.....	566	258	159	144	54	1,180	81	0.19	0.13	0.17
21 years and over.....	463	285	212	312	243	1,516	1,029	0.38	0.46	0.52
Share of employment.....	0.05	0.06	0.07	0.17	0.14	0.50	0.50	(X)	(X)	(X)
Share of job creation.....	0.11	0.09	0.09	0.18	0.13	0.59	0.41	(X)	(X)	(X)

— Represents zero. X Not applicable. Z Less than 500. <sup>1</sup> Establishment age is computed by taking the difference between the current year of operation and the birth year. Firm age is computed from the age of the establishments belonging to that particular firm. For more information, see <[http://www.ces.census.gov/index.php/bds/bds\\_overview](http://www.ces.census.gov/index.php/bds/bds_overview)>.

- Represents zero. D Figure withheld to avoid disclosure pertaining to a specific organization or individual. <sup>1</sup> Establishment type is computed by taking the difference between the current year of operation and the birth year. Firm age is computed from the age of the establishments belonging to that particular firm. For more information, see <[http://www.ces.census.gov/index.php/bds/bds\\_overview](http://www.ces.census.gov/index.php/bds/bds_overview)>. <sup>2</sup> Birth year is defined as the year an establishment first reports positive employment. <sup>3</sup> Death year is defined as the year an establishment permanently shuts down. <sup>4</sup> For explanation of expansions and contractions, see <[http://www.ces.census.gov/index.php/bds/bds\\_overview](http://www.ces.census.gov/index.php/bds/bds_overview)>. <sup>5</sup> Excludes government and those sectors not elsewhere classified. <sup>6</sup> Less than 1 year old. <sup>7</sup> 1-10 years old. <sup>8</sup> More than 10 years old.

**Table 766. Establishments and Employment Changes from Births, Deaths, Expansions, and Contractions by Employment Size of Enterprise: 2006 to 2007**

[In thousands (6,762 represents 6,762,000), except percent. See headnote, Table 765. An establishment is a single physical location at which business is conducted or where services or industrial operations are performed. An enterprise is a business organization consisting of one or more domestic establishments under common ownership or control. Minus sign (–) indicates decrease]

Employment size of firm	Establishments	Births <sup>1</sup>	Deaths <sup>2</sup>	Employment	Change in employment	Percent change in employment due to—			
						Births <sup>1</sup>	Deaths <sup>2</sup>	Births and expansions <sup>3</sup>	Deaths and contractions <sup>4</sup>
Total . . . . .	6,762	906	753	119,894	537	6.3	–5.0	16.0	–15.5
1–4 . . . . .	2,879	519	457	5,955	933	15.1	–11.9	39.1	–20.3
5–9 . . . . .	1,073	85	77	6,969	81	7.7	–6.9	20.7	–18.5
10–19 . . . . .	678	53	45	8,672	–27	7.5	–5.5	17.4	–17.1
20–99 . . . . .	697	78	49	21,072	–121	6.7	–5.1	16.0	–16.6
100–499 . . . . .	340	46	24	17,536	–241	5.1	–3.8	14.0	–16.5
Less than 500 . . . . .	5,667	782	652	60,203	625	5.5	–4.4	13.7	–13.9
500 or more . . . . .	1,095	124	101	59,691	–88	7.2	–5.6	18.3	–17.2

<sup>1</sup> Births are establishments that have zero employment in the first quarter of the initial year and positive employment in the first quarter of the subsequent year. <sup>2</sup> Deaths are establishments that have positive employment in the first quarter of the initial year and zero employment in the first quarter of the subsequent year. <sup>3</sup> Expansions are establishments that have positive first quarter employment in both the initial and subsequent years and increase employment during the time period between the first quarter of the initial year and the first quarter of the subsequent year. <sup>4</sup> Contractions are establishments that have positive first quarter employment in both the initial and subsequent years and decrease employment during the time period between the first quarter of the initial year and the first quarter of the subsequent year.

Table 790. Index of Industrial Capacity: 1990 to 2010

[2007 output = 100. Annual figures are averages of monthly data. Capacity represents estimated quantity of output relative to output that the current stock of plant and equipment was capable of producing, as a proportion of 2007 actual output]

Year	Index of capacity		Relation of output to capacity (percent)				
			Total industry	Stage of process		Manufacturing	
	Total industry	Manufacturing		Crude <sup>1</sup>	Primary and semifinished <sup>2</sup>		
1990.....	75.3	71.8	82.5	87.6	82.7	80.8	81.7
1995.....	85.2	82.4	84.1	88.7	86.5	80.1	83.3
2000.....	113.1	114.3	81.4	88.6	83.9	76.7	79.7
2001.....	117.0	118.6	76.0	85.6	77.3	72.3	73.7
2002.....	119.1	120.1	74.8	82.9	77.0	70.7	72.9
2003.....	118.8	120.1	75.9	84.7	77.9	71.6	73.9
2004.....	118.6	119.8	77.9	86.1	79.9	73.1	76.1
2005.....	119.2	121.2	79.9	86.4	81.9	75.3	78.2
2006.....	121.2	123.6	80.4	87.8	81.4	76.1	78.6
2007.....	123.5	126.3	81.0	88.6	81.5	77.4	79.2
2008.....	123.8	126.9	77.8	87.0	76.8	74.5	74.9
2009.....	123.7	124.2	69.2	79.3	66.6	68.7	66.2
2010.....	121.0	120.8	74.5	85.3	71.8	73.4	71.7

<sup>1</sup> Crude processing covers a relatively small portion of total industrial capacity and consists of logging (NAICS 1133), much of mining (excluding stone, sand, and gravel mining, and oil and gas drilling, which are NAICS 21231, 21221–2, and 213111) and some basic manufacturing industries, including basic chemicals (NAICS 3251); fertilizers, pesticides, and other agricultural chemicals (NAICS 32531,2); pulp, paper, and paperboard mills (NAICS 3221); and alumina, aluminum, and other nonferrous production and processing mills (NAICS 3313,4). <sup>2</sup> Primary and semifinished processing loosely corresponds to the previously published aggregate, primary processing. Includes utilities and portions of several 2-digit SIC industries included in the former advanced processing group. These include printing and related support activities (NAICS 3231); paints and adhesives (NAICS 3255); and newspaper, periodical, book, and directory publishers (NAICS 5111). <sup>3</sup> Finished processing generally corresponds to the previously published aggregate, advanced processing. Includes oil and gas well drilling and carpet and rug mills.

Table 796. U.S. Multinational Companies—Selected Characteristics: 2008

[Preliminary. In billions of dollars (16,841 represents \$16,841,000,000,000), except as indicated. Consists of nonbank U.S. parent companies and their nonbank foreign affiliates. U.S. parent comprises the domestic operations of a multinational and is a U.S. person that owns or controls, directly or indirectly, 10 percent or more of the voting securities of an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise. A U.S. person can be an incorporated business enterprise. A majority-owned foreign affiliate (MOFA) is a foreign business enterprise in which a U.S. parent company owns or controls more than 50 percent of the voting securities]

## Section 16

# Science and Technology

---

This section presents statistics on scientific, engineering, and technological resources, with emphasis on patterns of research and development (R&D) funding and on scientific, engineering, and technical personnel; education; and employment.

The National Science Foundation (NSF) gathers data chiefly through recurring surveys. Current NSF publications containing data on funds for research and development and on scientific and engineering personnel include detailed statistical tables; info briefs; and annual, biennial, and special reports, see <<http://www.nsf.gov/statistics>>. Titles or the areas of coverage of these reports include the following: *Science and Engineering Indicators*; *National Patterns of R&D Resources*; *Women, Minorities, and Persons with Disabilities in Science and Engineering*; *Federal Funds for Research and Development*; *Federal R&D Funding by Budget Function*; *Federal Support to Universities, Colleges, and Selected Nonprofit Institutions*; *Research and Development in Industry*; R&D expenditures and graduate enrollment and support in academic science and engineering; and characteristics of doctoral scientists and engineers and of recent graduates in the United States. Statistical surveys in these areas pose problems of concept and definition and the data should therefore be regarded as broad estimates rather than precise, quantitative statements. See sources for methodological and technical details.

The National Science Board's biennial *Science and Engineering Indicators* at <<http://www.nsf.gov/statistics/seind10/>> contains data and analysis of international and domestic science and technology, including measures of inputs and outputs.

**Research and development outlays**—NSF defines research as “systematic study directed toward fuller scientific knowledge of the subject studied” and development as “the systematic use of

scientific knowledge directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes.”

National coverage of R&D expenditures is developed primarily from periodic surveys in four principal economic sectors: (1) *Government*, made up primarily of federal executive agencies; (2) *Industry*, consisting of manufacturing and nonmanufacturing firms and the federally funded research and development centers (FFRDCs) they administer; (3) *Universities and colleges*, composed of universities, colleges, and their affiliated institutions, agricultural experiment stations, and associated schools of agriculture and of medicine, and FFRDCs administered by educational institutions; and (4) *Other nonprofit institutions*, consisting of such organizations as private philanthropic foundations, nonprofit research institutes, voluntary health agencies, and FFRDCs administered by nonprofit organizations.

The R&D funds reported consist of current operating costs, including planning and administration costs, except as otherwise noted. They exclude funds for routine testing, mapping and surveying, collection of general purpose data, dissemination of scientific information, and training of scientific personnel.

**Scientists, engineers, and technicians**—Scientists and engineers are defined as persons engaged in scientific and engineering work at a level requiring a knowledge of sciences equivalent at least to that acquired through completion of a 4-year college course. Technicians are defined as persons engaged in technical work at a level requiring knowledge acquired through a technical institute, junior college, or other type of training less extensive than 4-year college training. Craftsmen and skilled workers are excluded.

Table 799. Research and Development (R&D) Expenditures by Source and Objective: 1980 to 2008

[In millions of dollars (63,224 represents \$63,224,000,000), except as indicated]

<sup>1</sup> Due to the effects of the Credit Reform Act of 1990 on the measurement and classification of federal credit activities, the discretionary outlays for years prior to 1995 are not strictly comparable to those for 1995 and after. However, the discretionary outlays shown for 1995 are no more than \$1 billion higher than they would have been if measured on the same (pre-credit reform) basis as the 1990 outlays.

## Section 17

# Agriculture

---

This section presents statistics on farms and farm operators; land use; farm income, expenditures, and debt; farm output, productivity, and marketings; foreign trade in agricultural products; specific crops; and livestock, poultry, and their products.

The principal sources are the reports issued by the National Agricultural Statistics Service (NASS) and the Economic Research Service (ERS) of the U.S. Department of Agriculture (USDA). The information from the 2007 Census of Agriculture is available in printed form in the Volume 1, Geographic Area Series; in electronic format on CD-ROM; and on the Internet at <[http://www.agcensus.usda.gov/Publications/2007/Full\\_Report/index.asp](http://www.agcensus.usda.gov/Publications/2007/Full_Report/index.asp)>. The Department of Agriculture publishes annually *Agricultural Statistics*, a general reference book on agricultural production, supplies, consumption, facilities, costs, and returns. The ERS publishes data on farm assets, debt, and income on the Internet at <<http://www.ers.usda.gov/briefing/farmincome/>>. Sources of current data on agricultural exports and imports include *Outlook for U.S. Agricultural Trade*, published by the ERS; the ERS Internet site at <<http://www.ers.usda.gov/briefing/AgTrade/>>; and the foreign trade section of the U.S. Census Bureau Web site at <<http://www.census.gov/foreign-trade/statistics/index.html>>.

The field offices of the NASS collect data on crops, livestock and products, agricultural prices, farm employment, and other related subjects mainly through sample surveys. Information is obtained on crops and livestock items as well as scores of items pertaining to agricultural production and marketing. State estimates and supporting information are sent to the Agricultural Statistics Board of NASS, which reviews the estimates and issues reports containing state and national data. Among these reports are annual summaries such as *Crop Production*,

*Crop Values, Agricultural Prices, and Live-stock Production, Disposition and Income.*

**Farms and farmland**—The definitions of a farm have varied through time. Since 1850, when minimum criteria defining a farm for census purposes first were established, the farm definition has changed nine times. The current definition, first used for the 1974 census, is any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year.

Acreage designated as “land in farms” consists primarily of agricultural land used for crops, pasture, or grazing. It also includes woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator’s total operation. Land in farms includes acres set aside under annual commodity acreage programs as well as acres in the Conservation Reserve and Wetlands Reserve Programs for places meeting the farm definition. Land in farms is an operating unit concept and includes land owned and operated as well as land rented from others. All grazing land, except land used under government permits on a per-head basis, was included as “land in farms” provided it was part of a farm or ranch.

An evaluation of coverage has been conducted for each census of agriculture since 1945 to provide estimates of the completeness of census farm counts. Beginning with the 1997 Census of Agriculture, census farm counts and totals were statistically adjusted for coverage and reported at the county level. The size of the adjustments varies considerably by state. In general, farms not on the census mail list tended to be small in acreage, production, and sales of farm products. The response rate for the 2007 Census of Agriculture was 85.2 percent as compared with a response rate of 88.0 for the 2002 Census of Agriculture and 86.2 percent for the 1997 Census of Agriculture.

For more explanation about census mail list compilation, collection methods, coverage measurement, and adjustments, see Appendix A, 2007 Census of Agriculture, Volume 1 reports <<http://www.agcensus.usda.gov/>>.

**Farm income**—The final agricultural sector output comprises cash receipts from farm marketings of crops and livestock, federal government payments made directly to farmers for farm-related activities, rental value of farm homes, value of farm products consumed in farm homes, and other farm-related income such as machine hire and custom work. Farm marketings represent quantities of agricultural products sold by farmers multiplied by prices received per unit of production at the local market. Information on prices received for farm products is generally obtained by the NASS Agricultural Statistics Board from surveys of firms (such as grain elevators, packers, and processors) purchasing agricultural commodities directly from producers. In some cases, the price information is obtained directly from the producers.

**Crops**—Estimates of crop acreage and production by the NASS are based on current sample survey data obtained from individual producers and objective yield counts, reports of carlot shipments, market records, personal field observations by field statisticians, and reports from other sources. Prices received by farmers are marketing year averages. These averages are based on U.S. monthly prices weighted by monthly

marketings during specific periods. U.S. monthly prices are state average prices weighted by marketings during the month. Marketing year average prices do not include allowances for outstanding loans, government purchases, deficiency payments or disaster payments.

All state prices are based on individual state marketing years, while U.S. marketing year averages are based on standard marketing years for each crop. For a listing of the crop marketing years and the participating states in the monthly program, see *Crop Values*. Value of production is computed by multiplying state prices by each state's production. The U.S. value of production is the sum of state values for all states. Value of production figures shown in Tables 852–856 and 858 should not be confused with cash receipts from farm marketings which relate to sales during a calendar year, irrespective of the year of production.

**Livestock**—Annual inventory numbers of livestock and estimates of livestock, dairy, and poultry production prepared by the Department of Agriculture are based on information from farmers and ranchers obtained by probability survey sampling methods.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Department of Agriculture data, see Appendix III.

**Table 823. Selected Characteristics of Farms by North American Industry Classification System (NAICS): 2007**

**Table 830. Family Farm Household Income and Wealth, 2005 to 2009, and by Gross Sales, 2009**

[In dollars, except for number of farms. Based on Agricultural Resource Management Survey (ARMS) Phase III. A family farm is defined as one in which the majority of the ownership of the farm business is held by related individuals. Nearly all farms (97 percent in 2009) are family farms. The farm operator is the person who runs the farm, making the day-to-day management decisions. The operator could be an owner, hired manager, cash tenant, share tenant, and/or a partner. If land is rented or worked on shares, the tenant or renter is the operator. For multiple-operator farms, a principal operator is identified as the individual making most of the day-to-day decisions about the operation. About 40 percent of farms have more than one operator, but three-quarters of these are operated by a husband-wife team. Therefore, both operators are considered part of the principal operator household. Minus sign (–) indicates loss]

Item					2009

**Table 834. Adoption of Genetically Engineered Crops: 2000 to 2010**

[In percent. As of June. Based on June Agricultural Survey conducted by National Agricultural Statistical Services (NASS). Excludes conventionally bred herbicide resistant varieties. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). The Bt varieties include those that contain more than one gene that can resist different types of insects. Stacked gene varieties include only those varieties containing biotech traits for both herbicide and insect resistance]

Genetically engineered crop	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010

**Table 841. Value Added to Economy by Agricultural Sector: 1990 to 2009**

[In billions of dollars (188.5 represents \$188,500,000,000). Data are consistent with the net farm income accounts and include income and expenses related to the farm operator dwellings. Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. Minus sign (–) indicates decrease]

<sup>1</sup> A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. <sup>2</sup> Direct government payments minus motor vehicle registration and licensing fees and property taxes. <sup>3</sup> Government payments reflect payments made directly to all recipients in the farm sector, including landlords. The nonoperator landlords share is offset by its inclusion in rental expenses paid to these landlords and thus is not reflected in net farm income or net cash income.

Value of production	Mil. dol.	2,590	2,992	3,209	3,340	3,770	3,521	3,489

— Represents zero or rounds to less than half the unit of measurement shown. <sup>1</sup> Comprises production, imports, and beginning stocks. <sup>2</sup> Includes feed, residual, and other domestic uses not shown separately. <sup>3</sup> Marketing year average price. U.S. prices are computed by weighting U.S. monthly prices by estimated monthly marketings and do not include an allowance for outstanding loans and government purchases and payments. <sup>4</sup> Includes flour and selected other products expressed in grain-equivalent bushels. <sup>5</sup> State production figures, which conform with annual ginning enumeration with allowance for cross-state ginnings, rounded to thousands and added for U.S. totals. <sup>6</sup> Bales of 480 pounds, net weight. <sup>7</sup> Prices are for hay sold baled. <sup>8</sup> Season average prices received by farmers. U.S. prices are computed by weighting state prices by estimated sales. <sup>9</sup> Cwt = hundredweight (100 pounds).

**Table 862. Commercial Vegetable and Other Specified Crops—Area, Production, and Value, 2008 to 2010, and Leading Producing States, 2010**

[289 represents 289,000. Except as noted, relates to commercial production for fresh market and processing combined. Includes market garden areas but excludes minor producing acreage in minor producing states. Excludes production for home use in farm and nonfarm gardens. Value is for season or crop year and should not be confused with calendar-year income. Hundredweight (cwt.) is the unit used for fresh market yield and production and is equal to one hundred pounds]

## Section 18

# Forestry, Fishing, and Mining

---

This section presents data on the area, ownership, production, trade, reserves, and disposition of natural resources. Natural resources is defined here as including forestry, fisheries, and mining and mineral products.

**Forestry**—Presents data on the area, ownership, and timber resource of commercial timberland; forestry statistics covering the National Forests and Forest Service cooperative programs; product data for lumber, pulpwood, woodpulp, paper and paperboard, and similar data.

The principal sources of data relating to forests and forest products are *Forest Resources of the United States, 2007*; *Timber Demand and Technology Assessment*; *U.S. Timber Production, Trade, Consumption, and Price Statistics, 1965–2005*; *Land Areas of the National Forest System*, issued annually by the Forest Service of the U.S. Department of Agriculture; *Agricultural Statistics* issued by the Department of Agriculture; and reports of the annual survey of manufactures, and the annual *Current Industrial Reports*, issued by the U.S. Census Bureau on the Internet and in print in the annual *Manufacturing Profiles*. Additional information is published in the monthly *Survey of Current Business* of the Bureau of Economic Analysis, and the annual *Wood Pulp and Fiber Statistics* and *The Annual Statistics of Paper, Paperboard, and Wood Pulp* of the American Forest and Paper Association, Washington, DC.

The completeness and reliability of statistics on forests and forest products vary considerably. The data for forest land area and stand volumes are much more reliable for areas that have been recently surveyed than for those for which only estimates are available. In general, more data are available for lumber and other manufactured products such as particle board and softwood panels, etc., than for the primary forest products such as poles and piling and fuelwood.

**Fisheries**—The principal source of data relating to fisheries is *Fisheries of the United States*, issued annually by the National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA). The NMFS collects and disseminates data on commercial landings of fish and shellfish. Annual reports include quantity and value of commercial landings of fish and shellfish disposition of landings and number and kinds of fishing vessels and fishing gear. Reports for the fish-processing industry include annual output for the wholesaling and fish processing establishments, annual and seasonal employment. The principal source for these data is the annual *Fisheries of the United States*.

**Mining and mineral products**—Presents data relating to mineral industries and their products, general summary measures of production and employment, and more detailed data on production, prices, imports and exports, consumption, and distribution for specific industries and products. Data on mining and mineral products may also be found in Sections 19, 21, and 28 of this *Abstract*; data on mining employment may be found in Section 12.

Mining comprises the extraction of minerals occurring naturally (coal, ores, crude petroleum, natural gas) and quarrying, well operation, milling, refining and processing, and other preparation customarily done at the mine or well site or as a part of extraction activity. (Mineral preparation plants are usually operated together with mines or quarries.) Exploration for minerals is included as is the development of mineral properties.

The principal governmental sources of these data are the *Minerals Yearbook* and *Mineral Commodity Summaries*, published by the U.S. Geological Survey, U.S. Department of the Interior, and various monthly and annual publications of the Energy Information Administration, U.S.

Department of Energy. See text, Section 19, for a list of Department of Energy publications. In addition, the Census Bureau conducts a census of mineral industries every 5 years.

Nongovernment sources include the *Annual Statistical Report* of the American Iron and Steel Institute, Washington, DC; *Metals Week* and the monthly *Engineering and Mining Journal*, issued by the McGraw-Hill Publishing Co., New York, NY; *The Iron Age*, issued weekly by the Chilton Co., Philadelphia, PA; and the *Joint Association Survey of the U.S. Oil and Gas Industry*, conducted jointly by the American Petroleum Institute, Independent Petroleum Association of America, and Mid-Continent Oil and Gas Association.

Mineral statistics, with principal emphasis on commodity detail, have been collected by the U.S. Geological Survey and

the former Bureau of Mines since 1880. Current data in U.S. Geological Survey publications include quantity and value of nonfuel minerals produced, sold, or used by producers, or shipped; quantity of minerals stocked; crude materials treated and prepared minerals recovered; and consumption of mineral raw materials.

The Economic Census, conducted by the Census Bureau at various intervals since 1840, collects data on mineral industries. Beginning with the 1967 census, legislation provides for a census to be conducted every 5 years for years ending in "2" and "7." The most recent results, published for 2007, are based on the North American Industry Classification System (NAICS). The censuses provide, for the various types of mineral establishments, information on operating costs, capital expenditures, labor, equipment, and energy requirements in relation to their value of shipments and other receipts.

Figure 18.1  
**Crude Oil Production and Imports: 1990 to 2009**

Source: Chart prepared by U.S. Census Bureau. For data, see Table 910.

**Table 884. Forest Land and Timberland by Type of Owner and Region: 2007**

[In thousands of acres (751,228 represents 751,228,000). As of January 1. Forest land is land at least 10 percent stocked by forest trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated. The minimum area for classification of forest land is 1 acre or strips of timber with a crown width of at least 120 feet wide. Timberland is forest land that is producing or is capable of producing crops of industrial wood and that is not withdrawn from timber utilization by statute or administrative regulation]

— Represents zero. <sup>1</sup> National Forest System is a national significant system of federally owned units of forest, range, and related land consisting of national forests, purchase units, national grasslands, land utilization project areas, experimental forest areas, experimental range areas, designated experimental areas, other land areas; water areas, and interests in lands that are administered by USDA Forest Service or designated for administration through the Forest Service. <sup>2</sup> Other lands are lands within the unit boundaries in private, state, county, and municipal ownership and the federal lands over which the Forest Service has no jurisdiction. Also includes lands offered to the United States and approved for acquisition and subsequent Forest Service administration, but to which title has not yet been accepted by the United States.

<sup>1</sup> As of January 1. <sup>2</sup> Live trees of commercial species meeting specified standards of quality or vigor. Cull trees are excluded. Includes only trees 5.0-inches in diameter or larger at 4 1/2 feet above ground. <sup>3</sup> Live trees of commercial species containing at least one 12-foot sawlog or two noncontiguous 8-foot logs, and meeting regional specifications for freedom from defect. Softwood trees must be at least 9.0 inches in diameter and hardwood trees must be at least 11.0-inches in diameter at 4 1/2 feet above ground. <sup>4</sup> The net increase in the volume of trees during a specified year. Components include the increment in net volume of trees at the beginning of the specific year surviving to its end, plus the net volume of trees reaching the minimum size class during the year, minus the volume of trees that died during the year, and minus the net volume of trees that became cull trees during the year. <sup>5</sup> The net volume of trees removed from the inventory during a specified year by harvesting, cultural operations such as timber stand improvement, or land clearing. <sup>6</sup> Includes Hawaii.

**Table 903. Mining and Primary Metal Production Indexes: 1990 to 2010**

[Index 2007 = 100]

Industry group	NAICS <sup>1</sup> code	1990	1995	2000	2005	2006	2007	2008	2009	2010
Mining <sup>2</sup> .....	21	106.5	104.1	103.0	97.1	99.5	100.0	100.8	95.6	101.3
Oil and gas extraction <sup>2</sup> .....	211	113.8	110.3	107.0	97.8	98.4	100.0	100.9	106.4	110.4
Crude oil and natural gas .....	211111	115.9	111.2	106.9	97.9	98.4	100.0	100.9	106.4	110.3
Coal mining .....	2121	94.9	93.4	95.8	99.0	101.6	100.0	101.7	93.2	94.0
Metal ore mining .....	2122	110.1	120.4	117.3	100.4	102.5	100.0	103.7	89.8	97.9
Iron ore .....	21221	107.5	119.2	119.6	103.0	100.1	100.0	101.8	51.1	95.4
Gold ore and silver ore .....	21222	124.5	133.2	148.4	107.2	105.4	100.0	96.4	92.3	99.5
Copper, nickel, lead, and zinc ...	21223	119.1	136.5	119.8	96.7	100.5	100.0	108.5	98.3	93.8
Oil and gas drilling .....	213111	60.1	52.6	67.2	83.7	96.6	100.0	104.4	61.4	82.3
Primary metal manufacturing <sup>2</sup> ...	331	87.1	95.5	100.3	95.2	98.0	100.0	99.7	69.5	83.3
Iron and steel .....	3311	83.8	93.1	97.1	94.3	98.4	100.0	106.4	63.1	87.7
Aluminum .....	3313	102.4	98.3	104.0	106.9	105.7	100.0	92.6	74.9	77.5
Nonferrous metals <sup>2</sup> .....	3314	88.7	98.6	92.1	84.2	85.4	100.0	100.7	85.8	91.6
Copper .....	33142	155.6	287.4	146.2	85.9	95.8	100.0	82.2	106.0	101.8

<sup>1</sup> Based on the 2007 North American Industry Classification System (NAICS). <sup>2</sup> Includes other industries not shown separately.

Table 904. Mineral Production: 1990 to 2010

[1,029.1 represents 1,029,100,000. Data represent production as measured by mine shipments, mine sales, or marketable production; see Appendix IV]

Minerals and metals	Unit	1990	2000	2008	2009	2010, est.
FUEL MINERALS						
Coal, total <sup>1</sup>	Mil. sh. tons	1,029.1	1,073.6	1,171.8	1,074.9	1,085.3
Bituminous <sup>1</sup>	Mil. sh. tons	693.2	574.3	555.3	493.7	(NA)
Subbituminous	Mil. sh. tons	244.3	409.2	539.1	504.7	(NA)
Lignite	Mil. sh. tons	88.1	85.6	75.7	72.5	(NA)
Anthracite <sup>1</sup>	Mil. sh. tons	3.5	4.6	1.7	1.9	(NA)
Natural gas (marketed production)	Tril. cu. ft.	18.59	20.20	21.11	21.60	22.56
Petroleum (crude)	Mil. bbl. <sup>2</sup>	2,685	2,131	1,812	1,938	(NA)
Uranium (recoverable content)	Mil. lb	8.9	4.0	3.9	(NA)	(NA)
NONFUEL MINERALS						
Asbestos (sales)	1,000 metric tons	(D)	5	—	—	—
Barite, primary, sold/used by producers	1,000 metric tons	430	392	648	383	670
Boron minerals, sold or used by producers	1,000 metric tons	1,090	1,070	(D)	(D)	(D)
Bromine, sold or used by producers	1,000 metric tons	177	228	(D)	(D)	(D)
Cement (excludes Puerto Rico):						
Portland <sup>3</sup>	Mil. metric tons	67	84	83	62	61
Masonry <sup>3</sup>	Mil. metric tons	3	4	3	2	2
Clays	1,000 metric tons	42,900	40,800	33,200	24,500	27,000
Diatomite	1,000 metric tons	631	677	764	575	550
Feldspar <sup>4</sup>	1,000 metric tons	630	790	650	<sup>4</sup> 550	<sup>4</sup> 570
Fluorspar, finished shipments	1,000 metric tons	64	—	(NA)	(NA)	(NA)
Garnet (industrial)	1,000 metric tons	47	60	63	46	54
Gypsum, crude	Mil. metric tons	15	20	14	9	9
Helium <sup>5</sup>	Mil. cu. meters	65	98	80	78	77
Lime, sold or used by producers	Mil. metric tons	16	20	20	16	18
Mica, scrap/flake, sold/used by producers	1,000 metric tons	109	101	84	50	53
Peat, sales by producers	1,000 metric tons	721	847	648	644	646
Perlite, processed, sold or used	1,000 metric tons	576	672	434	348	375
Phosphate rock (marketable)	Mil. metric tons	46	39	30	26	26
Potash (K <sub>2</sub> O equivalent) sales	1,000 metric tons	1,710	1,300	1,100	700	900
Pumice & pumicite, producer sales	1,000 metric tons	443	1,050	791	410	400
Salt, common, sold/used by producers	Mil. metric tons	37	46	47	46	45
Sand & gravel, sold/used by producer:	Mil. metric tons	855	1,148	1,070	869	787
Construction	Mil. metric tons	829	1,120	1,040	844	760
Industrial	Mil. metric tons	26	28	30	25	27
Silica, sales <sup>6</sup>	Metric tons	(NA)	312	(D)	(D)	(D)
Sodium carbonate (natural, soda ash)	1,000 metric tons	9,100	10,200	11,300	9,310	10,000
Sodium sulfate (natural and synthetic)	1,000 metric tons	349	(NA)	319	292	300
Stone: <sup>7</sup>	Mil. metric tons	2,230	2,810	3,240		
Crushed and broken	Mil. metric tons	1,110	1,560	1,440	1,170	1,150
Dimension <sup>8</sup>	1,000 metric tons	1,120	1,250	1,800	1,620	1,450
Sulfur: Total shipments	1,000 metric tons	11,500	10,700	9,430	9,670	9,800
Sulfur: Frasch mines (shipments)	1,000 metric tons	3,680	900	—	—	—
Talc and pyrophyllite, crude <sup>9</sup>	1,000 metric tons	1,270	851	706	511	530
Vermiculite concentrate	1,000 metric tons	209	150	100	100	100
METALS						
Antimony ore and concentrate	Metric tons	(D)	(D)	—	—	—
Aluminum	1,000 metric tons	4,048	3,668	2,658	1,727	1,720
Bauxite (dried)	1,000 metric tons	(D)	(NA)	(NA)	(NA)	(NA)
Copper (recoverable content)	1,000 metric tons	1,590	1,450	1,310	1,180	1,120
Gold (recoverable content)	Metric tons	294	353	233	223	230
Iron ore (gross weight) <sup>10</sup>	Mil. metric tons	57	61	54	28	50
Lead (recoverable content)	1,000 metric tons	484	449	399	406	385
Magnesium metal	1,000 metric tons	139	(D)	(D)	(D)	(D)
Manganiferous ore (gross weight) <sup>11</sup>	1,000 metric ton	(D)	—	(NA)	—	—
Mercury <sup>12</sup>	Metric tons	(NA)	(NA)	(NA)	(NA)	(NA)
Molybdenum (concentrate)	1,000 metric tons	62	41	56	48	56
Nickel ore (recovered Ni content)	1,000 metric tons	330	—	—	—	—
Palladium metal	Kilograms	5,930	10,300	11,900	12,700	11,600
Platinum metal	Kilograms	1,810	3,110	3,580	3,830	3,500
Silicon (Si content) <sup>13</sup>	1,000 metric tons	418	367	164	139	170
Silver (recoverable content)	Metric tons	2,120	1,860	1,230	1,250	1,280
Titanium concentrate, (TiO <sub>2</sub> content) <sup>14</sup>	1,000 metric tons	(D)	300	200	200	200
Tungsten ore and concentrate <sup>15</sup>	Metric tons	(D)	—	(D)	(D)	(D)
Vanadium (recoverable content)	Metric tons	2,310	—	—	(D)	(D)
Zinc (recoverable content)	1,000 metric tons	508	796	748	710	699

D Withheld to avoid disclosing individual company data. NA Not available. <sup>1</sup> Included with bituminous. <sup>2</sup> 42-gal. bbl. <sup>3</sup> Excludes Puerto Rico. <sup>4</sup> Excludes attapulgite. <sup>5</sup> Beginning 1995, includes aplite. <sup>6</sup> Refined. <sup>7</sup> Includes grindstones, oilstones, whetstones, and deburring media. Excludes grinding pebbles and tubemill liners. <sup>8</sup> Includes Puerto Rico. <sup>9</sup> Includes only talc after 1990. <sup>10</sup> Represents shipments; includes byproduct ores. <sup>11</sup> From 5 to 35 percent manganiferous ore. <sup>12</sup> Mercury recovered as a byproduct of gold ores only, 1995. <sup>13</sup> 2006–2010 ferrosilicon only; silicon metal withheld to avoid disclosing proprietary data. <sup>14</sup> U.S. production rounded to one significant digit. <sup>15</sup> Content of ore and concentrate.

Zinc (contained).....	1,000 metric tons ..	720	704	77	901	<sup>4, 45</sup> 1.04	1,990
Zirconium (ZrO <sub>2</sub> ) .....	Metric tons .....	(D)	34,000	( <sup>3</sup> )	(D)	<sup>6, 46</sup> 850	(NA)

— Represents or rounds to zero. D Withheld to avoid disclosing company proprietary data. NA Not available. <sup>1</sup> Data are rounded to no more than three significant digits; except prices. <sup>2</sup> Calculated as a percent of apparent consumption. <sup>3</sup> Net exporter. <sup>4</sup> Dollars per pound. <sup>5</sup> Refinery production. <sup>6</sup> Dollars per metric ton. <sup>7</sup> Bauxite, average value U.S. imports (f.a.s.). <sup>8</sup> Boric acid, gross weight. <sup>9</sup> Granulated pentahydrate borax in bulk, f.o.b. mine. <sup>10</sup> Dollars per kilogram. <sup>11</sup> Bulk, purified bromine. <sup>12</sup> Metal only. <sup>13</sup> Average New York dealer price for 99.95% purity in 5-short-ton lots. Source: Platts Metals Week. <sup>14</sup> Excludes Puerto Rico. <sup>15</sup> Secondary production. <sup>16</sup> Unit value of imported chromite ore. Dollars per metric ton gross weight. <sup>17</sup> Excludes attapulgite. <sup>18</sup> Value of imports, dollars per carat. <sup>19</sup> Dollars per troy ounce. <sup>20</sup> Price of flake imports. <sup>21</sup> C.i.f. value, crude, per kilogram. <sup>22</sup> Shipments of usable ore. <sup>23</sup> Delivered, No. 1 Heavy Melting composite price. <sup>24</sup> Sales include imports and reprocessed slag from past years and decades, and only some from current production. <sup>25</sup> Quicklime only. <sup>26</sup> 46%-48% Mn metallurgical ore, per unit contained Mn, c.i.f. U.S. ports. <sup>27</sup> Dollars per 76-pound flask. <sup>28</sup> Primary and secondary materials. <sup>29</sup> London Metal Exchange cash price; dollars per metric ton. <sup>30</sup> F.o.b. Gulf Coast. <sup>31</sup> Platinum and palladium. <sup>32</sup> Platinum. <sup>33</sup> Dealer price of platinum. <sup>34</sup> Price of K<sub>2</sub>O, muriate. <sup>35</sup> Vacuum and open pan, bulk, pellets and packaged, f.o.b. mine and plant. <sup>36</sup> Silicon metal only. <sup>37</sup> Ferrosilicon statistics include: Production (170,000 t), exports (15,000 t), and net import reliance (44%). <sup>38</sup> Ferrosilicon only. <sup>39</sup> Ferrosilicon, 50% Si; cents per pound. <sup>40</sup> Quoted year-end price, dense, bulk, f.o.b. Green River, WY, dollars per short ton. <sup>41</sup> Quoted price, bulk, f.o.b. works, East, dollars per short ton. <sup>42</sup> Elemental sulfur, f.o.b. plant. <sup>43</sup> Year-end. Unit value based on landed-duty-paid U.S. imports for consumption of pigment with 80% or more TiO<sub>2</sub>. <sup>44</sup> Dollars per metric ton unit WO<sub>3</sub> (7.93 kilograms of contained tungsten per metric ton unit). <sup>45</sup> Platts Metals Week North American price for Special High Grade zinc. <sup>46</sup> Price for domestic zircon.

– Represents or rounds to zero. NA Not available. X Not applicable. <sup>1</sup> Includes an adjustment for crude oil, previously referred to as "Unaccounted For Crude Oil." Also included is an adjustment for motor gasoline blending components, fuel ethanol, and distillate fuel oil. See Appendix B of source for more details. <sup>2</sup> Products supplied is equal to field production, plus refinery and blender net production, plus imports, plus adjustments, minus stock change, minus refinery and blender net inputs, minus exports. <sup>3</sup> Strategic Petroleum Reserve. <sup>4</sup> Liquefied Refinery Gases (LRGs) are liquefied petroleum gases fractionated from refinery or still gases through compression and/or refrigeration. They are retained in the liquid state. Excludes still gas. <sup>5</sup> Distillate stocks located in the "Northeast Heating Oil Reserve" are not included. For details, see Appendix C of source.

– Represents or rounds to zero. <sup>1</sup> Proved reserves of natural gas as of December 31 of the report year are the estimated quantities which analysis of geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions. <sup>2</sup> Methane is generated during coal formation and is contained in the coal microstructure. Typical recovery entails pumping water out of the coal to allow the gas to escape. Methane is the principal component of natural gas. Coal bed methane can be added to natural gas pipelines without any special treatment. <sup>3</sup> Natural gas produced from low permeability shale formations.

**Table 921. Demonstrated Coal Reserves by Major Producing State: 2008 and 2009**

[In millions of short tons (487,768 represents 487,678,000,000), except as number of mines. As of January 1. The demonstrated reserve base represents the sum of coal in both measured and indicated resource categories of reliability. Measured resources of coal are estimates that have a high degree of geologic assurance from sample analyses and measurements from closely spaced and geological well-known sample sites. Indicated resources are estimates based partly from sample and analyses and measurements and partly from reasonable geologic projections]

State	2008				2009

## Section 19

# Energy and Utilities

---

This section presents statistics on fuel resources, energy production and consumption, electric energy, hydroelectric power, nuclear power, solar and wind energy, biomass, and the electric and gas utility industries. The principal sources are the U.S. Department of Energy's Energy Information Administration (EIA), the Edison Electric Institute, Washington, DC, and the American Gas Association, Arlington, VA. The Department of Energy was created in October 1977 and assumed and centralized the responsibilities of all or part of several agencies including the Federal Power Commission (FPC), the U.S. Bureau of Mines, the Federal Energy Administration, and the U.S. Energy Research and Development Administration. For additional data on transportation, see Section 23; on fuels, see Section 18; and on energy-related housing characteristics, see Section 20.

The EIA, in its *Annual Energy Review*, provides statistics and trend data on energy supply, demand, and prices. Information is included on petroleum and natural gas, coal, electricity, hydroelectric power, nuclear power, solar, wind, wood, and geothermal energy. Among its annual reports are *Annual Energy Review*; *Electric Power Annual*; *Natural Gas Annual*; *Petroleum Supply Annual*; *State Energy Consumption, Price, and Expenditure Data*; *U.S. Crude Oil, Natural Gas, and Natural Gas Liquids Reserves*; *Electric Sales and Revenue*; *Annual Energy Outlook*; and *International Energy Statistics*. These various reports contain state, national, and international data on the production of electricity, net summer capability of generating plants, fuels used in energy production, energy sales and consumption, and hydroelectric power. The EIA also issues the *Monthly Energy Review*, which presents current supply, disposition, and price data and monthly publications on petroleum, coal, natural gas, and electric power.

Data on residential energy consumption, expenditures, and conservation activities are available from EIA's Residential Energy Consumption Survey (RECS) and are published every 4 years. The Commercial Buildings Energy Consumption Survey (CBECS), conducted on a quadrennial basis, collects information on the stock of U.S. commercial buildings, their energy-related characteristics, and their energy consumption and expenditures. Data on manufacturing energy consumption, use, and expenditures are also collected every 4 years from EIA's Manufacturing Energy Consumption Survey (MECS). Due to the long gaps between the RECS, CBECS, and MECS, tables are rotated in and out of Section 19 in an effort to keep the data as current as possible. The results from these surveys are published at [<http://www.eia.gov/consumption/>](http://www.eia.gov/consumption/).

The Edison Electric Institute's monthly bulletin and annual *Statistical Year Book of the Electric Utility Industry for the Year* contain data on the distribution of electric energy by public utilities; information on the electric power supply, expansion of electric generating facilities, and the manufacture of heavy electric power equipment is presented in the annual *Year-End Summary of the Electric Power Situation in the United States*. The American Gas Association, in its monthly and quarterly bulletins and its yearbook, *Gas Facts*, presents data on gas utilities and financial and operating statistics.

**Btu conversion factors**—Various energy sources are converted from original units to the thermal equivalent using British thermal units (Btu). A Btu is the amount of energy required to raise the temperature of 1 pound of water 1 degree Fahrenheit (F) at or near 39.2 degrees F. Factors are calculated annually from the latest final annual data available; some are revised as a result. The following list provides conversion factors used in 2009 for production and consumption, in that

order, for various fuels: Petroleum, 5.800 and 5.301 mil. Btu per barrel; total coal, 19.969 and 19.742 mil. Btu per short ton; and natural gas (dry), 1,025 Btu per cubic foot for both. The factors for the production of nuclear power and geothermal power were 10,460 and 21,017 Btu per kilowatt-hour, respectively. The fossil fuel steam-electric power plant generation factor of 9,760 Btu per kilowatt-hour—was used for hydroelectric power generation and for wood and waste, wind, photovoltaic, and solar thermal energy consumed at electric utilities.

**Electric power industry**—In recent years, EIA has restructured the industry categories it once used to gather and report electricity statistics. The electric power industry, previously divided into electric utilities and non-utilities, now consists of the Electric Power Sector, the Commercial Sector, and the Industrial Sector.

The Electric Power Sector is composed of electricity-only and combined-heat-and-power plants (CHPs) whose primary business is to sell electricity, or electricity and heat, to the public.

Electricity-only plants are composed of traditional electric utilities, and nontraditional participants, including energy service providers, power marketers, independent power producers (IPPs), and the portion of CHPs that produce only electricity.

A utility is defined as a corporation, person, agency, authority, or other legal

entity or instrumentality aligned with distribution facilities for delivery of electric energy for use primarily by the public. Electric utilities include investor-owned electric utilities, municipal and state utilities, federal electric utilities, and rural electric cooperatives. In total, there are more than 3,100 electric utilities in the United States.

An independent power producer is an entity defined as a corporation, person, agency, authority, or other legal entity or instrumentality that owns or operates facilities whose primary business is to produce electricity for use by the public. They are not generally aligned with distribution facilities and are not considered electric utilities.

Combined-heat-and-power producers are plants designed to produce both heat and electricity from a single heat source. These types of electricity producers can be independent power producers or industrial or commercial establishments. As some independent power producers are CHPs, their information is included in the data for the combined-heat-and-power sector. There are approximately 2,800 unregulated independent power producers and CHPs in the United States.

The Commercial Sector consists of commercial CHPs and commercial electricity-only plants. Industrial CHPs and industrial electricity-only plants make up the Industrial Sector. For more information, please refer to the *Electric Power Annual 2009* Web site at <[http://www.eia.gov/cneaf/electricity/epa/epa\\_sum.html](http://www.eia.gov/cneaf/electricity/epa/epa_sum.html)>.

**Table 923. Utilities—Establishments, Revenue, Payroll, and Employees by Kind of Business: 2007**

[584,193 represents \$584,193,000,000. Includes only establishments or firms with payroll. Data based on the 2007 Economic Census. See headnote, Table 755 and Appendix III]

Kind of business	2007 NAICS code <sup>1</sup>	Establishments (number)	Revenue		Annual payroll		Paid employees for pay period including March 12 (number)

NA Not available. Z Less than 5 trillion. <sup>1</sup> Includes other types of fuel, not shown separately. <sup>2</sup> Includes lease condensate. <sup>3</sup> Beginning 1989, includes waste coal supplied. Beginning 2001, also includes a small amount of refuse recovery. <sup>4</sup> Electricity net generation from conventional hydroelectric power, geothermal, solar, and wind; consumption of electricity from wood, waste, and alcohol fuels; geothermal heat pump and direct use energy; and solar thermal direct use energy. <sup>5</sup> Conventional hydroelectricity net generation. <sup>6</sup> Organic nonfossil material of biological origin constituting a renewable energy source. <sup>7</sup> Imports minus exports. <sup>8</sup> Includes coal coke net imports and electricity net imports, not shown separately. <sup>9</sup> Petroleum products supplied, including natural gas plant liquids and crude oil burned as fuel. Does not include biofuels that have been blended with petroleum—biofuels are included in "Renewable Energy." <sup>10</sup> Excludes supplemental gaseous fuels. <sup>11</sup> Preliminary.

<b>Prices (2006 dollars per unit):</b>						
Imported crude oil price <sup>11</sup> . . . . .	93.44	59.04	74.86	86.83	98.65	107.40
Gas wellhead price (dol. per 1,000 cu. ft.) <sup>12</sup> . . . . .	8.18	3.71	4.08	4.24	4.59	5.43
Coal minemouth price (dol. per ton) <sup>13</sup> . . . . .	31.54	33.26	36.64	32.36	32.85	33.22
Average electric price (cents per kWh) . . . . .	9.80	9.80	9.60	8.90	8.80	8.90

<sup>1</sup> Includes waste coal. <sup>2</sup> Includes grid-connected electricity from conventional hydroelectric; wood and wood waste; landfill gas; municipal solid waste; other biomass; wind; photovoltaic and solar thermal sources; nonelectric energy from renewable sources, such as active and passive solar systems, and wood. Excludes electricity imports using renewable sources and nonmarketed renewable energy. <sup>3</sup> Includes nonbiogenic municipal solid waste, liquid hydrogen, methanol, and some domestic inputs to refineries. <sup>4</sup> Includes imports of crude oil for the Strategic Petroleum Reserve. <sup>5</sup> Includes imports of finished petroleum products, imports of unfinished oils, alcohols, ethers, blending components, and renewable fuels such as ethanol. <sup>6</sup> Includes coal, coal coke (net), and electricity (net). <sup>7</sup> Includes crude oil and petroleum products. <sup>8</sup> Includes petroleum-derived fuels and non-petroleum-derived fuels, such as ethanol, biodiesel, and coal-based synthetic liquids. Petroleum coke, which is a solid, is included. Also included are natural gas plant liquids, crude oil consumed as a fuel, and liquid hydrogen. <sup>9</sup> Includes grid-connected electricity from wood and wood waste, non-electric energy from wood, and biofuels heat and coproducts used in the production of liquid fuel, but excludes the energy content of the liquid fuels. Also includes non-biogenic municipal solid waste and net electricity imports. <sup>10</sup> Includes non-biogenic municipal solid waste and net electricity imports. <sup>11</sup> Weighted average price delivered to U.S. refiners. <sup>12</sup> Represents lower 48 onshore and offshore supplies. <sup>13</sup> Includes reported prices for both open market and captive mines.

— Represents zero. Z Less than 50 billion Btu. <sup>1</sup> Includes other sources, not shown separately. <sup>2</sup> U.S. total energy and U.S. industrial sector include 60.8 trillion Btu of net imports of coal coke that is not allocated to the states. <sup>3</sup> Based on estimated resident population as of July 1. <sup>4</sup> End-use sector data include electricity sales and associated electrical system energy losses. <sup>5</sup> Includes fuel ethanol blended into motor gasoline. <sup>6</sup> Includes supplemental gaseous fuels. <sup>7</sup> Conventional hydroelectric power. Does not include pumped-storage hydroelectricity.

NA Not available. Z Less than 5 trillion Btu. <sup>1</sup> Preliminary. <sup>2</sup> Power produced from natural stream flow as regulated by available storage. <sup>3</sup> As used at electric power plants, hot water or steam extracted from geothermal reservoirs in the Earth's crust that is supplied to steam turbines at electric power plants that drive generators to produce electricity. <sup>4</sup> Wood and wood-derived fuels, municipal solid waste (from biogenic sources, landfill gas, sludge waste, agricultural byproducts, and other biomass), fuel ethanol, and biodiesel. <sup>5</sup> The radiant energy of the sun, which can be converted into other forms of energy, such as heat or electricity. Solar thermal and photovoltaic electricity net generation and solar thermal direct use energy. <sup>6</sup> Energy present in wind motion that can be converted to mechanical energy for driving pumps, mills, and electric power generators. Wind pushes against sails, vanes, or blades radiating from a central rotating shaft. <sup>7</sup> Consists of living quarters for private households, but excludes institutional living quarters. <sup>8</sup> Consists of service-providing facilities and equipment of businesses, governments, and other private and public organizations. Includes institutional living quarters and sewage treatment facilities. Includes commercial combined-heat-and-power and commercial electricity-only plants. <sup>9</sup> Consists of all facilities and equipment used for producing, processing, or assembling goods. Includes industrial combined-heat-and-power and industrial electricity-only plants. <sup>10</sup> Ethanol primarily derived from corn. <sup>11</sup> Any liquid biofuel suitable as a diesel fuel substitute, additive, or extender. <sup>12</sup> Consists of electricity-only and combined-heat-and-power plants whose primary business is to sell electricity and/or heat to the public. Includes sources not shown separately.

— Represents or rounds to zero. <sup>1</sup> Total expenditures are the sum of purchases for each source (including retail electricity sales) less electric power sector purchases of fuel. <sup>2</sup> Includes sources not shown separately, such as electricity imports and exports and coal coke net imports, which are not allocated to the states. <sup>3</sup> Includes fuel ethanol blended into motor gasoline. <sup>4</sup> Includes supplemental gaseous fuels.

Table 937. Crude Oil Imports Into the U.S. by Country of Origin: 1980 to 2010

[In millions of barrels (1,921 represents 1,921,000,000). Barrels contain 42 gallons. Crude oil imports are reported by the Petroleum Administration for Defense (PAD) District in which they are to be processed. A PAD District is a geographic aggregation of the 50 states and D.C. into 5 districts. Includes crude oil imported for storage in the Strategic Petroleum Reserve (SPR). Total OPEC excludes, and Non-OPEC includes, petroleum imported into the United States indirectly from members of OPEC, primarily from Caribbean and West European areas, as petroleum products that were refined from crude oil produced by OPEC]

Country of origin	1980	1990	1995	2000	2004	2005	2006	2007	2008	2009	2010

- Represents zero. NA Not available. Z Represents less than 500,000 barrels. <sup>1</sup> OPEC (Organization of Petroleum Exporting Countries) includes the nations shown, as well as Iran, Libya, Qatar, United Arab Emirates, and Indonesia. <sup>2</sup> Angola joined OPEC at the beginning of 2007. Prior to 2007, it is included in the non-OPEC total. <sup>3</sup> Ecuador withdrew from OPEC on Dec. 31, 1992; therefore, it is included under OPEC prior to 1995. From 1995 through 2007, it is included in the Non-OPEC total. In Nov. 2007, Ecuador rejoined OPEC; imports for 2008 are included in the OPEC total. <sup>4</sup> Gabon withdrew from OPEC on Dec. 31, 1994; therefore, it is included under OPEC prior to 1995. Beginning 1995, it is included in the Non-OPEC total. <sup>5</sup> Imports from the Neutral Zone between Kuwait and Saudi Arabia are included in Saudi Arabia. <sup>6</sup> Non-OPEC total includes nations not shown. <sup>7</sup> See footnote 5, Table 1332.

<sup>1</sup> Total of nuclear generating units holding full-power licenses, or equivalent permission to operate, at the end of the year. For example, although Browns Ferry 1 was shut down in 1985, the unit remained fully licensed and thus continued to be counted as operable. It was eventually reopened in 2007. <sup>2</sup> As of year-end. <sup>3</sup> Net summer capacity is the peak steady hourly output that generating equipment is expected to supply to system load, exclusive of auxiliary and other power plant, as demonstrated by test at the time of summer peak demand. <sup>4</sup> Weighted average of monthly capacity factors. Monthly factors are derived by dividing actual monthly generation by the maximum possible generation for the month (number of hours in the month multiplied by the net summer capacity at the end of the month).

**Table 947. Electricity—End Use and Average Retail Prices: 1990 to 2009**

[Beginning 2004, the category “other” has been replaced by “transportation,” and the categories “commercial” and “industrial” have been redefined. Data represent revenue from electricity retail sales divided by the amount of retail electricity sold (in kilowatt-hours). Prices include state and local taxes, energy or demand charges, customer service charges, environmental surcharges, franchise fees, fuel adjustments, and other miscellaneous charges applied to end-use customers during normal billing operations. Prices do not include deferred charges, credits, or other adjustments, such as fuel or revenue from purchased power, from previous reporting periods. Data are for a census of electric utilities. Beginning in 2000 data also include energy service providers selling to retail customers]

NA Not available. X Not applicable. <sup>1</sup> Preliminary. <sup>2</sup> The sum of “total retail sales” and “direct use.” <sup>3</sup> Use of electricity that is 1) self-generated, 2) produced by either the same entity that consumes the power or an affiliate, and 3) used in direct support of a service or industrial process located within the same facility or group of facilities that house the generating equipment. Direct use is exclusive of station use. <sup>4</sup> Electricity retail sales to ultimate customers reported by electric utilities and, beginning in 2000, other energy service providers. <sup>5</sup> Includes public street and highway lighting, interdepartmental sales, and other sales to public authorities. <sup>6</sup> Beginning 2003, includes agriculture and irrigation. <sup>7</sup> Includes sales to railroads and railways. <sup>8</sup> Beginning 2003, includes public street and highway lighting, interdepartmental sales, and other sales to public authorities. <sup>9</sup> Public street and highway lighting, interdepartmental sales, other sales to public authorities, agriculture and irrigation, and transportation including railroads and railways.

Table 949. Electric Power Industry—Capability, Peak Load, and Capacity Margin: 1980 to 2010

[558,237 represents 558,237,000 kW. Excludes Alaska and Hawaii. Capability represents the maximum kilowatt output with all power sources available and with hydraulic equipment under actual water conditions, allowing for maintenance, emergency outages, and system operating requirements. Capacity margin is the difference between capability and peak load. Minus sign (–) indicates decrease]

Year	Capability at the time of—				Noncoincident peak load		Capacity margin			
	Summer peak load (1,000 kW)		Winter peak load (1,000 kW)				Summer		Winter	
	Change from prior year		Change from prior year		Summer (1,000 kW)	Winter (1,000 kW)	Amount (1,000 kW)	Percent of capability	Amount (1,000 kW)	Percent of capability

**Table 952. Total Electric Power Industry—Generation, Sales, Revenue, and Customers: 1990 to 2010**

[2,808 represents 2,808,000,000,000 kWh. Sales and revenue are to and from ultimate customers. Commercial and Industrial are not wholly comparable on a year-to-year basis due to changes from one classification to another. For the 2005 period forward, the Energy Information Administration replaced the "Other" sector with the Transportation sector. The Transportation sector consists entirely of electrified rail and urban transit systems. Data previously reported in "Other" have been relocated to the Commercial sector, except for Agriculture (i.e., irrigation load), which have been relocated to the Industrial sector]

**Table 953. Revenue and Expense Statistics for Major U.S. Investor-Owned Electric Utilities: 1995 to 2009**

[In millions of nominal dollars (199,967 represents \$199,967,000,000). Covers approximately 180 investor-owned electric utilities that during each of the last 3 years met any one or more of the following conditions—1 mil. megawatt-hours of total sales; 100 megawatt-hours of sales for resale, 500 megawatt-hours of gross interchange out, and 500 megawatt-hours of wheeling for other. Missing or erroneous respondent data may result in slight imbalances in some of the expense account subtotals]

— Represents zero. <sup>1</sup> Includes a small number of systems for which the water source (ground vs. surface) is unknown.

<sup>2</sup> A public water system that supplies water to the same population year-round. <sup>3</sup> A public water system that regularly supplies water to at least 25 of the same people at least 6 months per year, but not year-round. Some examples are schools, factories, and office buildings which have their own water systems. <sup>4</sup> A public water system that provides water in a place such as a gas station or campground where people do not remain for long periods of time and is open at least 60 day per year.

— Represents zero. Z Less than 500. <sup>1</sup> A public water system that supplies water to the same population year-round. <sup>2</sup> A public water system that regularly supplies water to at least 25 of the same people at least 6 months per year, but not year-round. Some examples are schools, factories, and office buildings which have their own water systems. <sup>3</sup> A public water system that provides water in a place such as a gas station or campground where people do not remain for long periods of time and is open at least 60 days per year. <sup>4</sup> U.S. total does not equal sum of states due to incomplete reporting of a small number of systems.

## Section 20

# Construction and Housing

---

This section presents data on the construction industry and on various indicators of its activity and costs; on housing units and their characteristics and occupants; and on the characteristics and vacancy rates for commercial buildings. This edition contains data from the 2005 American Housing Survey.

The principal source of these data is the U.S. Census Bureau, which issues a variety of current publications, as well as data from the decennial census. Current construction statistics compiled by the Census Bureau appear in its *New Residential Construction* and *New Residential Sales* press releases and Web site at <http://www.census.gov/const/www/>. Statistics on expenditures by owners of residential properties are issued quarterly and annually in *Expenditures for Residential Improvements and Repairs*. *Value of New Construction Put in Place* presents data on all types of construction. Reports of the censuses of construction industries (see below) are also issued on various topics.

Other Census Bureau publications include the *Current Housing Reports* series, which comprise the quarterly *Housing Vacancies*, the quarterly *Market Absorption of Apartments*, the biennial *American Housing Survey* (formerly *Annual Housing Survey*), and reports of the censuses of housing and of construction industries.

Other sources include the monthly *Dodge Construction Potentials* of McGraw-Hill Construction, New York, NY, which present national and state data on construction contracts; the National Association of Home Builders with state-level data on housing starts; the NATIONAL ASSOCIATION OF REALTORS®, which presents data on existing home sales; the Bureau of Economic Analysis, which presents data on residential capital and gross housing product; and the U.S. Energy Information Administration, which provides data on commercial buildings through its periodic sample surveys.

**Censuses and surveys**—Censuses of the construction industry were first

conducted by the Census Bureau for 1929, 1935, and 1939; beginning in 1967, a census has been taken every 5 years (through 2002, for years ending in “2” and “7”). The latest reports are part of the 2002 Economic Census. See text, Section 15, Business Enterprise.

The construction sector of the economic census, covers all employer establishments primarily engaged in (1) building construction by general contractors or operative builders; (2) heavy (nonbuilding) construction by general contractors; and (3) construction by special trade contractors. This sector includes construction management and land subdividers and developers. The 2002 census was conducted in accordance with the 2002 North American Industrial Classification System (NAICS). See text, Section 15, Business Enterprise.

From 1850 through 1930, the Census Bureau collected some housing data as part of its censuses of population and agriculture. Beginning in 1940, separate censuses of housing have been taken at 10-year intervals. For the 1970 and 1980 censuses, data on year-round housing units were collected and issued on occupancy and structural characteristics, plumbing facilities, value, and rent; for 1990, such characteristics were presented for all housing units.

The American Housing Survey (*Current Housing Reports* Series H-150 and H-170), which began in 1973, provided an annual and ongoing series of data on selected housing and demographic characteristics until 1983. In 1984, the name of the survey was changed from the Annual Housing Survey. Currently, national data are collected every other year, and data for selected metropolitan areas are collected on a rotating basis. All samples represent a cross section of the housing stock in their respective areas. Estimates are subject to both sampling and nonsampling errors; caution should therefore be used in making comparisons between years.

Data on residential mortgages were collected continuously from 1890 to 1970,

except 1930, as part of the decennial census by the Census Bureau. Since 1973, mortgage status data, limited to single family homes on less than 10 acres with no business on the property, have been presented in the American Housing Survey. Data on mortgage activity are covered in Section 25, Banking and Finance.

**Housing units**—In general, a housing unit is a house, an apartment, a group of rooms or a single room occupied or intended for occupancy as separate living

quarters; that is, the occupants live separately from any other individual in the building, and there is direct access from the outside or through a common hall. Transient accommodations, barracks for workers, and institutional-type quarters are not counted as housing units.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

**Table 961. Construction—Establishments, Employees, and Payroll by Kind of Business (NAICS Basis): 2007 and 2008**

[7,268 represents 7,268,000. Covers establishments with payroll. Excludes most government employees, railroad employees, and self-employed persons. Kind-of-business classification based on North American Industry Classification System (NAICS), 2002. For statement on methodology, see Appendix III]

**Table 962. Construction Materials—Producer Price Indexes: 1990 to 2010**

[1982 = 100, except as noted. Data for 2010 are preliminary. For discussion of producer price indexes, see text, Section 14. This index, more formally known as the special commodity grouping index for construction materials, covers materials incorporated as integral part of a building or normally installed during construction and not readily removable. Excludes consumer durables such as kitchen ranges, refrigerators, etc. This index is not the same as the stage-of-processing index of intermediate materials and components for construction]

<sup>1</sup> Based on 2000 census controls. <sup>2</sup> Includes other races not shown separately. <sup>3</sup> The 2003 American Housing Survey (AHS) allowed respondents to choose more than one race. Beginning in 2003, data represent householders who selected this race group only and exclude householders reporting more than one race. The AHS in prior years only allowed respondents to report one race group. See also comments on race in the text for Section 1 and the below cited source. <sup>4</sup> Persons of Hispanic origin may be any race.

## Section 21

# Manufactures

---

This section presents summary data for manufacturing as a whole and more detailed information for major industry groups and selected products. The types of measures shown at the different levels include data for establishments, employment and payroll, value and quantity of production and shipments, value added by manufacture, inventories, and various indicators of financial status.

The principal sources of these data are U.S. Census Bureau reports of the censuses of manufactures conducted every 5 years, the *Annual Survey of Manufactures*, and *Current Industrial Reports*. Reports on current activities of industries or current movements of individual commodities are compiled by such government agencies as the Bureau of Economic Analysis; Bureau of Labor Statistics; the Department of Commerce, International Trade Administration; and by private research or trade associations.

The Quarterly Financial Report publishes up-to-date aggregate statistics on the financial results and position of U.S. corporations. Based upon a sample survey, the QFR presents estimated statements of income and retained earnings, balance sheets, and related financial and operating ratios for manufacturing corporations with assets of \$250,000 or over, and mining, wholesale trade and retail trade corporations with assets of \$50 million and over or above industry specific receipt cut-off values. These statistical data are classified by industry and by asset size.

Several private trade associations provide industry coverage for certain sections of the economy. They include American Iron and Steel Institute (Table 1029), Consumer Electronics Association (Table 1033), and the Aerospace Industries Association (Tables 1038 and 1040).

### **Censuses and annual surveys—**

The first census of manufactures covered the year 1809. Between 1809 and 1963,

a census was conducted at periodic intervals. Since 1967, it has been taken every 5 years (for years ending in “2” and “7”). Results from the 2002 census are presented in this section utilizing the North American Industry Classification System (NAICS). For additional information see text, Section 15, Business Enterprise, and the Census Bureau Web site at <<http://www.census.gov/econ/census07/>>. Census data, either directly reported or estimated from administrative records, are obtained for every manufacturing plant with one or more paid employees.

The *Annual Survey of Manufactures* (ASM), conducted for the first time in 1949, collects data for the years between censuses for the more general measure of manufacturing activity covered in detail by the censuses. The annual survey data are estimates derived from a scientifically selected sample of establishments. The Annual Survey of Manufactures is a sample survey of approximately 50,000 establishments. A new sample is selected at 5-year intervals beginning the second survey year subsequent to the Economic Census—Manufacturing. Since 2009 is the second survey year following the 2007 Economic Census, a new sample was selected based on the 2007 Economic Census—Manufacturing. The sample was supplemented by new establishments entering business in 2007 and 2008.

In 2007, there were approximately 328,500 active manufacturing establishments. For sample efficiency and cost considerations, the 2007 manufacturing population is partitioned into two groups: (1) establishments eligible to be mailed a questionnaire and (2) establishments not eligible to be mailed a questionnaire.

### **Establishments and classification—**

Each of the establishments covered in the 2007 Economic Census—Manufacturing was classified in 1 of 480 industries (473 manufacturing industries and

7 former manufacturing industries) in accordance with the industry definitions in the 2007 NAICS manual. In the NAICS system, an industry is generally defined as a group of establishments that have similar production processes. To the extent practical, the system uses supply-based or production-oriented concepts in defining industries. The resulting group of establishments must be significant in terms of number, value added by manufacture, value of shipments, and number of employees. Establishments frequently make products classified both in their industry (primary products) and other industries (secondary products). Industry statistics (employment, payroll, value added by manufacture, value of shipments, etc.) reflect the activities of the establishments, which may make both primary and secondary products. Product statistics, however, represent the output of all establishments without regard for the classification of the producing establishment. For this reason, when relating the industry statistics, especially the value of shipments, to the product statistics, the composition of the industry's output should be considered.

**Establishment**—An establishment is a single physical location where business is

conducted or where services or industrial operations are performed. Data in this sector includes those establishments where manufacturing is performed. A separate report is required for each manufacturing establishment (plant) with one employee or more that is in operation at any time during the year. An establishment not in operation for any portion of the year is requested to return the report form with the proper notation in the "Operational Status" section of the form. In addition, the establishment is requested to report data on any employees, capital expenditures, inventories, or shipment from inventories during the year.

**Durable goods**—Items with a normal life expectancy of 3 years or more. Automobiles, furniture, household appliances, and mobile homes are common examples.

**Nondurable goods**—Items which generally last for only a short time (3 years or less). Food, beverages, clothing, shoes, and gasoline are common examples.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Table 1007. Gross Domestic Product in Current and Real (2005) Dollars by Industry: 2000 to 2010

[In billions of dollars (9,951.5 represents \$9,951,500,000,000). Data include nonfactor charges (capital consumption allowances, indirect business taxes, etc.) as well as factor charges against gross product; corporate profits and capital consumption allowances have been shifted from a company to an establishment basis]

<sup>1</sup> North American Industrial Classification System, 2002; see text, Section 15. <sup>2</sup> Includes employment and payroll at administrative offices and auxiliary units. All employees represents the average of production workers plus all other employees for the payroll period ended nearest the 12th of March. Production workers represent the average of the employment for the payroll periods ended nearest the 12th of March, May, August, and November. <sup>3</sup> Adjusted value added; takes into account (a) value added by merchandising operations (that is, difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) net change in finished goods and work-in-process inventories between beginning and end of year. <sup>4</sup> Includes extensive and unmeasurable duplication from shipments between establishments in the same industry classification. <sup>5</sup> Includes industries not shown separately.

<sup>1</sup> Includes all full-time and part-time employees on the payrolls of operating manufacturing establishments during any part of the pay period that included the 12th of the month. Included are employees on paid sick leave, paid holidays, and paid vacations; not included are proprietors and partners of unincorporated businesses. <sup>2</sup> Value added is derived by subtracting the cost of materials, supplies, containers, fuel, purchased electricity, and contract work from the value of shipments (products manufactured plus receipts for services rendered). The result of this calculation is adjusted by the addition of value added by merchandising operations (i.e., the difference between the sales value and the cost of merchandise sold without further manufacture, processing, or assembly) plus the net change in finished goods and work-in-process between the beginning and end of year inventories. <sup>3</sup> Includes extensive and unmeasurable duplication from shipments between establishments in the same industry classification.

**Table 1023. Manufacturing Corporations—Assets and Profits by Asset Size: 1990 to 2010**

[In millions of dollars (2,629,458 represents \$2,629,458,000,000). Corporations and assets as of end of 4th quarter; profits for entire year. Through 2000, based on Standard Industrial Classification code (SIC); beginning 2001, based on the North American Industry Classification System; see text, Section 15. For corporations above a certain asset value based on complete canvass. The asset value for complete canvass was raised in 1988 to \$50 million and in 1995 to \$250 million. Asset sizes less than these values are sampled, except as noted. For details regarding Survey description, data analysis and methodology, see source, fourth quarter report. Minus sign (–) indicates loss]

Year	Total	Asset-size class						
		Under \$10 million <sup>1</sup>	\$10 to \$25 million	\$25 to \$50 million	\$50 to \$100 million	\$100 to \$250 million	\$250 million to \$1 billion	\$1 billion and over

Transmitting, industrial, and special purpose electron tubes <sup>1</sup> .....	3344111	652	690	734	806	773
Receiving type electron tubes <sup>2</sup> .....	3344114	621	216	(D)	(D)	(D)
Electron tubes and parts .....	3344117	72	49	36	31	30
Bare printed circuit boards.....	3344120	4,856	4,933	4,443	5,269	4,180
Integrated microcircuits <sup>3</sup> .....	3344131	61,631	54,963	49,781	51,104	40,029
Transistors .....	3344134	603	679	599	409	358
Diodes and rectifiers .....	3344137	372	467	457	458	331
Other semiconductor devices <sup>4</sup> .....	334413A	8,330	10,483	10,176	11,363	11,983
Capacitors for electronic circuitry .....	3344140	1,113	1,064	945	937	745
Resistors for electronic circuitry.....	3344150	653	660	645	622	489
Electronic coils, transformers, and other inductors ...	3344160	1,216	1,231	1,393	1,380	1,058
Connectors for electronic circuitry .....	3344170	3,589	3,980	4,189	4,065	3,036
Printed circuit assemblies, loaded boards and modules <sup>5</sup> .....	334418B	20,106	19,591	20,382	20,257	15,001
Crystals, filters, piezoelectric, and other related electronic devices <sup>6</sup> .....	3344191	779	754	689	656	552
All other miscellaneous transducers <sup>7</sup> .....	3344194	1,401	1,323	1,466	1,352	1,035
Switches, mechanical types for electronic circuitry ...	3344197	794	645	662	581	415
Microwave components and devices <sup>8</sup> .....	334419A	1,306	1,470	1,541	1,286	1,170
All other miscellaneous electronic components.....	334419E	4,040	4,346	4,831	4,772	3,889

D Figure withheld to avoid disclosure. NA Not available. <sup>1</sup> Except X-ray. <sup>2</sup> Including cathode ray (new and rebuilt). <sup>3</sup> Includes semiconductor networks, microprocessors, and MOS memories. <sup>4</sup> Includes semiconductor parts such as chips, wafers, and heat sinks. <sup>5</sup> Printed circuit boards with inserted electronic components. <sup>6</sup> Except microwave filters. <sup>7</sup> Includes electrical-electronic input/output transducers. <sup>8</sup> Except antennae, tubes, and semiconductors

## Section 22

# Wholesale and Retail Trade

---

This section presents statistics relating to the distributive trades, specifically wholesale trade and retail trade. Data shown for the trades are classified by kind of business and cover sales, establishments, employees, payrolls, and other items. The principal sources of these data are from the U.S. Census Bureau and include the *2007 Economic Census*, annual and monthly surveys, and the *County Business Patterns* program. These data are supplemented by several tables from trade associations, such as the National Automobile Dealers Association (Table 1057). Several notable research groups are also represented, such as Nielsen Claritas (Table 1059).

Data on wholesale and retail trade also appear in several other sections. For instance, labor force employment and earnings data appear in Section 12, Labor Force, Employment, and Earnings; gross domestic product of the industry (Table 653) appears in Section 13, Income, Expenditures, Poverty, and Wealth; and financial data (several tables) from the quarterly *Statistics of Income Bulletin*, published by the Internal Revenue Service, appear in Section 15, Business Enterprise.

**Censuses**—Censuses of wholesale trade and retail trade have been taken at various intervals since 1929. Beginning with the 1967 census, legislation provides for a census of each area to be conducted every 5 years (for years ending in “2” and “7”). For more information on the most recent census, see the *Guide to the 2007 Economic Census* found at <[http://www.census.gov/econ/census07/www/user\\_guide.html](http://www.census.gov/econ/census07/www/user_guide.html)>. The industries covered in the censuses and surveys of business are defined in the *North American Industry Classification System*, (NAICS). Retail trade refers to places of business primarily engaged in retailing merchandise to the general public; and *wholesale trade*, to establishments primarily engaged in selling goods to other businesses and normally operating from a warehouse or office that have little

or no display of merchandise.

Many Census Bureau tables in this section utilize the 2002 NAICS codes, which replaced the Standard Industrial Classification (SIC) system. NAICS made substantial structural improvements and identifies over 350 new industries. At the same time, it causes breaks in time series far more profound than any prior revision of the previously used SIC system. For information on this system and how it affects the comparability of wholesale and retail statistics historically, see text, Section 15, Business Enterprise, and especially the Census Bureau Web site at <<http://www.census.gov/eos/www/naics>>. In general, the 2007 Economic Census has three series of publications for these two sectors: 1) subject series with reports such as product lines and establishment and firm sizes, 2) geographic reports with individual reports for each state, and 3) industry series with individual reports for industry groups. For information on these series, see the Census Bureau Web site at <<http://www.census.gov/econ/census07/>>.

**Current surveys**—Current sample surveys conducted by the Census Bureau cover various aspects of wholesale and retail trade. Its *Monthly Retail Trade and Food Services* release at <<http://www.census.gov/retail>> contains monthly estimates of sales, inventories, and inventory/sales ratios for the United States, by kind of business. Annual figures on retail sales, year-end inventories, purchases, accounts receivable, and gross margins by kind of business are located on the Census Bureau Web site at <<http://www.census.gov/econ/retail.htm>>. Additionally, annual data for accommodation and food services are located at the same site.

Statistics from the Census Bureau’s monthly wholesale trade survey include national estimates of sales, inventories, and inventory/sales ratios for merchant wholesalers excluding manufacturers’ sales branches and offices. Data are

presented by major summary groups “durable and nondurable,” and 4-digit NAICS industry groups. Merchant wholesalers excluding manufacturers’ sales branches and offices are those wholesalers who take title to the goods they sell (e.g., jobbers, exporters, importers, industrial distributors). These data, based on reports submitted by a sample of firms, appear in the *Monthly Wholesale Trade Report* at <http://www.census.gov/wholesale>. This report, along with monthly sales, inventories, and inventories/sales ratios, also provides data on annual sales, inventories, and year-end inventories/sales ratios. The Annual Wholesale Trade Survey provides data on merchant wholesalers excluding manufacturer sales branches and offices as well as summary data for all merchant wholesalers. This report also provides separate data for manufacturer sales branches and offices, and electronic markets, agents, brokers, and commission merchants. Also included in the *Monthly Wholesale Trade Report* are data on annual sales, year-end inventories, inventories/sales ratios, operating expenses, purchases, and gross margins. Data are presented by major summary groups “durable and nondurable” and 4-digit NAICS industry groups for sales,

end-of-year inventories, and operating expenses. The reports are available as documents on the Census Bureau Web site at <http://www.census.gov/econ/wholesale.htm>.

**E-commerce**—Electronic commerce (or e-commerce) is sales of goods and services over the Internet and extranet, electronic data interchange (EDI), or other online systems. Payment may or may not be made online. E-commerce data were collected in four separate Census Bureau surveys. These surveys used different measures of economic activity such as shipments for manufacturing, sales for wholesale and retail trade, and revenues for service industries. Consequently, measures of total economic and e-commerce activity vary by economic sector, are conceptually and definitionally different, and therefore, are not additive. This edition has several tables on e-commerce sales, such as Tables 1045, 1055, and 1056 in this section; and 1278 in Section 27, Accommodation, Food Services, and Other Services.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

**Table 1042. Wholesale and Retail Trade—Establishments, Sales, Payroll, and Employees: 2002 and 2007**

[435.5 represents \$435,500. Covers establishments with payroll. For statement on methodology, see Appendix III]

**Table 1059. Retail Trade and Food Services—Sales by Type of Store and State: 2009**

[In millions of dollars (4,320,921 represents \$4,320,921,000,000). Retail Market Power is based on the Census of Retail Trade (CRT), in addition to monthly and annual surveys of retail trade data from the Bureau of the Census and Claritas' current-year demographic estimates. Sales data is calculated by using business sales estimates, business locations, and employee counts. Sales at the national level by NAICS code are validated against the 2002 Economic Census (NAICS Majors only) and County Business Patterns data provided by the Census Bureau. Based on North American Industry Classification System (NAICS), 2002; see text, Section 15]

State	Total retail sales plus food services and drinking places (NAICS 44-45, 722)	All retail stores <sup>1</sup> (NAICS 44-45)	Motor vehicle and parts dealers (NAICS 441)	Furniture and home furnishings (NAICS 442)	Electronics and appliances (NAICS 443)	Building and material supply (NAICS 444)	Food and beverage stores (NAICS 445)	Health and personal care (NAICS 446)

**Table 1061. Shopping Centers—Number and Gross Leasable Area: 1990 to 2010**

[As of December 31. A shopping center is a group of architecturally unified commercial establishments built on a site that is planned, developed, owned, and managed as an operating unit related in its location, size, and type of shops to the trade area that the unit serves. The unit provides on-site parking in definite relationship to the types and total size of the stores. The data base attempts to include all centers with three or more stores. Estimates are based on a sample of data available on shopping center properties; for details, contact source]

Year	Total	Gross leasable area (square feet)					
		Less than 100,001	100,001 to 200,000	200,001 to 400,000	400,001 to 800,000	800,001 to 1,000,000	More than 1,000,000

## Section 23

# Transportation

---

This section presents data on civil air transportation, both passenger and cargo, and on water transportation, including inland waterways, oceanborne commerce, the merchant marine, cargo, and vessel tonnages.

This section also presents statistics on revenues, passenger and freight traffic volume, and employment in various revenue-producing modes of the transportation industry, including motor vehicles, trains, and pipelines. Data are also presented on highway mileage and finances, motor vehicle travel, accidents, and registrations; and characteristics of public transit, railroads, and pipelines.

Principal source of transportation data is the annual *National Transportation Statistics* publication of the U.S. Bureau of Transportation Statistics. Principal sources of air and water transportation data are the *Annual Report* issued by the Air Transport Association of America, Washington, DC and the annual *Waterborne Commerce of the United States* issued by the Corps of Engineers of the Department of Army. In addition, the U.S. Census Bureau in its commodity flow survey (part of the census of transportation, taken every 5 years through 2007, for years ending in “2” and “7”) provides data on the type, weight, and value of commodities shipped by manufacturing establishments in the United States, by means of transportation, origin, and destination. The advance reports for 2007 are part of the 2007 Economic Census. This census was conducted in accordance with the 2002 North American Industry Classification System (NAICS). See text, Section 15, Business Enterprise, for a discussion of the Economic Census and NAICS.

The Bureau of Transportation Statistics (BTS) was established within the U.S. Department of Transportation (USDOT) in 1992 to collect, report, and analyze transportation data. Today, BTS is a component of the USDOT Research and Innovative Technology Administration

(RITA). BTS products include reports to Congress, the Secretary of Transportation, and stakeholders in the nation’s transportation community. These stakeholders include: federal agencies, state and local governments, metropolitan planning organizations, universities, the private sector and general public. Congress requires the BTS to report (congressional mandate, laid out in 49 U.S.C. 111 (1)) on transportation statistics to the President and Congress.

*The Transportation Statistics Annual Report* (TSAR), provides a data overview of U.S. transportation issues. As required by Congress, each TSAR has two essential components: a review of the state of transportation statistics with recommendations for improvements and a presentation of the data. The BTS publication *National Transportation Statistics (NTS)*, a companion report to the TSAR, has more comprehensive and longer time-series data. NTS presents information on the U.S. transportation system, including its physical components, safety record, economic performance, energy use, and environmental impacts. The BTS publication *State Transportation Statistics* presents a statistical profile of transportation in the 50 states and the District of Columbia. This profile includes infrastructure, freight movement and passenger travel, system safety, vehicles, transportation-related economy and finance, energy usage and the environment.

The principal compiler of data on public roads and on operation of motor vehicles is the U.S. Department of Transportation’s (DOT) Federal Highway Administration (FHWA). These data appear in FHWA’s annual *Highway Statistics* and other publications.

The U.S. National Highway Traffic Safety Administration (NHTSA), through its *Traffic Safety Facts FARS/GES Annual Report*, presents descriptive statistics about traffic crashes of all severities, from those that result in property damage to those that result in the loss of human life. The data for this report is a compilation of

motor vehicle crash data from the *Fatality Analysis Reporting System (FARS)* and the *General Estimates System (GES)*. For other publications and reports, go to the National Center for Statistics and Analysis (NCSA), Publications and Data Request. The Web site is located at <<http://wwwrd.nhtsa.dot.gov/CAT/index.aspx>>. DOT's Federal Railroad Administration (FRA), Office of Safety Analysis presents railroad safety information including accidents and incidents, inspections and highway-rail crossing data in its annual report *Railroad Safety Statistics*. The Web site is located at <<http://safetydata.fra.dot.gov/officeofsafety>>.

Data are also presented in many nongovernment publications. Among them are the weekly and annual *Cars of Revenue Freight Loaded* and the annual *Yearbook of Railroad Facts*, both published by the Association of American Railroads, Washington, DC; *Public Transportation Fact Book*, containing electric railway and motorbus statistics, published annually by the American Public Transportation Association, Washington, DC; and *Injury Facts*, issued by the National Safety Council, Chicago, IL.

**Civil aviation**—Federal promotion and regulation of civil aviation have been carried out by the Federal Aviation Administration (FAA) and the Civil Aeronautics Board (CAB). The CAB promoted and regulated the civil air transportation industry within the United States and between the United States and foreign countries. The Board granted licenses to provide air transportation service, approved or disapproved proposed rates and fares, and approved or disapproved proposed agreements and corporate relationships involving air carriers. In December 1984, the CAB ceased to exist as an agency. Some of its functions were transferred to the DOT, as outlined below. The responsibility for investigation of aviation accidents resides with the National Transportation Safety Board.

The Office of the Secretary, DOT aviation activities include: negotiation of international air transportation rights, selection of U.S. air carriers to serve capacity-controlled international markets, oversight of international rates and fares, maintenance

of essential air service to small communities, and consumer affairs. DOT's Bureau of Transportation Statistics (BTS) handles aviation information functions formerly assigned to CAB. Prior to BTS, the Research and Special Programs Administration handled these functions.

The principal activities of the FAA include: the promotion of air safety; controlling the use of navigable airspace; prescribing regulations dealing with the competency of airmen, airworthiness of aircraft and air traffic control; operation of air route traffic control centers, airport traffic control towers, and flight service stations; the design, construction, maintenance, and inspection of navigation, traffic control, and communications equipment; and the development of general aviation.

The CAB published monthly and quarterly financial and traffic statistical data for the certificated route air carriers. BTS continues these publications, including both certificated and noncertificated (commuter) air carriers. The FAA annually publishes data on the use of airway facilities; data related to the location of airmen, aircraft, and airports; the volume of activity in the field of nonair carrier (general aviation) flying; and aircraft production and registration.

General aviation comprises all civil flying (including such commercial operations as small demand air taxis, agriculture application, powerline patrol, etc.) but excludes certificated route air carriers, supplemental operators, large-aircraft commercial operators, and commuter airlines.

**Air carriers and service**—The CAB previously issued "certificates of public convenience and necessity" under Section 401 of the Federal Aviation Act of 1958 for scheduled and nonscheduled (charter) passenger services and cargo services. It also issued certificates under Section 418 of the Act to cargo air carriers for domestic all-cargo service only. The DOT Office of the Secretary now issues the certificates under a "fit, willing, and able" test of air carrier operations. Carriers operating only a 60-seat-or-less aircraft are given exemption authority to carry passengers, cargo, and mail in scheduled

and nonscheduled service under Part 298 of the DOT (formerly CAB) regulations. Exemption authority carriers who offer scheduled passenger service to an essential air service point must meet the “fit, willing, and able” test.

**Vessel shipments, entrances, and clearances**—Shipments by dry cargo vessels comprise shipments on all types of watercraft, except tanker vessels; shipments by tanker vessels comprise all types of cargo, liquid and dry, carried by tanker vessels. A vessel is reported as entered only at the first port which it enters in the United States, whether or not cargo is unloaded at that port.

A vessel is reported as cleared only at the last port at which clearance is made to a foreign port, whether or not it takes on cargo. Army and Navy vessels entering or clearing without commercial cargo are not included in the figures.

**Units of measurement**—Cargo (or freight) tonnage and shipping weight both represent the gross weight of the cargo including the weight of containers, wrappings, crates, etc. However, shipping weight excludes lift and cargo vans and similar substantial outer containers. Other tonnage figures generally refer to stowing capacity of vessels, 100 cubic feet being called 1 ton. Gross tonnage comprises the space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers, or crew, with certain minor exceptions. Net or registered tonnage is the gross tonnage less the spaces occupied by the propelling machinery, fuel, crew quarters, master’s cabin, and navigation spaces. Substantially, it represents space available for cargo and passengers. The net tonnage capacity of a ship may bear little relation to weight of cargo. Deadweight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is, therefore, the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety.

**Federal-aid highway systems**—The Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 eliminated

the historical Federal-Aid Highway Systems and created the National Highway System (NHS) and other federal-aid highway categories. The final NHS was approved by Congress in December of 1995 under the National Highway System Designation Act.

**Functional systems**—Roads and streets are assigned to groups according to the character of service intended. The functional systems are (1) arterial highways that generally handle the long trips, (2) collector facilities that collect and disperse traffic between the arterials and the lower systems, and (3) local roads and streets that primarily serve direct access to residential areas, farms, and other local areas.

**Regulatory bodies**—The Federal Energy Regulatory Commission (FERC) is an independent agency that regulates the interstate transmission of electricity, natural gas, and oil. FERC also reviews proposals to build liquefied natural gas (LNG) terminals and interstate natural gas pipelines as well as licensing hydropower projects. The Energy Policy Act of 2005 gave FERC additional responsibilities such as regulating the transmission and wholesale sales of electricity in interstate commerce. See source for more details.

**Railroads**—The Surface Transportation Board (STB) was created in the Interstate Commerce Commission Termination Act of 1995, Pub. L. No. 104-88, 109 Stat. 803 (1995) (ICCTA), and is the successor agency to the Interstate Commerce Commission. The STB is an economic regulatory agency that Congress charged with the fundamental missions of resolving railroad rate and service disputes and reviewing proposed railroad mergers. The STB is decisionally independent, although it is administratively affiliated with the Department of Transportation.

The STB serves as both an adjudicatory and a regulatory body. The agency has jurisdiction over railroad rate and service issues and rail restructuring transactions (mergers, line sales, line construction, and line abandonment); certain trucking company, moving van, and noncontiguous ocean shipping company rate matters; certain intercity passenger bus company

structure, financial, and operational matters; and rates and services of certain pipelines not regulated by the Federal Energy Regulatory Commission. Other ICC regulatory functions were either eliminated or transferred to the Federal Highway Administration or the Bureau of Transportation Statistics within DOT.

Class I Railroads are regulated by the STB and subject to the Uniform System of Accounts and required to file annual and periodic reports. Railroads are classified based on their annual operating revenues. The class to which a carrier belongs is determined by comparing its adjusted operating revenues for 3 consecutive years to the following scale: Class I, \$250 million or more; Class II, \$20 million to \$250 million; and Class III, \$0 to \$20 million. Operating revenue dollar ranges are indexed for inflation.

**Postal Service**—The U.S. Postal Service provides mail processing and delivery services within the United States. The Postal Accountability and Enhancement Act of 2006 was the first major legislative change to the Postal Service since 1971 when the Postal Reorganization Act of 1970 created the Postal Service as an independent establishment of the Federal Executive Branch. The Act of 2006 changed the way the U.S. Postal Service operates and conducts business. Now annual rate increases for market

dominant products are linked to the Consumer Price Index and the Postal Service has more flexibility for pricing competitive products, enabling it to respond to dynamic market conditions and changing customer needs.

Revenue and cost analysis describes the Postal Service's system of attributing revenues and costs to classes of mail and service. This system draws primarily upon probability sampling techniques to develop estimates of revenues, volumes, and weights, as well as costs by class of mail and special service. The costs attributed to classes of mail and special services are primarily incremental costs which vary in response to changes in volume; they account for roughly 60 percent of the total costs of the Postal Service. The balance represents "institutional costs." Statistics on revenues, volume of mail, and distribution of expenditures are presented in the Postal Service's annual report, *Cost and Revenue Analysis*, and its *Annual Report of the Postmaster General* and its annual *Comprehensive Statement on Postal Operations*.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Table 1063. Transportation-Related Components of U.S. Gross Domestic Product: 2000 to 2009

[In billions of dollars (1,045.3 represents \$1,045,300,000,000), except percent. For explanation of chained dollars, see Section 13 text. Minus sign (–) indicates a decrease]

Item	2000	2005	2006	2007	2008	2009

— Represents or rounds to zero. NA Not available. Z Less than 50. <sup>1</sup> See footnote 1, Table 1078. Injuries classified as serious. <sup>2</sup> See footnote 2, Table 1078. Injuries classified as serious. <sup>3</sup> See footnote 3, Table 1078. Injuries classified as serious. <sup>4</sup> Data on deaths are from U.S. National Highway Traffic Safety Administration and are based on deaths within 30 days of the accident. Includes only police reported crashes. For more details, see Table 1103. <sup>5</sup> Accidents which result in damages to railroad property. Grade crossing accidents are also included when classified as a train accident. Deaths exclude fatalities in railroad-highway grade crossing accidents. <sup>6</sup> Includes motor bus, commuter rail, heavy rail, light rail, demand response, van pool, and automated guideway. Starting with 2002, only injuries requiring immediate medical treatment away from the scene now qualify as reportable. <sup>7</sup> Accidents resulting in death, injury, or requiring medical treatment beyond first aid; damages exceeding \$500; or a person's disappearance. <sup>8</sup> Covers accidents involving commercial vessels which must be reported to U.S. Coast Guard if there is property damage exceeding \$25,000; material damage affecting the seaworthiness or efficiency of a vessel; stranding or grounding; loss of life; or injury causing a person's incapacity for more than 3 days. <sup>9</sup> Beginning 1990, pipeline accidents/incidents are credited to year of occurrence; prior data are credited to the year filed. <sup>10</sup> Incidents, deaths, and injuries involving hazardous materials cover all types of transport, exclude pipelines and bulk, nonpackaged water incidents. <sup>11</sup> The data reported under accident are incident numbers.

**Table 1074. Airline Cost Indexes: 1980 to 2009**

[2000 = 100. To be included in the cost index, carriers must have met the following criteria on an annual basis: 1) must report both passenger revenue and revenue passenger miles (RPMs) and 2) passenger revenue must be greater than or equal to 25 percent of total operating revenue. Data prior to 1990 excludes passenger airlines with annual revenue less than \$100 million]

Index	1980	1990	1995	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009

Table 1080. On-Time Flight Arrivals and Departures at Major U.S. Airports: 2010

[In percent. Quarterly, based on gate arrival and departure times for domestic scheduled operations of U.S. major airlines. All U.S. airlines with 1 percent or more of total U.S. domestic scheduled airline passenger revenues are required to report on-time data. A flight is considered on time if it operated less than 15 minutes after the scheduled time shown in the carrier's computerized reservation system. See source for data on individual airlines]

Airport	On-time arrivals				On-time departures			
	1st quarter	2nd quarter	3rd quarter	4th quarter	1st quarter	2nd quarter	3rd quarter	4th quarter

NA Not available. X Not applicable. <sup>1</sup> Existing airports, heliports, seaplane bases, etc. recorded with Federal Aviation Administration (FAA). Includes civil and joint-use civil-military airports, heliports, STOL (short takeoff and landing) ports, and seaplane bases in the United States and its territories. Sole-use military airports are included beginning in 2007. Includes U.S. outlying areas. Airport-type definitions: Public—publicly owned and under control of a public agency; private—owned by a private individual or corporation. May or may not be open for public use. <sup>2</sup> Certificated airports serve air-carriers with aircraft seating more than 9 passengers. As of 2005, the Federal Aviation Administration (FAA) no longer certificates military airports. <sup>3</sup> Air-carrier aircraft are aircraft carrying passengers or cargo for hire under 14 CFR 121 (large aircraft—more than 30 seats) and 14 CFR 135 (small aircraft—30 seats or fewer). Beginning in 1990, the number of aircraft is the monthly average reported in use for the last three months of the year. Prior to 1990, it was the number of aircraft reported in use during December of a given year. <sup>4</sup> 2000 dip in helicopters due to estimating methods. <sup>5</sup> Beginning 1995 excludes commuters. <sup>6</sup> Data for 1980 are for helicopters only. <sup>7</sup> All certificates on record. No medical examination required.

<sup>1</sup> Bridges are structurally deficient if they have been restricted to light vehicles, require immediate rehabilitation to remain open, or are closed. <sup>2</sup> Bridges are functionally obsolete if they have deck geometry, load carrying capacity, clearance or approach roadway alignment that no longer meet the criteria for the system of which the bridge is carrying a part.

Ethanol in Gasohol . . . . .	1,000 gallons . . . . .	4,013,679	6,885,690	9,435,428	10,753,990

— Represents zero. X Not applicable. <sup>1</sup> Excludes gasoline-electric and diesel-electric hybrids because the input fuel is gasoline or diesel rather than an alternative transportation fuel. <sup>2</sup> The remaining portion of E85 percent ethanol is gasoline. Consumption data include the gasoline portion of the fuel. <sup>3</sup> For 2009, the EIA estimates that the number of E85 vehicles that are capable of operating on E85, gasoline, or both, is about 10 million. Many of these alternative-fueled vehicles (AFVs) are sold and used as traditional gasoline-powered vehicles. In this table, AFVs in use include only those E85 vehicles believed to be used as AFVs. These are primarily fleet-operated vehicles. <sup>4</sup> May include P-Series fuel or any other fuel designated by the Secretary of Energy as an alternative fuel in accordance with the Energy Policy Act of 1995. <sup>5</sup> Gasoline equivalent gallons.

**Table 1098. State Motor Vehicle Registrations, 1990 to 2009, Motorcycle Registrations and Licensed Drivers by State: 2009**

[In thousands (188,798 represents 188,798,000). Motor vehicle registrations cover publicly, privately, and commercially owned vehicles. For uniformity, data have been adjusted to a calendar-year basis as registration years in states differ; figures represent net numbers where possible, excluding reregistrations and nonresident registrations. See also Table 1096]

State	Motor vehicle registrations <sup>1</sup>						2009		Motor cycle registra- tions, <sup>2</sup> 2009	Licensed drivers, 2009

<sup>1</sup> Value of extra time (delay) and the extra fuel consumed by vehicles traveling at slower speeds. Fuel cost per gallon is the average price for each state. <sup>2</sup> The hours of extra travel time divided by the number of urban area peak period travelers. This is an annual measure indicating the sum of all extra travel time that would occur during the year for the average traveler.

**Table 1100. Commuting to Work by State: 2009**

[In percent, except as indicated (138,592 represents 138,592,000). For workers 16 years old and over. The American Community Survey universe includes the household population and the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see Appendix III]

State	Total workers (1,000)	Percent of workers who—						Mean travel time to work (min.)
		Commuted by car, truck, or van		Used public transportation <sup>1</sup>	Walked	Used other means <sup>2</sup>	Worked at home	
		Drove alone	Car- pooled

<sup>1</sup> FHWA updated VM-1 from 2000 to 2009 using on an enhanced methodology implemented in March 2011. Prior to 2000, "Light Duty Vehicles Short WB" were categorized as "Cars"; "Light Duty Vehicles Long WB" were categorized as "Vans, pickups, sport utility vehicles." <sup>2</sup> Motorcycles included with "Cars" through 1994; thereafter in total, not shown separately. <sup>3</sup> Light Duty Vehicles Short WB—passenger cars, light trucks, vans and sport utility vehicles with a wheelbase (WB) equal to or less than 121 inches. Light Duty Vehicles Long WB—large passenger cars, vans, pickup trucks, and sport/utility vehicles with wheelbases (WB) larger than 121 inches. <sup>4</sup> Includes school buses. <sup>5</sup> Includes combinations. <sup>6</sup> 2000 to 2009: Single-Unit—single frame trucks that have 2-Axles and at least 6 tires or a gross vehicle weight rating exceeding 10,000 lbs.

**Table 1105. Fatal Motor Vehicle Accidents—National Summary: 1990 to 2009**

[Based on data from the Fatality Analysis Reporting System (FARS). FARS gathers data on accidents that result in loss of human life. FARS is operated and maintained by National Highway Traffic Safety Administration's (NHTSA), National Center for Statistics and Analysis (NCSA). FARS data are gathered on motor vehicle accidents that occurred on a roadway customarily open to the public, resulting in the death of a person within 30 days of the accident. Collection of these data depend on the use of police, hospital, medical examiner/coroner, and Emergency Medical Services reports; state vehicle registration, driver licensing, and highway department files; and vital statistics documents and death certificates. See source for further detail]

Item	1990	1995	2000	2005	2006	2007	2008	2009
<b>Fatal crashes, total</b> .....	<b>39,836</b>	<b>37,241</b>	<b>37,526</b>	<b>39,252</b>	<b>38,648</b>	<b>37,435</b>	<b>34,172</b>	<b>30,797</b>

<sup>1</sup> Deaths within 30 days of the accident. Starting with 1995, total does not include motorcyclist data. <sup>2</sup> Trucks with a gross vehicle weight rating of 10,000 pounds or less, including pickups, vans, truck-based station wagons, and utility vehicles. <sup>3</sup> Trucks with a gross vehicle weight rating of over 10,000 pounds. <sup>4</sup> VMT = vehicle miles of travel. <sup>5</sup> BAC = blood alcohol concentration.

**Table 1109. Distracted Drivers—Crashes/Road Fatalities and Injuries: 2005 to 2009**

["Distraction" is defined as a specific type of inattention that occurs when drivers divert their attention from the driving task to focus on some other activity instead. It is worth noting that "distraction" is a subset of "inattention" (which also includes fatigue, physical conditions of the driver, and emotional conditions of the driver). For more information, see the appendices of the report at <<http://www-nrd.nhtsa.dot.gov/Pubs/811379.pdf>>]

**Table 1110. Fatalities by Highest Driver Blood Alcohol Concentration (BAC) in the Crash: 1990 to 2009**

[g/dl means grams per deciliter. A motor vehicle crash is considered to be alcohol-impaired if at least one driver involved in the crash is determined to have had a BAC of .08 g/dL or higher. Thus, any fatality that occurs in an alcohol-impaired crash is considered an alcohol-impaired-driving fatality. The term "alcohol-impaired" does not indicate that a crash or fatality was caused by the presence of alcohol. A person is considered to be legally impaired with a BAC of .08 g/dl or more]

Table 1115. Passenger Transit Industry—Summary: 1990 to 2009

[16,053 represents \$16,053,000,000. Includes Puerto Rico. Includes aggregate information for all transit systems in the United States. Excludes nontransit services such as taxicab, school bus, unregulated jitney (a small bus or automobile that transport passengers on a route for a small fare), sightseeing bus, intercity bus, and special application mass transportation systems (e.g., amusement parks, airports, island, and urban park ferries). Includes active vehicles only]

Item	Unit	1990	1995	2000	2005	2007	2008	2009

NA Not available. <sup>1</sup> This operation (also called paratransit or dial-a-ride) is comprised of passenger cars, vans or small buses operating in response to calls from passengers or their agents to the transit operator, who then dispatches a vehicle to pick up the passengers and transport them to their destinations. <sup>2</sup> Represents the sum of federal, state, and local assistance, and that portion of directly generated funds that accrue from tax collections, toll transfers from other sectors of operations, and bond proceeds. <sup>3</sup> These are any funds generated from taxes controlled by the transit agency. <sup>4</sup> Funds data are included in local government data through 1993. <sup>5</sup> Through 1990, represents employee equivalents of 2,080 hours = one employee; beginning 1995, equals actual employees.

Table 1116. Top Twenty Cities—Transit Savings: 2011

[Individuals who ride public transportation can save on average \$10,116 annually based on the April 13, 2011 national average gas price and the national unreserved monthly parking rate. On a per month basis, transit riders can save on average \$843 per month. See the monthly press release "Riding Public Transit Saves Individuals" dated April 13 at <<http://www.apta.com/mediacenter/pressreleases/2011/Pages/default.aspx>>. This release and other monthly "Transit Savings" releases contain information and methodology on how savings are calculated. The cities with the highest transit ridership are ranked in order of their transit savings based on the purchase of a monthly public transit pass and factoring in local gas prices for and the local monthly unreserved parking rate]

**Table 1121. Truck Transportation—Summary: 2005 to 2009**

[In millions of dollars (200,519 represents \$200,519,000,000), except where noted. For taxable and tax-exempt employer firms. Covers NAICS 484. Estimates have been adjusted to the results of the 2007 Economic Census. Data are based on the 2002 North American Industry Classification System (NAICS). Data for 2009 are based on 2007 NAICS; see text, this section and Section 15]

Item	2005	2006	2007	2008	2009
<b>Total operating revenue. . . . .</b>	<b>200,519</b>	<b>213,327</b>	<b>217,833</b>	<b>222,529</b>	<b>180,663</b>
Total motor carrier revenue . . . . .	187,996	199,747	204,211	208,835	169,489
Local trucking <sup>1</sup> . . . . .	61,810	66,820	69,367	70,608	61,149
Long-distance trucking <sup>1</sup> . . . . .	126,186	132,927	134,844	138,227	108,340
Size of shipments:					
Less-than-truckload. . . . .	43,102	52,211	53,411	53,909	43,303
Truckload . . . . .	144,894	147,536	150,800	154,926	126,186
Commodities handled:					
Agricultural and fish products . . . . .	16,853	17,660	17,853	18,575	18,585
Grains, alcohol, and tobacco products . . . . .	6,803	8,635	9,509	10,001	8,933
Stone, nonmetallic minerals, and metallic ores . . . . .	13,071	15,050	16,135	15,425	12,664
Coal and petroleum products . . . . .	6,820	7,373	7,990	9,075	7,754
Pharmaceutical and chemical products. . . . .	10,252	10,791	11,750	11,688	9,893
Wood products, textiles, and leathers . . . . .	16,705	16,826	17,686	18,720	14,344
Base metal and machinery . . . . .	15,909	17,570	17,934	18,173	13,689
Electronic, motorized vehicles, and precision instruments . . . . .	14,856	15,529	14,744	15,095	11,553
Used household and office goods . . . . .	11,574	11,994	12,458	11,933	9,794
New furniture and miscellaneous manufactured products. . . . .	21,509	21,544	19,957	20,962	16,271
Other goods. . . . .	53,644	56,775	58,195	59,188	46,009
Hazardous materials . . . . .	15,837	(S)	14,545	14,224	12,679
Origin and destination of shipments:					
U.S. to U.S. . . . .	180,804	191,751	195,667	200,111	162,482
U.S. to Canada . . . . .	1,546	1,804	1,954	2,218	1,652
U.S. to Mexico . . . . .	1,587	1,617	1,563	1,552	1,100
Canada to U.S. . . . .	1,284	1,293	1,177	1,316	1,050
Mexico to U.S. . . . .	1,321	1,718	(S)	1,760	1,538
All other destinations . . . . .	1,454	1,564	1,908	1,878	1,667
Inventory of revenue-generating equipment (1,000):					
Trucks . . . . .	216	238	243	246	237
Owned and/or leased with drivers . . . . .	190	211	215	223	214
Leased without drivers. . . . .	26	27	28	23	23
Truck-tractors. . . . .	854	866	884	858	792
Owned and/or leased with drivers . . . . .	722	723	739	724	678
Leased without drivers. . . . .	132	143	145	134	114
Trailers. . . . .	1,903	1,910	1,927	1,943	1,827
Owned and/or leased with drivers . . . . .	1,560	1,579	1,593	1,630	1,535
Leased without drivers. . . . .	343	331	334	313	292
Highway miles traveled (mil.):					
Total . . . . .	88,067	88,320	88,061	85,924	75,211
By loaded or partially loaded vehicles . . . . .	71,096	71,151	71,215	69,106	60,236
By empty vehicles . . . . .	16,971	17,169	16,846	16,818	14,975

S Estimate does not meet publication standards. <sup>1</sup> Local trucking is the carrying of goods within a single metro area and its adjacent nonurban areas; long-distance trucking is the carrying of goods between metro areas.

2010 (January 4).....	0.44	0.17	0.28	<sup>5</sup> 13.65	2010 (no change)...	0.98	0.98	( <sup>2</sup> )
2011 (April 17).....	0.44	0.20	0.29	<sup>6</sup> 13.25	2011 (no change)...	0.98	0.98	( <sup>2</sup> )

<sup>1</sup> International letter prices after the first ounce vary according to the price group that is applicable to each destination country.  
<sup>2</sup> Aerogrammes were discontinued on May 14, 2007. <sup>3</sup> On May 12, 2008, the Postal Service initiated a zoned pricing structure for Express Mail. Prices for a mail piece weighing up to a half-pound range from \$12.60 to zones 1 and 2 to \$19.50 to zone 8.  
<sup>4</sup> Express Mail prices increased on January 18, 2009. Prices for a mail piece weighing up to a half-pound range from \$13.05 to zones 1 and 2 to \$21.20 to zone 8. <sup>5</sup> Express Mail prices increased on January 4, 2010. Prices for a mail piece weighing up to a half-pound range from \$13.65 to zones 1 and 2 to \$22.20 to zone 8. <sup>6</sup> Express Mail prices changed on January 2, 2011. Prices for a mail piece weighing up to a half-pound range from \$13.25 to zones 1 and 2 to \$26.65 to zone 8.

## Section 24

# Information and Communications

---

This section presents statistics on the various information and communications media: publishing, including newspapers, periodicals, books, and software; motion pictures, sound recordings, broadcasting, and telecommunications; and information services, such as libraries. Statistics on computer use and Internet access are also included. Data on the usage, finances, and operations of the U.S. Postal Service previously shown in this section are now presented in Section 23, Transportation.

### Information industry—

The U.S. Census Bureau's *Service Annual Survey, Information Services Sector*, provides estimates of operating revenue of taxable firms and revenues and expenses of firms exempt from federal taxes for industries in the information sector of the economy. Similar estimates were previously issued in the *Annual Survey of Communications Services*. Data are based on the North American Industry Classification System (NAICS). The information sector is a newly created economic sector. It comprises establishments engaged in the following processes: (a) producing and distributing information and cultural products, (b) providing the means to transmit or distribute these products as well as data or communications, and (c) processing data. It includes establishments previously classified in the Standard Industrial Classification (SIC) in manufacturing (publishing); transportation, communications, and utilities (telecommunications and broadcasting); and services (software publishing, motion picture production, data processing, online information services, and libraries).

This new sector is comprised of industries which existed previously, were revised from previous industry definitions, or are completely new industries. Among those which existed previously are newspaper publishers, motion picture and video production, and online information services. Revised industries include book publishers, libraries, and archives.

Newly created industries include database and directory publishers, record production, music publishers, sound recording studios, cable networks, wired telecommunications carriers, paging, and satellite telecommunications.

Data from 1998 to 2003 are based on the 1997 NAICS; beginning 2004, data are based on the 2002 NAICS. Major revisions in many communications industries affect the comparability of these data. The following URL contains detailed information about NAICS, see <<http://www.census.gov/eos/www/naics/>>. See also the text in Section 15, Business Enterprise.

Several industries in the information sectors have been consolidated: paging is now included in Wireless Telecommunications Carriers (except Satellite). Cable and other program distribution and most Internet service providers are now included in Wired Telecommunications Carriers.

The 1997 Economic Census was the first economic census to cover the new information sector of the economy. The census, conducted every 5 years, for the years ending "2" and "7," provides information on the number of establishments, receipts, payroll, and paid employees for the United States and various geographic levels. The most recent reports are from the 2007 Economic Census. This census was conducted in accordance with the 2007 NAICS.

The Federal Communications Commission (FCC), established in 1934, regulates wire and radio communications. Only the largest carriers and holding companies file annual financial reports which are publically available. The FCC has jurisdiction over interstate and foreign communication services but not over intrastate or local services. Also, the gross operating revenues of the telephone carriers reporting publically available data annually to the FCC are estimated to

cover about 90 percent of the revenues of all U.S. telephone companies. Data are not service comparable with Census Bureau's *Annual Survey* because of coverage and different accounting practices for those telephone companies which report to the FCC.

Reports filed by the broadcasting industry cover all radio and television stations operating in the United States. The private radio services represent the largest and most diverse group of licensees regulated by the FCC. These services provide voice, data communications, point-to-point, and point-to-multipoint radio communications for fixed and mobile communicators. Major users of these services are small businesses, the aviation industry, the maritime trades, the land transportation industry, the manufacturing industry, state and local public safety and governmental authorities, emergency medical service providers, amateur radio operators, and personal radio operations (CB and the General Mobile Radio Service). The FCC also licenses entities as private and common carriers. Private and common carriers provide fixed and land mobile communications service on a for-profit basis. Principal sources of wire, radio, and television data are the

FCC's Annual Report and its annual *Statistics of Communications Common Carriers* at <<http://fcc.gov/wcb/iatd/stats.html>>.

Statistics on publishing are available from the Census Bureau, as well as from various private agencies. Editor & Publisher Co., New York, NY, presents annual data on the number and circulation of daily and Sunday newspapers in its *International Year Book*. The Book Industry Study Group, New York, NY, collects data on books sold and domestic consumer expenditures. Data on academic and public libraries are collected by the Institute of Museums and Library Services. Data on Internet use by adults are collected by the Pew Internet and American Life Project, Washington, DC, and Mediamark Research, Inc., New York, NY.

**Advertising**—Data on advertising previously shown in this section are now presented in Section 27, Accommodation, Food Services, and Other Services.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

**Table 1128. Information Industries—Type of Establishment, Employees, and Payroll: 2008**

[(3,434.2 represents 3,434,200). Excludes self-employed individuals employees on private households, railroad employees, agricultural production employees, and most government employees. For more information see source and Appendix III]

Table 1145. Telecommunications Industry—Carriers and Revenue: 2000 to 2008

[Revenue in millions of dollars (292,762 represents \$292,762,000,000). Based on annual Telecommunications Reporting Worksheets (FCC Form 499-A) filed by telecommunications providers. Revenues are categorized as those billed to universal service contributors for resale (carrier's carrier revenues); and, those billed to telecommunication providers with annual contributions less than \$10,000 and end users (end user revenues). Does not include any revenues, such as from Internet access or other information services, customer premises equipment, inside wiring, or published directories, that are not assessable for contributions to universal service support and cost recovery mechanisms]

Category	Carriers (number)				Telecommunications revenue (mil. dol.)

Operating revenues <sup>4</sup>	Bil. dol	84	96	117	111	109	107	106	105	103	(NA)
Average monthly residential local telephone rate <sup>4</sup>	Dollars	19.24	20.01	20.78	24.07	24.52	24.52	24.64	25.26	25.62	(NA)
Average monthly single-line business telephone rate <sup>4</sup>	Dollars	41.21	41.80	41.80	41.95	41.96	43.49	43.75	45.32	48.17	(NA)
INTERNATIONAL TELEPHONE SERVICE <sup>5</sup>											
Number of U.S. billed minutes	Millions	8,030	15,889	30,135	35,988	45,904	63,653	70,064	72,440	69,975	74,934
Revenue from private-line service	Mil. dol	201	514	1,502	988	899	711	738	792	717	817
Revenue from resale service	Mil. dol	167	1,756	7,367	5,101	5,760	5,226	5,750	6,077	6,959	8,459

NA Not available. <sup>1</sup> Beginning 2001, detailed financial data are only filed by Regional Bell Operating Companies (RBOCs). Access lines and calls reported by all subject reporting companies. <sup>2</sup> Beginning 1985, the number of carriers dropped due to a change in the reporting threshold for carriers from \$1 million to \$100 million in annual operating revenue. <sup>3</sup> Beginning 2008, carriers no longer report this data to the Federal Communications Commission. <sup>4</sup> Gross operating revenues, gross plant, and total assets of reporting carriers estimated at more than 90 percent of total industry. New accounting rules became effective in 1988; prior years may not be directly comparable on a one-to-one basis. Includes Virgin Islands, and prior to 1991, Puerto Rico. Beginning 2008, carriers no longer report this data to the Federal Communications Commission. <sup>5</sup> Beginning 1991, data are for all U.S. points, and include calls to and from Alaska, Hawaii, Puerto Rico, Guam, the U.S. Virgin Islands, and offshore U.S. points. Beginning 1991, carriers first started reporting traffic to and from Canada and Mexico. Data for Canada and Mexico in prior years are staff estimates. Beginning 2004, revenue from private-line service includes non-confidential private line service revenue and the total of private line and miscellaneous service revenue for carriers requesting confidential treatment for international telephone service

Table 1148. Average Annual Telephone Service Expenditures by All Consumer Units: 2001 to 2009

[In dollars except percent distribution. Based on Consumer Expenditure Survey. A consumer unit is defined as members of a household related by blood, marriage, adoption, or some other legal arrangement; a single person living alone or sharing a household with others, but who is financially independent; or two or more persons living together who share responsibility for at least two out of the three major types of expenses: food, housing, and other expenses]

Year	Average annual telephone service (dol.)				Percent distribution			
	Total telephone services	Residential telephone/pay phone	Cellular phone service	Other services <sup>1</sup>	Total telephone services	Residential telephone/pay phone	Cellular phone service	Other services <sup>1</sup>
2001	914	686	210	19	100.0	75.0	23.0	2.0
2002	957	641	294	22	100.0	67.0	30.7	2.3
2003	956	620	316	20	100.0	64.8	33.1	2.1
2004	990	592	378	20	100.0	59.8	38.2	2.0
2005	1,048	570	455	23	100.0	54.4	43.4	2.2
2006	1,087	542	524	21	100.0	49.9	48.2	2.0
2007	1,110	482	608	20	100.0	43.4	54.8	1.8
2008	1,127	467	643	17	100.0	41.4	57.1	1.5
2009	1,162	434	712	16	100.0	37.3	61.3	1.4

<sup>1</sup> Phone cards, pager services, and beginning in 2007, Voice over Internet Protocol, known as VoIP.

<sup>1</sup> Of the 9,221 public libraries, 7,469 were single outlet libraries and 1,752 were multiple outlet libraries. Single outlet libraries are a central library, bookmobile, or books by mail only outlet. Multiple outlet libraries have to or more direct service outlets including some combination of single outlet libraries. <sup>2</sup> Per capita rate and per 1,000 population based on total unduplicated population of legal service area given by the state library agency of each state. <sup>3</sup> The average per stationary outlet was calculated by dividing the total number of public use Internet computers in central and branch outlets by the total number of such outlets.

1158. Adult Computer and Adult Internet Users by Selected Characteristics: 2000 to 2011

[Percent of persons 18 years old and over. Represents persons who use a computer or the Internet at a workplace, school, home, or anywhere else, on at least an occasional basis. Based on telephone surveys of persons with land-line telephones unless otherwise noted. In May 2011, 2,277 persons were interviewed including 755 cell phone users. The response rate for the landline sample was 13.6 percent. The response rate for the cellular sample was 11.5 percent. This survey includes interviews conducted in English and Spanish. In May 2010, 2,252 persons were interviewed including 744 cell phone users. In 2009, 2,253 persons were interviewed including 651 cell phone users. For 2000, Internet users include persons who ever go online to access the Internet or World Wide Web or to send and receive e-mail. For 2005, 2009, 2010 and 2011, Internet users include those who at least occasionally use the Internet or send and receive e-mail]

1160. Typical Daily Internet Activities of Adult Internet Users: 2011

[Percent of Internet users 18 years old and over. Represents persons who reported doing the activity "yesterday." Based on telephone surveys of persons with land-line telephones and cell phones. In May 2011, 2,277 persons were interviewed including 755 cell phone users. The response rate for the landline sample was 13.6 percent. The response rate for the cellular sample was 11.5 percent. In November 2010, 2,257 persons were interviewed including 755 cell phone users. The response rate for the landline sample was 13.7 percent. The response rate for the cellular sample was 15 percent. In September 2010, 3,001 persons were interviewed including 1,000 cell phone users. The response rate for the landline sample was 13.6 percent. The response rate for the cellular sample was 17 percent]

## Section 25

# Banking, Finance, and Insurance

---

This section presents data on the nation's finances, various types of financial institutions, money and credit, securities, insurance, and real estate. The primary sources of these data are publications of several departments of the federal government, especially the U.S. Treasury Department, and independent agencies such as the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve System, and the Securities and Exchange Commission. National data on insurance are available primarily from private organizations, such as the American Council of Life Insurers and the Insurance Information Institute.

**Flow of funds**—The flow of funds accounts of the Federal Reserve Board bring together statistics on all of the major forms of financial instruments to present an economy-wide view of asset and liability relationships. In flow form, the accounts relate borrowing and lending to one another and to the nonfinancial activities that generate income and production. Each claim outstanding is included simultaneously as an asset of the lender and as a liability of the debtor. The accounts also indicate the balance between asset totals and liability totals over the economy as a whole. Several publications of the Federal Reserve Board contain information on the flow of funds accounts: Summary data on flows and outstandings, in the statistical release *Flow of Funds Accounts of the United States* (quarterly); and concepts and organization of the accounts in *Guide to the Flow of Funds Accounts* (2000). Data are also available on the Federal Reserve Board's Web site at <http://www.federalreserve.gov/>.

**Survey of Consumer Finances (SCF)**—The Federal Reserve Board, in cooperation with the Treasury Department, sponsors this survey, which is conducted every 3 years to provide detailed information on the finances of U.S. families. Among the topics covered are the balance sheet, pension, income, and other demographic

characteristics of U.S. families. The survey also gathers information on the use of financial institutions. Since 1992, data for the SCF have been collected by the National Organization for Research at the University of Chicago. Data and information on the survey are available on the Federal Reserve Board's Web site at <http://www.federalreserve.gov/pubs/oss/oss2/scfindex.html>.

**Banking system**—Banks in this country are organized under the laws of both the states and the federal government and are regulated by several bank supervisory agencies. National banks are supervised by the Comptroller of the Currency. *Reports of Condition* have been collected from national banks since 1863. Summaries of these reports are published in the Comptroller's *Annual Report*, which also presents data on the structure of the national banking system.

The Federal Reserve System was established in 1913 to exercise central banking functions, some of which are shared with the U.S. Treasury. It includes national banks and such state banks that voluntarily join the system. Statements of state bank members are consolidated by the Federal Reserve Board with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the system. Balance sheet data for member banks and other commercial banks are available on the Federal Reserve Board's Web site at <http://www.federalreserve.gov/econresdata/releases/statisticsdata.htm>.

The Federal Deposit Insurance Corporation (FDIC), established in 1933, insures each depositor up to \$250,000. Major item balance sheet and income data for all insured financial institutions are published in the *FDIC Quarterly Banking Profile*. This publication is also available on the Internet at the following address: <http://www.fdic.gov>. Quarterly financial information for individual institutions is available through the FDIC and Federal

Financial Institutions Examination Council Web sites at <<http://www.fdic.gov>> and <<http://www.ffiec.gov>>.

**Credit unions**—Federally chartered credit unions are under the supervision of the National Credit Union Administration. State-chartered credit unions are supervised by the respective state supervisory authorities. The administration publishes comprehensive program and statistical information on all federal and federally insured state credit unions in the *Annual Report of the National Credit Union Administration*.

**Other credit agencies**—Insurance companies, finance companies dealing primarily in installment sales financing, and personal loan companies represent important sources of funds for the credit market. Statistics on loans, investments, cash, etc., of life insurance companies are published principally by the American Council of Life Insurers in its *Life Insurers Fact Book*. Consumer credit data are available on the Federal Reserve Board's Web site at <<http://www.federalreserve.gov/econresdata/releases/statisticsdata.htm>>. Government corporations and credit agencies make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions. Data on operations of government credit agencies, along with other government corporations, are available in reports of individual agencies.

**Securities**—The Securities and Exchange Commission (SEC) was established in 1934 to protect the interests of the public and investors against malpractices in the securities and financial markets and to provide the fullest possible disclosure of information regarding securities to the investing public.

Data on the securities industry and securities transactions are also available from a number of private sources. The Securities Industry and Financial Markets Association, New York, NY, <<http://www.sifma.org/>>, publishes the *Securities Industry*

*Fact Book* and *Securities Industry Yearbook*. The Investment Company Institute, Washington, DC, <<http://www.ici.org/>>, publishes a reference book, research newsletters, and a variety of research reports that examine the industry, its shareholders, or industry issues. The annual *Mutual Fund Fact Book* is a guide to trends and statistics observed in the investment company industry. *Fundamentals* is a newsletter summarizing the findings of major Institute research projects. Institute research reports provide a detailed examination of shareholder demographics and other aspects of fund ownership.

Among the many sources of data on stock and bond prices and sales are the New York Stock Exchange, New York, NY, <<http://www.nyse.com/>>; NASDAQ, Washington, DC, <<http://www.nasdaq.com/>>; Global Financial Data, Los Angeles, CA, <<http://www.globalfinancialdata.com/>>; and Dow-Jones & Company, Inc., New York, NY, <<http://www.djindexes.com>>.

**Insurance**—Insuring companies, which are regulated by the various states or the District of Columbia, are classified as either life or property. Both life and property insurance companies may underwrite health insurance. Insuring companies, other than those classified as life, are permitted to underwrite one or more property lines provided they are so licensed and have the necessary capital or surplus. There are a number of published sources for statistics on the various classes of insurance—life, health, fire, marine, and casualty. Organizations representing certain classes of insurers publish reports for these classes. The American Council of Life Insurers publishes statistics on life insurance purchases, ownership, benefit payments, and assets in its *Life Insurers Fact Book*.

**Statistical reliability**—For a discussion of statistical collection, estimation, and sampling procedures and measures of reliability applicable to data from the Census Bureau and the Federal Reserve Board's Survey of Consumer Finances, see Appendix III.

Figure 25.1

**Table 1175. Household Debt-Service Payments and Financial Obligations as a Percentage of Disposable Personal Income: 1990 to 2010**

[As of end of year, seasonally adjusted. Household debt service ratio is an estimate of the ratio of debt payments to disposable personal income. Debt payments consist of the estimated required payments on outstanding mortgage and consumer debt. The financial obligations ratio adds automobile lease payments, rental payments on tenant-occupied property, homeowners’ insurance, and property tax payments to the debt service ratio]

Year	Household debt service ratio	Financial obligations ratio			Year	Household debt service ratio	Financial obligations ratio		
		Total	Renter	Home-owner			Total	Renter	Home-owner

– Represents zero. Z Less than \$50 million. <sup>1</sup> Does not include foreign branch assets. <sup>2</sup> Excludes foreign office deposits, which are uninsured. <sup>3</sup> In general, insured deposits are total domestic deposits minus estimated uninsured deposits. Prior to September 30, 2009 insured deposits included deposits in accounts of \$100,000 or less, beginning September 30, 2009, insured deposits include deposits in accounts of \$250,000 or less. The Dodd-Frank Wall Street Reform and Consumer Protection Act temporarily provides unlimited coverage for noninterest bearing transaction accounts for two years beginning December 31, 2010. Beginning in the fourth quarter of 2010, estimates of insured deposits include the entire balance of noninterest bearing transaction accounts.

<sup>4</sup> DIF balance as percent of DIF-insured deposits.

<sup>1</sup> Net operating revenue equals net interest income plus noninterest income. Net operating revenue equals income excluding discretionary transactions such as gains or losses on the sale of investment securities and extraordinary items. Income taxes subtracted from operating income have been adjusted to exclude the portion applicable to securities gains or losses. <sup>2</sup> Net income (including securities transactions and nonrecurring items) as a percentage of average total assets. <sup>3</sup> Net income as a percentage of average total equity capital. <sup>4</sup> Interest income less interest expense as a percentage of average earning assets (i.e. the profit margin a bank earns on its loans and investments). <sup>5</sup> Total loans and leases charged off (removed from balance sheet because of uncollectibility), less amounts recovered on loans and leases previously charged off. <sup>6</sup> Noncurrent assets: the sum of loans, leases, debt securities and other assets that are 90 days or more past due, or in nonaccrual status. Other real estate owned, primarily foreclosed property.

**Table 1181. FDIC-Insured Financial Institutions—Number of Offices and Deposits by State: 2009**

[As of June 30 (7,675.6 represents \$7,675,620,000,000). Includes insured U.S. branches of foreign banks. The term "offices" includes both main offices and branches. "Banking office" is defined to include all offices and facilities that actually hold deposits, and does not include loan production offices, computer centers, and other nondeposit installations, such as automated teller machines (ATMs). Several institutions have designated home offices that do not accept deposits; these have been included to provide a more complete listing of all offices. The figures for each geographical area only include deposits of offices located within that area. Based on the Summary of Deposits survey]

**Table 1182. U.S. Banking Offices of Foreign Banks—Summary: 1990 to 2010**

[In billions of dollars, except as indicated (834 represents \$834,000,000,000). As of December. Covers the U.S. offices of foreign banking organizations that are located in the 50 states and the District of Columbia. Offices located in Puerto Rico, American Samoa, Guam, the Virgin Islands and other U.S.-affiliated insular areas are excluded. Foreign-owned institutions are those owned by a bank located outside of the United States and its affiliated insular areas. The U.S. offices of foreign banking organizations consist of U.S. branches and agencies of foreign banks and bank subsidiaries of foreign banking organizations. The latter are U.S. commercial banks of which more than 25 percent are owned by a foreign banking organization or where the relationship is reported as being a controlling relationship by the filer of the FR Y-10 (Report of Changes in Organizational Structure) report form]

**Table 1184. Noncash Payments by Method of Payment and ATM Cash Withdrawals: 2006 and 2009**

[95.2 represents 95,200,000,000. Based on two data collection efforts to estimate the annual number and value of significant types of noncash Estimates of check payments and ATM withdrawals were based on findings from the payments. Depository Institutions Based on two data collection efforts to estimate the annual number and value of significant types of noncash payments. Estimates of check payments and ATM withdrawals were based on findings from the Depository Institutions Payments Study (2010 DI study). Electronic payments volume estimates were based on findings from the Electronic Payments Study and supplemented by the 2010 DI study. The Depository Institutions Payments Study collected the number and value of different types of payments from deposit accounts at a representative, random sample of depository institutions. A total of 1,311 depository institutions (commercial banks, savings institutions, and credit unions) from a stratified random sample of 2,700 institutions provided data for the survey. The Electronic Payments Study estimated the number and value of electronic payments in the United States for calendar year 2009. Data were collected by surveying payment networks and card issuers. Of the 116 organizations asked to participate, 94 of the largest organizations provided data. Respondents to this study collectively accounted for an estimated 95.5 percent of the electronic transactions and 99.6 percent of the electronic payments value in the United States]

Method of payment	Transactions (billions)		Value (trillion dollars)		Average value per transaction (dollars)

Z Less than \$50 billion. <sup>1</sup> Signature debit card payments are made like credit card payments, but use funds from transaction deposit accounts. <sup>2</sup> PIN debit card payments also use funds from transaction deposit accounts and typically require the entry of the same personal identification number (PIN) used to access automated teller machines (ATMs). Excludes a portion estimated to have been returned to the customer as cash. <sup>3</sup> Credit cards include both general purpose and private-label cards. <sup>4</sup> Includes general purpose and private label prepaid cards, which use funds from a nontraditional prefunded transaction account, as well as electronic benefit transfers. <sup>5</sup> Includes the use of checks as source documents to initiate electronic payments.

NA Not available. <sup>1</sup> A debit card is a card that automatically deducts the amount of a purchase from the money in an account. <sup>2</sup> A smart card is a type of payment card containing a computer chip which is set to hold a sum of money. As the card is used, purchases are subtracted from that sum. <sup>3</sup> Prepaid cards are cards that contain a stored value, or a value that has been paid up-front, allowing you to use the card much like cash. As you use the card, the prepaid value is drawn down. Examples are phone cards and gift cards. Smart cards are different from prepaid cards in that you can add money to the card at special machines designed for smart cards or sometimes at ATMs.

<sup>1</sup> The question on ATM cards asked whether any member of the household had an ATM card, not whether the member used it. The other questions asked about usage of other instruments. <sup>2</sup> The question on software asked whether the respondent or spouse/partner uses any type of computer software to help in managing their money. <sup>3</sup> Low income is defined as less than 50 percent of the median household income; moderate income is 50 to 80 percent of the median; and upper income is greater than 120 percent of the median. Each survey refers to income in the previous year. Median income was \$41,990 in 2000 and \$48,201 in 2006.

**Table 1194. Mortgage Originations and Delinquency and Foreclosure Rates: 1990 to 2010**

[In percent, except as indicated (459 represents \$459,000,000,000). Covers one- to four-family residential nonfarm mortgage loans. Mortgage origination is the making of a new mortgage, including all steps taken by a lender to attract and qualify a borrower, process the mortgage loan, and place it on the lender's books. Based on the National Delinquency Survey which covers 45 million loans on one- to four-unit properties, representing between 80 to 85 percent of all 'first-lien' residential mortgage loans outstanding. Loans surveyed were reported by approximately 120 lenders, including mortgage bankers, commercial banks, and thrifts]

**Table 1195. Delinquency Rates and Charge-Off Rates on Loans at Insured Commercial Banks: 1990 to 2010**

[In percent. Annual averages of quarterly figures, not seasonally adjusted. Delinquent loans are those past due 30 days or more and still accruing interest as well as those in nonaccrual status. They are measured as a percentage of end-of-period loans. Charge-offs, which are the value of loans removed from the books and charged against loss reserves, are measured net of recoveries as a percentage of average loans and annualized. Includes only U.S.-chartered commercial banks]

<sup>1</sup> Currency outside U.S. Treasury, Federal Reserve Banks and the vaults of depository institutions. <sup>2</sup> Outstanding amount of U.S. dollar-denominated travelers' checks of nonbank issuers. Travelers' checks issued by depository institutions are included in demand deposits. <sup>3</sup> Demand deposits at domestically chartered commercial banks, U.S. branches and agencies of foreign banks, and Edge Act corporations (excluding those amounts held by depository institutions, the U.S. government, and foreign banks and official institutions) less cash items in the process of collection and Federal Reserve float. <sup>4</sup> Negotiable order of withdrawal (NOW) and automatic transfer service (ATS) balances at domestically chartered commercial banks, U.S. branches and agencies of foreign banks, Edge Act corporations, and thrift institutions, credit union share draft balances, and demand deposits at thrift institutions. <sup>5</sup> Small-denomination time deposits are those issued in amounts of less than \$100,000. All Individual Retirement Account (IRA) and Keogh account balances at commercial banks and thrift institutions are subtracted from small time deposits.

**Table 1203. U.S. Purchases and Sales of Foreign Bonds and Stocks, 1990 to 2010, and by Selected Country, 2010**

[In billions of dollars (31.2 represents \$31,200,000,000). Covers transactions in all types of long-term foreign securities by foreigners as reported to the Treasury International Capital Reporting System by banks, brokers, and other entities in the United States. Data cover new issues of securities, transactions in outstanding issues, and redemptions of securities. Includes transactions executed in the United States for the account of foreigners, and transactions executed abroad for the account of reporting institutions and their domestic customers. Data by country show the country of location of the foreign buyers and sellers who deal directly with reporting institutions in the United States. The data do not necessarily indicate the country of beneficial owner or issuer. The term "foreigner" covers all institutions and individuals domiciled outside the United States, including U.S. citizens domiciled abroad, and the foreign branches, subsidiaries, and other affiliates abroad of U.S. banks and businesses; the central governments, central banks, and other official institutions of foreign countries; and international and regional organizations. "Foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners. Excludes acquisitions of foreign stocks through mergers that involve stock swaps. Including stock swaps, net sales of foreign securities was \$163 billion in 2010. Minus sign (–) indicates net sales by U.S. investors or a net inflow of capital into the United States]

**Table 1205. Foreign Purchases and Sales of U.S. Securities by Type of Security, 1990 to 2010, and by Selected Country, 2010**

[In billions of dollars (18.7 represents \$18,700,000,000). Covers transactions in all types of long-term domestic securities by foreigners as reported as reported to the Treasury International Capital Reporting System by banks, brokers, and other entities in the United States (except nonmarketable U.S. Treasury notes, foreign series; and nonmarketable U.S. Treasury bonds and notes, foreign currency series). Data by country show the country of domicile of the foreign buyers and sellers of the securities; in the case of outstanding issues, this may differ from the country of the original issuer. Excludes U.S. equities acquired through mergers and reincorporations that involve stock swaps and principal repayment flows on foreign holdings of U.S. government agency and corporate asset-backed securities (ABS). Including stock swaps and accounting for ABS repayment flows, net purchases of U.S. securities was \$716 billion in 2010. Minus sign (–) indicates net sales by foreigners or a net outflow of capital from the United States]

<sup>1</sup> Standard & Poor's Indices are market-value weighted and are chosen for market size, liquidity, and industry group representation. The S&P 500 index represents 500 large publicly-traded companies. The S&P MidCap Index tracks mid-cap companies. The S&P SmallCap Index consists of 600 domestic small-cap stocks. <sup>2</sup> The Russell 1000 and 3000 indices show respectively the 1000 and 3000 largest capitalization stocks in the United States. The Russell 2000 index shows the 2000 largest capitalization stocks in the United States after the first 1000. <sup>3</sup> Dow-Jones Wilshire 5000 Composite Index (full-cap) measures the performance of all U.S. headquartered equity securities with readily available prices. Source: Dow-Jones & Company, Inc., New York, NY, *Dow-Jones Indexes*, (copyright). <sup>4</sup> Source: U.S. Council of Economic Advisors, *Economic Indicators*, monthly. <sup>5</sup> Aggregate cash dividends (based on latest known annual rate) divided by aggregate market value based on Wednesday closing prices. Averages of monthly figures. <sup>6</sup> Averages of quarterly ratios which are ratio of earnings (after taxes) for 4 quarters ending with particular quarter-to-price index for last day of that quarter.
